System Overview

Greece has a **highly centralised** education system managed by the **Υπουργείο Παιδείας και Θρησκευμάτων** (Ministry of Education and Religious Affairs). Health education (Αγωγή Υγείας) is not a standalone subject but is delivered as a **cross-curricular theme** integrated into Biology (Βιολογία), Physical Education (Φυσική Αγωγή), and other subjects. A significant innovation was the introduction of **Skills Labs** (Εργαστήρια Δεξιότητων) in 2021–2022 — mandatory weekly sessions focused on life skills, emotional intelligence, digital literacy, and health. The Greek Orthodox Church has historically exerted significant influence on sensitive health content (particularly sexuality education). The **ΕΟΔΥ** (National Public Health Organisation) provides health data.
