Introduction

This Home Economic syllabus is based on the curriculum principles outlined in The National Curriculum Framework for All (NCF) and designed using the Learning Outcomes Framework (LOF) to identify what students should know and be able to achieve by the end of their compulsory education. As a learning outcomes-based syllabus, it addresses the holistic development of all learners and advocates for quality education in line with national strategies for inclusivity, lifelong learning, and future career opportunities.

Home Economics - Rationale

Home Economics (HE) is a multi-disciplinary field of study that seeks to promote optimal and sustainable living for individuals, families, and communities. It is concerned with meeting the challenges of everyday living in modern society. Furthermore, it provides a balance between theoretical understandings and practical actions in everyday situations. HE encompasses the learning and mastery of knowledge, attitudes, skills, and competencies that enable students to develop:

- as individuals by:
helping them to become health literate to be able to address health problems and issues, making responsible informed choices about their food and diet, thus enhancing their potential to improve their health and well-being;
- as contributors to society by:
helping them realise their responsibility to ensure that the community is kept healthy, safe, and secure, becoming effective communicators, making them aware of values and lifestyles that are different from their own, and helping them make meaningful decisions in family relationships taking into consideration the ever-changing nature of families and parenting in today's society;
- as contributors to the economy by:
guiding them to enhance their ability to become cautious, competent consumers and manage their resources in an efficient, effective, and sustainable manner; making informed choices in relation to the environment not only within their immediate context but also in the future; promoting financial literacy as a salient contributor towards the achievement and maintenance of the improved quality of life and nurturing a creative entrepreneurial mind-set.

The Relevance of Home Economics

The health and well-being theme embraced in HE provides a consolidated approach to education and aims to enable learners to develop the knowledge, skills, and competencies to

make informed choices while considering the impact of those actions on themselves, the well-being of other people, and society at large.

Learners should reach their full potential as they engage in various hands-on activities that are age-appropriate and level-specific. Food preparation opportunities based on sound principles of diet and nutrition provide learners with a basic skill that will enable them to take action to improve their health. The aims of HE based on this vision are expected to guide all learners to strengthen their ability to become advocates for health. This is essentially important to help curb the health problems that are afflicting our nation and help improve the health and well-being of our population.

Home Economics advocates the strengthening of the family and addresses the different challenges that are faced by the family in a changing world. From a HE perspective, families have a great potential for the achievement of sustainable development as core units of society and the economy. The focus of HE education on food production and nutrition, family health and well-being, resource management, and financial literacy which are fundamental for sustainable development, leads to valuable results for development.

HE incorporates financial literacy directly under the umbrella of consumer education and money management. This area of study provides students with the right knowledge and skills to become responsible and informed consumers as well as nurture a culture of financial planning and preparation amongst our students.

Being financially literate is a salient contributor to helping to achieve and maintain such an improved quality of life, which seeks to address poverty and social exclusion. To this end, HE directs the learners' decisions and actions and prepares them for life as individuals, family members, active citizens, and skilled employees, while facilitating the development of attributes for lifelong learning.

Home Economics as a subject can help reinforce the learning outcomes and outputs as proposed in the National Curriculum Framework due to its complementarity with other learning areas, namely:

- Health and Physical Education
- Education for Democracy
- Education for Entrepreneurship, Creativity, and Innovation
- Education for Sustainable Development

Home Economics is one of the subjects in the Health and Physical Education (HPE) Learning Area. Since the inception of the NCF, HE education has been aligned with this learning area, even though due to its multi-disciplinary and trans-disciplinary nature, it complements other cross-curricular themes and learning areas.

The HE Secondary School curriculum will provide students with opportunities to understand basic human necessities and to study the well-being of individuals, families, and societies, building up their awareness of the various dimensions affecting well-being. While the HE core Middle School curriculum can provide a broad-based study that includes all the major areas in HE, the HE option curriculum at the senior level will provide students with an in-depth study of specific areas that provides the basis for further studies. The curriculum at this level will therefore aim to strike a balance between breadth and depth and to respond to current social, economic, and technological developments, both on a local and global level.

Home Economics encompasses four main dimensions or areas of practice, namely:

Area 1: Food, Nutrition, and Health

Allows students to understand and apply relevant scientific principles of nutrition in relation to food choices and their significance to health; take increasing responsibility for the management of their own health and that of individual family members; develop a variety of practical skills to prepare and present nutritionally balanced foods; investigate how issues relating to social, cultural, technological, economic, environmental, physiological and psychological points of view impact food choice and health.

Area 2: Family Wellbeing

Allows students to become aware of how influences of contemporary society directly impact the wellbeing of individuals, families, and communities; identify the family as a social institution as well as the contribution of family life to the personal and social development of its members; assess how the quality of relationships is affected by the way family members communicate, share, take responsibility and help one another; consider the different and changing needs of family members and how these needs could be met throughout the lifecycle.

Area 3: Financial Literacy and Consumer Education

Allows students to become informed consumers in an everchanging society; identifying the basic needs in life over wants, keeping in mind priorities and making a budget whilst saving; be aware of their rights and responsibilities when shopping and availing themselves of different services; showing awareness of different methods of payment and methods of saving; becoming critical consumer, being able to critically analyse different forms of advertising.

Area 4: Sustainable Living and Effective Management of Resources

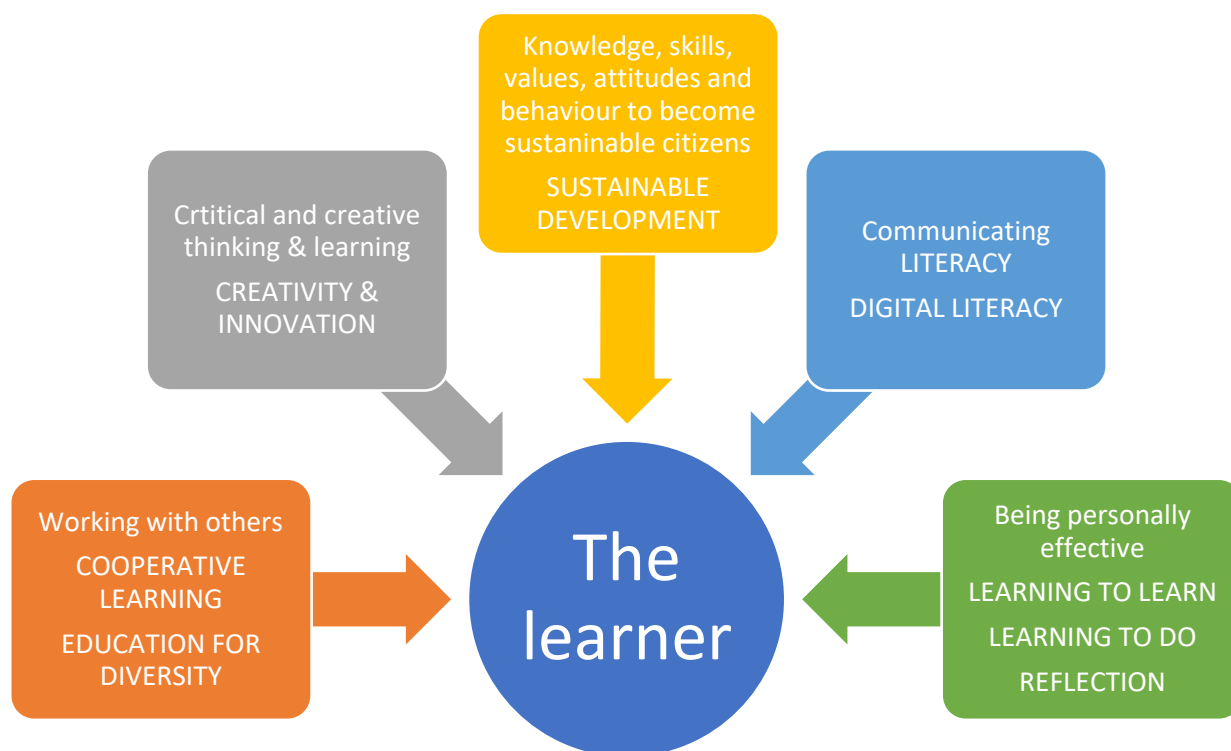

Allows students to become discerning consumers and effective managers of safe and sustainable resources in relation to the home, family, and environment within local and global contexts; develop an awareness of relevant statutory and voluntary provisions available to nurture positive attitudes and appreciate their effect on the family and households within the

community; foster aesthetic appreciation of products and investigate the implications and applications of technology and marketing techniques on consumers.

Key Skills in Home Economics

The Home Economics course of study is designed to equip students with a broad range of knowledge, skills, and competencies in line with Home Economics' multi-disciplinary foundations. It melds scientific principles with a practical, critical-thinking, and problem-solving approach calling upon health, physical, communication, and social sciences, together with organisational and entrepreneurial skills. The main aims of the Home Economics course are to help students:

- Develop an appreciation of the value of choosing sustainable lifestyles based on efficient, safe, and fair management of personal, household, community, and global resources; and nurture skills to make informed and responsible choices and implement appropriate actions in different everyday scenarios.
- Increase understanding, nurture attitudes and develop skills to adopt and promote health and wellbeing; improve knowledge about risks for health, including unsafe practices, lack of hygiene, malnutrition, and lack of physical activity; and acquire skills to lessen such health risks.
- Assimilate the relevant scientific principles involved in food production and processing, food composition and labelling, nutrition throughout the lifecycle and dietary standards; and adopt a balanced, critical approach to food choice and eating habits; as well as develop skills relating to the choice, preparation, presentation, and storage of food to promote health, to cater for diet-related diseases and conditions, to preserve food culture and to enhance sustainability.
- Increase understanding of the changing physical, social, emotional, intellectual, and aesthetic needs of individuals and family members throughout their life cycle; and develop skills on how to meet the various needs within the home and through community services; as well as foster an ability to communicate, share and make informed decisions to enhance positive family values and relationships.
- Develop the knowledge and competencies required for the effective and safe organisation and management of the home and its contents as well as develop the necessary skills to respond effectively to rapid technological changes and to scientific development which can impact individual, family, and community living.
- Cultivate financial competency to budget and manage personal finances wisely; strengthen awareness of consumer rights and responsibilities and marketing and advertising pressures; as well as nurture a critical approach to assessing consumer goods and services showing a responsible attitude and informed decision-making.
- Develop the qualities of systematic inquiry, creativity, innovativeness, and aesthetic appreciation to create and maintain pleasing, safe, sustainable, and health-enhancing tangible products and physical and social environments; and adopt an analytical approach to decision-making and problem-solving showing sensitivity and academic rigour.

Cross-Curricular Themes

Several cross-curricular themes have been identified as central to helping learners achieve their potential. Many of the elements that make up these cross-curricular themes are a feature of teaching and learning across subjects. With the embedding of cross-curricular themes within the learning outcomes, learners will be presented with a range of learning experiences that will improve their present and future access to learning, their social interaction, their information and communication abilities, and their ability to work collaboratively. This involves building on current practice, but it also involves increasing attention to key skills. The Cross Curricular Themes can be found in Appendix 3.

As learners engage with each of the key skills, they grow in their knowledge about learning and their skills of learning, both in general terms and in the context of their own learning. Therefore, as learners absorb the key skills they also learn how to learn. As learners progress through different levels, the learning outcomes and respective assessment criteria indicate the required evidence of achieving the key skill.

The assessment criteria will provide the basis for assessment as part of ongoing teaching and learning. Different modes of assessment will enable the learners to:

- demonstrate a knowledge and understanding of appropriate terminology, procedures, principles (main concepts), and practices in relation to the syllabus content;
- demonstrate an understanding of the influences of cultural, economic, industrial, social, and technological factors in relation to the syllabus content;

- analyse situations in the field of Home Economics by identifying the various human needs and material factors involved, and recognise the inter-relationships of these needs and factors.
- recall, seek out, select, record, and show skill in applying theoretical knowledge relevant to the needs and factors identified.
- use investigative procedures to:
 - test and compare methods, materials, and equipment.
 - observe, measure and record observations accurately and systematically.
 - interpret evidence in its various forms as a basis for making judgments and choices.
 - justify judgments and choices in the light of the evidence.
 - decide upon and plan a course of action that considers the priorities identified.
 - carry out the planned course of action by applying the required skills.
 - assess and evaluate the strengths and weaknesses, i.e. the effectiveness of the course of action.
 - display the relevant manipulative, organizational, managerial, and communication skills.

Assessment

Assessment is an essential part of the learning and teaching process, with the main purpose being to give feedback to both the educator and the learner. Both formative and summative forms of assessment are equally significant, and both serve an educational purpose in the learning and teaching process in Home Economics.

Assessment is frequently described as having three purposes: for learning, where the evidence gathered shapes the planning for teaching and learning; as learning, where the learners learn about their learning and how to improve it; and of learning, where the evidence gathered informs the learner's progress.

In order to present a fair evaluation of learners' abilities, it is essentially important that, in Home Economics, a broad range of evidence is provided.

- What evidence of learning will be collected?
- What activities will facilitate assessment and provide evidence of learning?
- How will evidence of learning be recorded?
- Who will partake in collecting evidence of learning?

Assessment for Learning (AfL) yields important data that may enable educators to adjust and develop their teaching strategies. The following core strategies may impact the learners' performance and merit consideration in the mode of assessment employed:

- Clarifying learning intentions and outcomes.
- Producing effective questions and tasks that elicit evidence of learning.
- Providing feedback that shows learners what the next step is.
- Stimulating learners to become responsible for their own learning.
- Stimulating learners to become resources for one another.

AfL focuses on the learner by assessing the learners individually through various means. Formative assessment helps educators and learners to monitor progress and identify areas for improvement. Besides, it also gives educators valuable information about the learners' attainment.

In Home Economics, such a style of assessment is based on various observations, hands-on learning experiences, surveys, and learner participation in the ensuing discussion process. The learners' own initiative can also be taken into consideration. Educators have an opportunity to understand a learner's learning and thinking, and learners have an opportunity to reflect upon, record, and evaluate all steps of the learning process before proceeding to the next step. Ongoing evaluation, both in tasks, or projects, as well as hands-on interventions, helps learners to identify their strengths and work on their weaknesses, thus consolidating what has been learned. Evidence of learning may, in fact, come from:

- research/project work which gives the learner the opportunity to craft knowledge, skills, and attitudes into a complete package, or product, with individual style
- performance tasks that address specific assignment briefs
- an evaluation exercise that is completed after learners participate in a food preparation session/experiment/investigation
- written work
- site visits and other similar practical learning activities

Assessment of the learners' achievement for summative purposes should not be dependent on the one-off performances of tests and examinations. Alternatively, it ought to have a formative element by encouraging learners to reflect on their performance. This can include written assessments, task-based assignments, and controlled practical assessments which are embedded within the learning process. Summative assessments may be designed so that they more closely resemble problems encountered in real life. Hence, this form of assessment might include interpreting/modifying a recipe or writing short sentences to outline a point of view. It is essentially important that any form of assessment carried out at school, especially in the upper levels, would be in synergy with the MATSEC examination.

Learning Outcomes (LOs)

Learning Outcomes state what learners are expected to achieve in the subject at the end of the course of study. These LOs focus on particular topics/themes/areas. The selected content should enable learners to achieve the specific learning outcomes.

At the end of the programme, I can:	
LO1	Demonstrate an understanding of health, well-being, and the principles of sustainability.
LO2	Demonstrate a comprehensive understanding of the role of macro and micronutrients in the diet, their digestion, and their effects on health.
LO3	Demonstrate an understanding of different types of food commodities.
LO4	Demonstrate a broad understanding of food production, processing, preservation, and labelling.
LO5	Demonstrate the ability to accurately plan, produce and evaluate a variety of sensorially appealing healthy food items and meals.
LO6	Demonstrate the ability to critically, sensitively, and creatively understand and address issues related to the family, community, and the environment.
LO7	Demonstrate financial capability and critically assess the social, economic, and environmental factors that influence consumer behaviours.
LO8	Demonstrate an understanding of sustainable living and the principles and procedures involved in acquiring, designing, and using accommodation and resources according to the needs of individuals and families.

Level Descriptors

This syllabus sets out the content and assessment arrangements for the award of a Secondary Education Certificate in **HOME ECONOMICS** at Level 1, 2, or 3. Level 3 is the highest level that can be obtained for this qualification.

Table 1 overleaf refers to specific **HOME ECONOMICS** descriptors. These are general statements that describe the depth and complexity of each level of study and outline the knowledge, skills, and competencies required at each level.

Knowledge involves the acquisition of basic, factual, and theoretical information. Skills involve the application of the acquired knowledge and understanding to different contexts. Competencies indicate the sufficiency of knowledge and skills that enable someone to act in a wide variety of situations, such as whether one is competent to exercise skills with or without supervision, autonomy, or responsibility.

Level 1	Level 2	Level 3
Basic general HE related knowledge 1. Acquires basic general knowledge related to the immediate HE environment and expressed through a variety of simple tools and context as an entry point to lifelong learning. 2. Knows and understands the steps needed to complete simple tasks and activities in an HE environment; 3. Is aware and understands basic HE tasks and instructions; 4. Understands basic HE textbooks and instruction guides.	Basic factual knowledge of the HE fields of work or study. 1. Possess good knowledge of the HE field of work or study; 2. Is aware of and interprets HE related information and ideas; 3. Understands facts and procedures in the application of basic HE related tasks and instructions; 4. Selects and uses relevant HE knowledge to accomplish specific actions for self and others.	Knowledge of facts, principles, processes, and general concepts in the HE field of work or study. 1. Understands the relevancy of theoretical knowledge and information related to the HE field of work or study; 2. Assesses, evaluates, and interprets facts, establishing basic principles and concepts in the HE field of work or study; 3. Understands facts and procedures in the application of more complex HE tasks and instructions; 4. Selects and uses relevant HE knowledge acquired on one's own initiative to accomplish specific actions for self and others.
Basic skills required to carry out simple HE-related tasks. 1. Has the ability to apply basic HE knowledge and carry out a limited range of simple tasks; 2. Has basic repetitive communication skills to complete well-defined HE routine tasks and identifies whether actions have been accomplished;	Basic cognitive and practical skills required to use relevant HE information in order to carry out tasks and to solve HE related routine problems using simple rules and tools. 1. Has the ability to demonstrate a range of skills by carrying out a range of complex HE related tasks within the HE field of work or study;	A range of cognitive and practical skills required to accomplish HE related tasks and solve HE related problems by selecting and applying basic methods, tools, materials and information. 1. Demonstrates a range of developed HE skills to carry out more than one complex HE related task effectively and in

3. Follows instructions and be aware of consequences of basic actions for self and others.	2. Communicates basic HE related information; 3. Ensures HE related tasks are carried out effectively.	unfamiliar and unpredictable HE contexts; 2. Communicates more complex HE information; 3. Solves basic HE related problems by applying basic methods, tools, materials and information given in a restricted learning environment.
Work out or study under Direct Supervision in a structured HE context. 1. Applies basic HE knowledge and skills to do simple, repetitive and familiar tasks; 2. Participates in and takes basic responsibility for the action of simple HE tasks; 3. Activities are carried out under guidance and within simple defined timeframes; 4. Acquires and applies basic HE key competencies at this level.	Work or study under supervision with some autonomy. 1. Applies factual HE knowledge and practical skills to do some structured tasks; 2. Ensures one acts pro-actively; 3. Carries out HE related activities under limited supervision and with limited responsibility in a quality controlled HE context; 4. Acquires and applies basic HE key competencies at this level.	Take responsibility for completion of HE related tasks in work or study and adapt own behaviour to circumstances in solving HE problems. 1. Applies HE knowledge and skills to do some HE tasks systematically; 2. Adapts own behaviour to circumstances in solving HE related problems by participating pro-actively in structured HE learning environments; 3. Uses own initiative with established responsibility and autonomy, but is supervised in quality-controlled learning environments, normally in an HE environment; 4. Acquires HE key competencies at this level as a basis for lifelong learning.

Adapted from: <https://mfhea.mt/wp-content/uploads/2021/03/Referencing-Report-2016.pdf>

Broad Learning Outcomes (BLOs) with Subject Foci – Year 10

A number of multiple core learning outcomes or Broad Learning Outcomes (BLOs) have been identified as per Learning Programme for the Year 10 course. These are aligned with the subject learning outcomes and sets of assessment criteria.

Broad Learning Outcomes with Subject Foci - Year 10

Subject Foci
1 - Food, Nutrition and Health
2 - Family Wellbeing
3 - Financial Literacy and Consumer Education
4 - Sustainable Living & Effective Management of Resources

Subject Foci	Broad Learning Outcomes (BLO) with Subject Foci (SLO)
Food, Nutrition and Health	LO1: I can demonstrate an understanding of health, wellbeing, and the principles of sustainability.
	BLO 1.1: I can discuss the factors affecting food choice.
	Topic Area: Factor affecting food choice.
Food, Nutrition and Health	LO 2: I can demonstrate a comprehensive understanding of the role of macro and micronutrients in the diet, their digestion, and effects on health.
	BLO 2.1: I can explain the process of digestion.
	Topic Area: The process of digestion.
Food, Nutrition and Health	LO 3: I can demonstrate an understanding of different types of food commodities.
	BLO 3.1: I can relate food commodities to their characteristics, sources, nutritional value, versatility, uses and storage.
	Topic Area: Food commodities: Meat, Fruits and vegetables.
Food, Nutrition and Health	LO 4: I can demonstrate a broad understanding of food production, processing, preservation and labelling.
	BLO 4.1: I can review the role of organic farming and GMOs.
	Topic Area: Organic farming and GMOs.

Food, Nutrition and Health	LO5: I can demonstrate the ability to accurately plan, produce and evaluate a variety of seasonally appealing healthy food items and meals.
	BLO 5.1: I can plan, produce and evaluate meals for different stages of the lifecycle: pregnant and lactating women, infants, toddlers and young children.
	Topic Area: Meal planning for different dietary requirements: pregnancy and lactating women, infants, toddlers and young children.
	BLO 5.2: I can plan, produce and evaluate meals for different stages of the lifecycle / dietary requirements: teenagers, adults, invalids and convalescents, athletes, vegetarians and vegans and senior citizens.
	Topic Area: Meal planning for different dietary requirements: teenagers, adults, invalids and convalescents, athletes, vegetarians and vegans and senior citizens.
	BLO 5.3: I can plan, produce and evaluate meals for different dietary requirements: CHD and high blood cholesterol, overweight and obesity, hypertension, constipation and diverticular disease, diabetes (type 2), dental caries, anaemia, osteoporosis, food allergies and intolerances and coeliac disease.
	Topic Area: Meal planning for different dietary requirements: CHD and high blood cholesterol, overweight and obesity, hypertension, constipation and diverticular disease, diabetes (type 2), dental caries, anaemia, osteoporosis, food allergies and intolerances, coeliac disease.
	BLO 5.4: I can explain the basic principles of different methods of cooking and evaluate their effect on the appearance, flavour, texture and nutritive value of foods.
	Topic Area: Methods of cooking.
	BLO 5.5: I can demonstrate the skill of the yeast dough.
	Topic Area: Yeast as a raising agent.

Family Wellbeing	LO 6: I can demonstrate the ability to critically, sensitively, and creatively understand and address issues related to the family, community, and the environment.
	BLO 6.1: I can analyse physical, psychological, emotional, and social issues related to the senior citizens and associate the notions of safety and accessibility.
	Topic Area: Senior citizens in society, Safety inside and outside the home.
	BLO 6.2: I can analyse issues related to persons with disabilities and disorders and suggest ways of their integration within the community.
	Topic Area: Persons with disabilities and disorders.

Financial Literacy and Consumer Education	LO 7: I can demonstrate financial capability and critically assess the social, economic and environmental factors that influence consumer behaviours.
	BLO 7.1: I can examine consumer issues and interpret marketing strategies used to promote sales.
	Topic area: Consumer awareness, Consumer rights and responsibilities, Shops and shopping practices, Marketing strategies.
	BLO 7.2: I can demonstrate financial capability, apply budgeting skills; explain banking services and different methods of payment.
	Topic area: Budgeting, Methods of savings, Banking services, Different methods of savings.

Sustainable Living and Effective Management of Resources	LO 8: I can demonstrate an understanding of sustainable living and the principles and procedures involved in acquiring, designing and using accommodation and resources according to the needs of individuals and families.
	BLO 8.1: I can describe the function, selection, safe use and care of household technological equipment.
	Topic area: Household Technology: Electric kettle, sandwich and pop-up toaster, blender, hand-held mixer, food mixer, food processor, steamer, dishwasher, microwave oven.
	BLO 8.2: I can analyse environmental issues and suggest sustainable practices in the home and community.
	Topic area: Environmental responsibilities of the consumer, The impact of consumer choices on the environment, Sustainable use of water and energy in the home.

Distribution of Learning Outcomes, Broad Learning Outcomes and Assessment

Criteria at MQF Level 1, Level 2 and Level 3 – Year 10

Following the launch of the Home Economics SEC LOF syllabus 2025 there has been a need to update the State syllabi. This syllabus for Year 10 students reflects the changes taking place in the SEC syllabus. The choice of topic areas for the Year 10 syllabus draws upon discussion and suggestions put forward by the teachers participating in the Home Economics CoPE training sessions held in November/December 2021 and January 2022.

1 st number indicates the learning outcome
2 nd number indicates the MQF level [MQF 1, MQF 2, or MQF 3]
The letter indicates the assessment criteria

LO 1 – I can demonstrate an understanding of health, wellbeing, and the principles of sustainability.

BLO 1.1 - I can discuss the factors affecting food choice.

Factors Affecting Food Choice

1.1t	Identify the factors which affect food choice. <i>Availability, skills, food trends, regional variations, personal choice, storage and cooking facilities, religious/moral belief, health, cost, lifestyle, food source, peer pressure.</i>
1.2t	Outline the factors that affect the food choices including those of specific individuals. <i>E.g. young children, elderly, athletes, vegans/vegetarians.</i>
1.3t	Discuss, with examples, how the factors affecting food choice have implications on meal planning. <i>Biological factors E.g. hunger, appetite, and taste; Economic factors E.g. cost, income, availability; Physical factors E.g. access, education, skills (e.g. cooking) and time; Social factors E.g. culture, family, peers and meal patterns; Psychological factors E.g. mood, stress and guilt, attitudes, beliefs and knowledge about food.</i>
1.3u	Give suggestions how factors affecting food choice can be managed in a given case scenario.
1.1v	Give examples of foods from different cultures. <i>E.g. China – rice and noodles, Japan – sushi, India – curry, France – baguette, Italy – pasta and pizza, Lebanon – kebabs.</i>
1.2v	Outline how food practices involving the selection, preparation and serving of food vary across different cultures. <i>E.g. the use of certain kinds of food (insects); the way food is prepared (raw seafood); dietary taboos and restrictions (beef).</i>
1.3v	Explain, with examples, how food is an important part of culture and cultural identity. <i>Maintaining traditional recipes, special foods for special days, methods of preservation, makes a nation different from others, offers something special to tourists.</i>

LO 5 - I can demonstrate the ability to accurately plan, produce and evaluate a variety of seasonally appealing healthy food items and meals.

BLO 5.1 - I can plan, produce and evaluate meals for different stages of the lifecycle: pregnant and lactating women, infants, toddlers and young children.

Meal Planning	
5.1a	Identify the following terms associated with meal planning. <i>Meal, breakfast, brunch, lunch, dinner, supper, menu, à la carte, course, appetiser, dessert, main course, accompaniment, snack.</i> <i>Sustainability, in season, local.</i>
5.2a	Explain the importance of meal planning.
5.2b	Suggest factors to be considered when planning meals. <i>Nutritional requirements, age, gender, occupation, physical activity and health of each member of the family, food preparation facilities, food affordability and availability, time and energy for the preparation and presentation of the meals, individual preferences, likes and dislikes, beliefs, allergies, variety (colour, texture, flavour, temperature, garnishes and decoration), serving dishes and cooking methods, traditions and customs, religion, the occasion, sustainability (fresh, local, in-season).</i>
5.3b	Explain the importance of these factors when planning meals: <i>Nutritional requirements, age, gender, occupation, physical activity and health of each member of the family, food preparation facilities, food affordability and availability, time and energy for the preparation and presentation of the meals, individual preferences, likes and dislikes, beliefs, allergies, variety (colour, texture, flavour, temperature, garnishes and decoration), serving dishes and cooking methods, traditions and customs, religion, the occasion, sustainability (fresh, local, in-season).</i>
5.2c	Explain the role of each food group within the healthy plate to provide a balanced meal.
5.3c	Analyse own dietary needs and plan suitable daily eating routines in line with the dietary guidelines.
BLO 5.2 – I can plan, produce, and evaluate meals for different stages of the lifecycle / dietary requirements: teenagers, adults, invalids and convalescents, athletes, vegetarians and vegans and senior citizens.	
Meal Planning for Different Dietary Requirements: Pregnant and Lactating Women	
5.1d	Identify groups of people who have different dietary needs and requirements. <i>Pregnant and lactating women.</i>
5.2d	Outline the dietary requirements of people during different stages of the lifecycle including those following special diets, highlighting important nutrients which need to be addressed.
5.3d	Discuss the management of dietary requirements of people at different stages of their lifecycle, including those following special diets, highlighting important nutrients which need to be addressed.
5.2e	Suggest guidelines to be considered in the planning and/or preparation of meals for different life stages and those following special diets.

5.1l	Identify key ingredients and/or more suitable alternatives for individuals at different stages of the lifecycle and those following special diets. <i>Pregnant and lactating women.</i>
5.2l	Recommend foods to avoid during particular life-stages. <i>Pregnancy and lactation.</i>
5.3l	Evaluate the suitability of a variety of food and/or drink items and/or meals for individuals at different life stages with special nutritional requirements and for different occasions. <i>Pregnant and lactating women.</i>
5.2bi	Prepare meals for the following groups of people and dietary needs: <i>Pregnant and lactating women.</i>
5.3bi	Justify decisions made in the choice and preparation of meals for different groups and dietary needs.
<i>Meal Planning for Different Dietary Requirements: Infants, Toddlers and Young Children</i>	
5.1d	Identify groups of people who have different dietary needs and requirements. <i>Infants, toddlers and young children.</i>
5.2d	Outline the dietary requirements of people during different stages of the lifecycle including those following special diets, highlighting important nutrients which need to be addressed.
5.3d	Discuss the management of dietary requirements of people at different stages of their lifecycle, including those following special diets, highlighting important nutrients which need to be addressed.
5.2e	Suggest guidelines to be considered in the planning and/or preparation of meals for different life stages and those following special diets.
5.1f	List basic tips to encourage young children to develop healthy habits for life. <i>Note: Tips should be in line with National Dietary Guidelines for Children.</i>
5.2f	Outline guidelines for developing positive eating habits in toddlers/young children including making mealtimes enjoyable.
5.1l	Identify key ingredients and/or more suitable alternatives for individuals at different stages of the lifecycle and those following special diets. <i>Toddlers and young children.</i>
5.2l	Recommend foods to avoid during particular life stages. <i>Infancy, toddlers and young children.</i>
5.3l	Evaluate the suitability of a variety of food and/or drink items and/or meals for individuals at different life stages with special nutritional requirements and for different occasions. <i>Toddlers and young children.</i>
5.2bi	Prepare meals for the following groups of people and dietary needs: <i>Toddlers and young children.</i>

5.3bi	Justify decisions made in the choice and preparation of meals for different groups and dietary needs.
<i>Meal Planning for Different Dietary Requirements: Teenagers, Adults, Invalids and Convalescents, Athletes, Packed Lunches</i>	
5.1d	Identify groups of people who have different dietary needs and requirements. <i>Teenagers, adults.</i> <i>Invalids and convalescents, athletes.</i>
5.2d	Outline the dietary requirements of people during different stages of the lifecycle including those following special diets, highlighting important nutrients which need to be addressed.
5.3d	Discuss the management of dietary requirements of people at different stages of their lifecycle, including those following special diets, highlighting important nutrients which need to be addressed.
5.2e	Suggest guidelines to be considered in the planning and/or preparation of meals for different life stages and those following special diets.
5.2bi	Prepare meals for the following groups of people and dietary needs: <i>Invalids and convalescents, athletes, people (E.g. students or workers) requiring packed lunches.</i>
5.3bi	Justify decisions made in the choice and preparation of meals for different groups and dietary needs.
<i>Meal Planning for Different Dietary Requirements: Vegetarians and Vegans</i>	
5.1d	Identify groups of people who have different dietary needs and requirements. <i>Vegans and vegetarians.</i>
5.2d	Outline the dietary requirements of people during different stages of the lifecycle including those following special diets, highlighting important nutrients which need to be addressed.
5.3d	Discuss the management of dietary requirements of people at different stages of their lifecycle, including those following special diets, highlighting important nutrients which need to be addressed.
5.2e	Suggest guidelines to be considered in the planning and/or preparation of meals for different life stages and those following special diets.
5.1g	Identify the terms vegetarian and/or vegan.
5.2g	List the different types of vegetarians: <i>Lacto-vegetarian, lacto-ovo vegetarian, pesco-vegetarian, ovo-vegetarian, fruitarian, vegan.</i>
5.3g	Explain the different types of vegetarians: <i>Lacto-vegetarian, lacto-ovo vegetarian and pesco-vegetarian, ovo-vegetarian, fruitarian, vegan.</i>
5.3h	Discuss the reasons why people follow a vegetarian and/or vegan diet. <i>Personal, religion, health, environment, social, economic.</i>

5.1l	Identify key ingredients and/or more suitable alternatives for individuals at different stages of the lifecycle and those following special diets. <i>Vegetarian, vegan.</i>
5.3l	Evaluate the suitability of a variety of food and/or drink items and/or meals for individuals at different life stages with special nutritional requirements and for different occasions. <i>Vegetarian, vegan.</i>
5.2bi	Prepare meals for the following groups of people and dietary needs: <i>Vegetarian, vegan.</i>
5.3bi	Justify decisions made in the choice and preparation of meals for different groups and dietary needs.
<i>Meal Planning for Different Dietary Requirements: Senior Citizens</i>	
5.1d	Identify groups of people who have different dietary needs and requirements. <i>Senior citizens.</i>
5.2d	Outline the dietary requirements of people during different stages of the lifecycle including those following special diets, highlighting important nutrients which need to be addressed.
5.3d	Discuss the management of dietary requirements of people at different stages of their lifecycle, including those following special diets, highlighting important nutrients which need to be addressed.
5.2e	Suggest guidelines to be considered in the planning and/or preparation of meals for different life stages and those following special diets.
5.1l	Identify key ingredients and/or more suitable alternatives for individuals at different stages of the lifecycle and those following special diets. <i>Senior citizens.</i>
5.3l	Evaluate the suitability of a variety of food and/or drink items and/or meals for individuals at different life stages with special nutritional requirements and for different occasions. <i>Senior citizens.</i>
5.2bi	Prepare meals for the following groups of people and dietary needs: <i>Senior citizens.</i>
5.3bi	Justify decisions made in the choice and preparation of meals for different groups and dietary needs.
BLO 5.1 - I can plan, produce and evaluate meals for different dietary requirements: CHD and high blood cholesterol, overweight and obesity, hypertension, constipation and diverticular disease, diabetes (type 2), dental caries, anaemia, osteoporosis, food allergies and intolerances and coeliac disease.	
<i>Meal Planning for Different Dietary Requirements: CHD and high blood cholesterol, overweight and obesity, hypertension</i>	

5.2e	Suggest guidelines to be considered in the planning and/or preparation of meals for different life stages and those following special diets.
5.1j	Identify the following diet-related disorders. <i>CHD, hypertension, high blood cholesterol, overweight and obesity.</i>
5.2j	Describe diet-related disorders. <i>CHD, hypertension, high blood cholesterol, overweight and obesity.</i>
5.3j	Outline risk factors and/or symptoms of diet-related disorders.
5.2k	Recommend lifestyle measures (dietary and non- dietary) to prevent diet-related disorders.
5.1l	Identify key ingredients and/or more suitable alternatives for individuals at different stages of the lifecycle and those following special diets. <i>Low-calorie, low fat, low cholesterol, low sugar, low salt, high fibre.</i>
5.3l	Evaluate the suitability of a variety of food and/or drink items and/or meals for individuals at different life stages with special nutritional requirements and for different occasions. <i>Low calorie, low fat, low cholesterol, low sugar, low salt, high fibre.</i>
5.2bi	Prepare meals for the following groups of people and dietary needs: <i>Low fat, low cholesterol, low sugar, low salt, high fibre.</i>
5.3bi	Justify decisions made in the choice and preparation of meals for different groups and dietary needs.
<i>Meal Planning for Different Dietary Requirements: Constipation and diverticular disease, diabetes (type 2), dental caries</i>	
5.2e	Suggest guidelines to be considered in the planning and/or preparation of meals for different life stages and those following special diets.
5.1j	Identify the following diet-related disorders. <i>Constipation and diverticular disease, diabetes (Type 2), dental caries.</i>
5.2j	Describe diet-related disorders. <i>Constipation and diverticular disease, diabetes (Type 2), dental caries.</i>
5.3j	Outline risk factors and/or symptoms of diet-related disorders.
5.2k	Recommend lifestyle measures (dietary and non- dietary) to prevent diet-related disorders.
5.1l	Identify key ingredients and/or more suitable alternatives for individuals at different stages of the lifecycle and those following special diets. <i>Low sugar, high fibre.</i>
5.3l	Evaluate the suitability of a variety of food and/or drink items and/or meals for individuals at different life stages with special nutritional requirements and for different occasions. <i>Low sugar, high fibre.</i>
5.2bi	Prepare meals for the following groups of people and dietary needs: <i>Low sugar, high fibre.</i>

5.3bi	Justify decisions made in the choice and preparation of meals for different groups and dietary needs.
<i>Meal Planning for Different Dietary Requirements: Anaemia, osteoporosis, food allergies and intolerances, coeliac disease</i>	
5.1d	Identify groups of people who have different dietary needs and requirements. <i>Food allergies and intolerances, coeliac.</i>
5.2d	Outline the dietary requirements of people during different stages of the lifecycle including those following special diets, highlighting important nutrients which need to be addressed.
5.3d	Discuss the management of dietary requirements of people at different stages of their lifecycle, including those following special diets, highlighting important nutrients which need to be addressed.
5.2e	Suggest guidelines to be considered in the planning and/or preparation of meals for different life stages and those following special diets.
5.1i	List the major food allergens. <i>Milk, eggs, fish, shellfish, tree nuts, peanuts, wheat, soya beans.</i>
5.2i	Identify allergenic ingredients that must be indicated in lists of ingredients. <i>Celery, gluten, crustaceans, eggs, fish, lupin, milk, molluscs, mustard, nuts, peanuts, sesame seeds, soya and sulphur dioxide.</i>
5.3i	Distinguish between food allergies and intolerances, outlining their signs and symptoms.
5.1j	Identify the following diet-related disorders. <i>Anaemia, osteoporosis.</i>
5.2j	Describe diet-related disorders. <i>Anaemia, osteoporosis.</i>
5.3j	Outline risk factors and/or symptoms of diet-related disorders.
5.2k	Recommend lifestyle measures (dietary and non- dietary) to prevent diet-related disorders.
5.1l	Identify key ingredients and/or more suitable alternatives for individuals at different stages of the lifecycle and those following special diets. <i>High calcium, high iron, gluten-free, lactose-free.</i>
5.3l	Evaluate the suitability of a variety of food and/or drink items and/or meals for individuals at different life stages with special nutritional requirements and for different occasions. <i>Lactose intolerant, coeliac, anaemic, osteoporosis sufferers.</i> <i>High calcium, high iron, gluten-free, lactose-free.</i>
5.2bi	Prepare meals for the following groups of people and dietary needs: <i>Lactose intolerant individuals, coeliacs.</i> <i>High calcium, high iron, gluten-free, lactose-free.</i>

5.3bi	Justify decisions made in the choice and preparation of meals for different groups and dietary needs.
LO 2 - I can demonstrate a comprehensive understanding of the role of macro and micro nutrients in the diet, their digestion and effects on health.	
	
BLO 2.1 - I can explain the process of digestion.	
The Process of Digestion	
2.1at	Identify the different parts of the digestive tract on a given diagram. <i>Mouth, tongue and salivary glands, oesophagus, stomach, liver, gallbladder, pancreas, small intestine, large intestine, anus.</i>
2.2at	Label the digestive tract.
2.3at	Explain the main processes of digestion occurring at each stage - <i>mouth, oesophagus, stomach, small intestine and large intestine.</i>
2.1au	Identify chewing as the mechanical process involved in the breaking down of food in the mouth.
2.3au	Differentiate between mechanical and chemical breakdown of food.
2.3av	Explain the following terms related to digestion. <i>Bolus, peristalsis, gastric juices.</i>
2.2aw	Outline the main function of enzymes in the digestive process.
2.3aw	Describe the role of salivary amylase, hydrochloric acid and lactase in the chemical breakdown of food.
2.2ax	Describe the role of villi in the digestive process.
2.3ax	Explain that digestion is completed in the small intestine by the absorption of nutrients into the bloodstream; the undigested food passes to the large intestine where it absorbs water and is eliminated.
BLO 5.4 - I can explain the basic principles of different methods of cooking and evaluate their effect on the appearance, flavour, texture and nutritive value of foods.	
Methods of Cooking	
5.1p	Identify reasons why we cook food.
5.2p	Explain why we cook food.
5.1q	Identify different cooking methods. <i>Grilling, poaching, steaming, baking, roasting, stewing, microwave cooking, slow cooking, stir-frying and boiling.</i>
5.2q	Describe different cooking methods.
5.2r	Suggest examples of moist and dry methods of cooking.
5.3r	Explain the difference between moist and dry methods of cooking.
5.1s	Give examples of equipment necessary for each method of cooking.
5.2s	List the different methods of heat transfer. <i>Conduction, convection and radiation.</i>

5.3s	Explain the difference between conduction, convection and radiation as methods of heat transfer.
5.1t	Identify advantages and disadvantages of different methods of cooking food. • <i>moist heat methods - boiling, steaming, poaching, stewing;</i> • <i>dry heat methods - baking, grilling, roasting;</i> • <i>stir-frying;</i> • <i>slow cooking;</i> • <i>microwave cooking.</i>
5.2t	Outline the advantages and disadvantages of the different methods of cooking food.
5.1u	Identify the healthy and less healthy cooking methods.
5.2u	Suggest suitable foods that can be used for each method of cooking.
5.3u	Discuss suitability of methods of cooking for different case scenarios with reference to time, use of fuel, changes in energy values, nutrient loss and digestibility.
5.2v	List guidelines to follow when using different methods of cooking.
5.1w	Identify meals using one or more of the following cooking methods: <i>Grilling, poaching, boiling, steaming, stewing, baking, roasting, stir-frying, slow cooking, microwave cooking.</i>
5.2w	Suggest meals using one or more of the following cooking methods: <i>Grilling, poaching, boiling, steaming, stewing, baking, roasting, stir-frying, slow cooking, microwave cooking.</i>
5.3w	Plan meals for individuals at different stages of the lifecycle, for individuals with special nutritional requirements and for different occasions, which involve different cooking methods. <i>Pregnant and lactating women, toddlers and young children, invalids and convalescents, athletes, senior citizens.</i> <i>Low fat, low cholesterol, low sugar, low salt, high fibre, high calcium, high iron, vegetarian, vegan, gluten-free, lactose-free.</i> <i>Grilling, poaching, boiling, steaming, stewing, baking, roasting, stir-frying, slow cooking, microwave cooking.</i>
LO 3 - I can demonstrate an understanding of different types of food commodities.	
	
BLO 3.1 - I can relate food commodities to their characteristics, sources, nutritional value, versatility, uses and storage.	
<i>Food Commodity: Meat</i>	
3.1a	Name food commodities or groups. <i>Meat.</i>

3.2a	Give examples of different types of foods for each food commodity or group available on the market. <i>Meat.</i>
3.3a	Outline the nutritional value of the main food commodities or groups and the main foods within each of these. <i>Meat.</i>
3.2b	Describe different uses and storage for the different food commodities.
3.3b	Discuss the versatility of different food commodities.
3.2c	Demonstrate the use of different food commodities in cooking.
3.1d	Identify recipes that use a given food commodity as a main ingredient.
3.2d	Recommend recipes which are in line with the national dietary guidelines that use the given food commodity as a main ingredient.
3.3d	Justify the use of different food commodities in the planning of meals.
3.2e	Recommend suitable methods of cooking for each of the food commodities.
3.3f	Explain the effect of dry and/or moist heat and changes during cooking for the different food commodities. <i>Coagulation, denaturation, dextrinisation, gelatinisation.</i>
3.2g	Suggest points to keep in mind when choosing, buying, storing, preserving, and cooking different food commodities.
3.1r	Identify different types of meat. <i>Carcass (beef, veal, lamb, mutton, pork), poultry (chicken, turkey, duck, quail), game (rabbit, deer, venison) and offal (liver, kidney, tongue and tripe).</i>
3.2r	Give examples of different cuts of meat.
3.3r	Discuss the nutritional value of different cuts and/or parts of meat. <i>E.g. pork fillet vs belly, chicken breast vs thigh, offal.</i>
3.2s	Give examples of tough and tender cuts of meat. <i>Tough cuts e.g. shank, brisket, flank.</i> <i>Tender cuts e.g. loin, rib, sirloin.</i>
3.1t	Identify different cooking methods suitable for different cuts of meat.
3.2t	List different cooking methods suitable for different cuts of meat.
3.3t	Describe the structure and composition of meat.
Food Commodity: Fruit and Vegetables	
3.1a	Name food commodities or groups. <i>Vegetables, fruit.</i>
3.2a	Give examples of different types of foods for each food commodity or group available on the market. <i>Fruit, vegetables.</i> <i>Emphasise seasonality E.g. Winter/spring vegetables and fruits: broad beans, globe artichokes, peas, oranges, tangerines and melons. Summer/autumn</i>

	<i>vegetables and fruits: olives, long squash, peaches, plums, watermelons and melons.</i>
3.3a	Outline the nutritional value of the main food commodities or groups and the main foods within each of these. <i>Vegetables, fruit.</i>
3.2b	Describe different uses and storage for the different food commodities.
3.2c	Demonstrate the use of different food commodities in cooking.
3.3b	Discuss the versatility of different food commodities.
3.3c	Compare the versatility of different food commodities
3.1d	Identify recipes that use a given food commodity as a main ingredient.
3.2d	Recommend recipes which are in line with the national dietary guidelines that use the given food commodity as a main ingredient.
3.3d	Justify the use of different food commodities in the planning of meals.
3.2e	Recommend suitable methods of cooking for each of the food commodities.
3.2g	Suggest points to keep in mind when choosing, buying, storing, preserving and cooking different food commodities.
3.1y	Identify groups of different fresh and/or dried fruit and vegetables. <i>Green (leaves, flowers, stems, and fruit), root (root, bulbs, and tubers), legumes (pods and seeds) and fungi.</i> <i>Citrus, stone, soft/berry, hard, tropical and dried.</i>
3.2y	Classify fresh and dried vegetables and/or fruit. <i>Green (leaves, flowers, stems, and fruit), root (root, bulbs, and tubers), legumes (pods and seeds) and fungi.</i> <i>Citrus, stone, soft/berry, hard, tropical, and dried.</i>
LO 4 - I can demonstrate a broad understanding of food production, processing, preservation and labelling.	
	
BLO 4.1 - I can review the role of organic farming & GMOs.	
<i>Organic Farming and GMOs</i>	
4.1ag	Define organic farming.
4.2ag	Explain the advantages and disadvantages of organic farming for farmers, consumers, and the local community.
4.2ah	Describe how organic farming differs from conventional methods of farming. <i>Crop rotation, intercropping, composting, free-range hen rearing.</i>
4.3ah	Compare and contrast organic and conventional produce with reference to appearance, flavour, cost, production, shelf-life and impact on the environment.
4.2ai	Explain the term genetically modified organisms (GMOs) with examples.
4.2aj	Outline the purpose of using GMOs in foods.

4.3aj	Discuss the advantages and disadvantages of GMOs.
4.2ak	List health and environmental risks often discussed in relation to GMO's.
BLO 5.5 - I can demonstrate my time and task management skills to efficiently demonstrate the skill of the yeast dough.	
<i>Yeast as a Raising Agent (Theory)</i>	
5.1ao	Identify mechanical, biological, and chemical raising agents. <i>E.g. whisking to introduce air, sieving to introduce air (mechanical); yeast (biological); baking powder, bicarbonate of soda (chemical).</i>
5.2ao	Explain how air is typically introduced into the cake mixture and/or dough to act as a raising agent.
5.3ao	Distinguish between mechanical, biological, and chemical raising agents, giving examples of each.
5.1ap	Identify different raising agents. <i>Baking powder, baking soda, yeast and air/steam.</i>
5.2ap	Describe the function of raising agents in cake making and yeast cookery.
5.3ap	Explain how each raising agent works. <i>Baking powder, baking soda, yeast and air/steam.</i>
5.1aq	Identify the ingredients needed to make a yeast dough.
5.2aq	List the ingredients, including quantities, needed to make a yeast dough.
5.3aq	Describe the conditions yeast needs to activate and grow.
5.1ar	Identify the following terms associated with the process of making a yeast dough: <i>Proofing, rising.</i>
5.2ar	Describe the function of the different ingredients used in making a yeast dough.
5.2as	Outline basic rules to observe when using raising agents for a successful outcome. <i>Note: measuring, mixing, cooking conditions (e.g. temperature).</i>
5.1at	Identify the steps involved in the process of making a yeast dough. <i>Short method (one proofing time).</i>
5.2at	Outline the steps involved in making a yeast dough. <i>Short method (one proofing time).</i>
5.3at	Explain the process of fermentation and proofing of yeast dough, highlighting the link between them.
5.2au	Perform the steps involved in the process of making a yeast dough.
5.3au	Explain why a basic step/s involved in the process of making a yeast dough is/are performed.
5.2av	Outline the main rules to follow when making a yeast dough.
5.3av	Suggest possible faults that may occur in the process of making a yeast dough, indicating causes and/or ways how these can be prevented.

5.2aw	Suggest sweet and savoury dishes that could be prepared using a yeast dough.
Yeast as a Raising Agent (Demonstration + Preparation for Practical)	
5.1aq	Identify the ingredients needed to make a yeast dough.
5.2aq	List the ingredients, including quantities, needed to make a yeast dough.
5.3aq	Describe the conditions yeast needs to activate and grow.
5.1ar	Identify the following terms associated with the process of making a yeast dough: <i>Proofing, rising.</i>
5.2ar	Describe the function of the different ingredients used in making a yeast dough.
5.2au	Perform the steps involved in the process of making a yeast dough.
5.3au	Explain why a basic step/s involved in the process of making a yeast dough is/are performed.
5.1be	Identify the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, lining of tins, liquidising, blending of mixtures.</i>
5.2be	Carry out the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, lining of tins, liquidising, blending of mixtures.</i>
LO 6 - I can demonstrate the ability to critically, sensitively and creatively understand and address issues related to the family, community and the environment.	
	
BLO 6.1 - I can analyse physical, psychological, emotional and social issues related to the senior citizens and associate the notions of safety and accessibility.	
Senior Citizens in Society	
6.1y	Define the term senior citizens.
6.2y	Outline physical, social, emotional and intellectual needs of senior citizens.
6.1z	List services available for senior citizens to promote their wellbeing: <i>Diet and health: community dietitian/ nutritionist; meals on wheels; Active aging: Day care centres, free/subsidised physical activity, lifelong learning through Local Councils, cultural outings; Home care and security: telecare service, home help, home maintenance, home improvement – security bars, stairlift.</i>
6.2z	Describe the benefits of services available for senior citizens.
6.3z	Explain how different services available for senior citizens meet their needs. <i>E.g. meals on wheels services for nutrition [physical need]; activities organised at day centres for stimulation [intellectual need].</i>

6.3aa	Outline possible barriers that could prevent elderly citizens from gaining access to services available. <i>Physical barriers such as stairs; psychological barriers such as fear of losing independence; financial barriers such as charges and fees; geographical barriers such as lack of public transport; technological barriers such as not knowing how to use internet/digital technology.</i>
6.1ab	Identify different gadgets available to help senior citizens lead a more independent life. <i>E.g. grab bars, grip aids, voice command appliances, talking watches.</i>
6.2ab	Describe how a home could be adapted according to the changing needs of a senior citizen.
6.3ab	Select appropriate home aids and adaptations for different case scenarios. <i>E.g. home adaptations for a senior citizen with mobility problems.</i>
6.1ac	Name different living arrangements/housing options available for senior citizens.
6.2ac	Outline the advantages and disadvantages of senior citizens living independently, with their family and/or in a residential home.
6.3ac	Evaluate the benefits of residential homes vs independent living for senior citizens with different physical, social, emotional, intellectual needs and financial situations.
6.3ad	Discuss the link between lifestyle and wellbeing of senior citizens. <i>E.g. caring for grandchildren and intergenerational communication; volunteering and inclusivity; being physically active and maintaining mobility or sleeping more soundly.</i>
<i>Safety inside and outside the Home</i>	
6.1ae	List possible accidents inside and outside the home, and ways how to avoid them, with emphasis on the kitchen, bathroom, playing fields and on the road.
6.2ae	Describe possible accidents and safety precautions that could be taken to avoid accidents inside and outside the home, with emphasis on the kitchen, bathroom, playing fields and on the road.
6.3ae	Evaluate potential safety hazards and how to avoid them in different case scenarios.
6.1af	State that children and senior citizens are most prone to accidents inside and outside the home.
6.2af	Explain why children and senior citizens are most prone to accidents inside and outside the home.
6.2ak	Outline ways of making a home safe from accidents, doorstep mugging and burglaries.
BLO 6.2 - I can analyse issues related to persons with disabilities and disorders and suggest ways of their integration within the community	

Persons with Disabilities and Disorders	
6.1t	Identify different types of disabilities and disorders. <i>Physical and intellectual disability, sensory impairment, mental disorder.</i>
6.2t	Categorise different types of disabilities and disorders according to the type. <i>Physical and intellectual disability: Down's syndrome, autism, cerebral palsy.</i> <i>Sensory impairment: visual impairment, deafness.</i> <i>Mental disorder: chronic anxiety, depression, eating disorder.</i>
6.3t	Explain the challenges faced by persons with a disability and/or disorder and their families whilst indicating respective strategies to address them.
6.2u	Outline ways how persons with a disability can be integrated within the community. <i>E.g. home, school, workplace, leisure.</i>
6.3u	Discuss how a given barrier or barriers to participation experienced by persons with a disability can be overcome. <i>Attitudinal (E.g. stereotyping, stigma, discrimination);</i> <i>Communication (E.g. no captions or sign language in videos for people with auditory impairments, use of technical/complex language in print is a barrier to people with cognitive impairments/learning disabilities);</i> <i>Physical (lack of ramps, absence of lift),</i> <i>Social (higher unemployment rates, lower salaries).</i>
LO 8 - I can demonstrate an understanding of sustainable living and the principles and procedures involved in acquiring, designing and using accommodation and resources according to the needs of individuals and families.	
	
BLO 8.1 - I can describe the function, selection, safe use and care of household technological equipment.	
Household Technology: Electric kettle, sandwich and pop-up toaster, blender, hand-held mixer, food mixer, food processor, steamer, microwave oven, dishwasher	
8.1m	List various household and/or kitchen equipment and appliances/labour saving devices. <i>Electric kettle, sandwich and pop-up toaster, blender, hand-held mixer, food mixer, food processor, steamer, microwave oven, dishwasher.</i>
8.2m	Describe the key function/s and main parts and/or features of household and/or kitchen equipment and appliances/labour saving devices. <i>Blender, hand-held mixer, food mixer, food processor, microwave oven.</i>
8.3m	Compare and contrast a selection of different household and/or kitchen equipment and appliances/labour saving devices based on versatility, efficiency, sustainability and safe use. <i>Food mixers vs food processors.</i>

8.1n	Identify the factors which need to be considered when purchasing household and/or kitchen equipment and appliances. <i>E.g. space available, family needs, family lifestyle, family budget, sustainability, type of décor.</i>
8.2n	State the factors which need to be considered when purchasing household and/or kitchen equipment and appliances. <i>E.g. space available, family needs, family lifestyle, family budget, sustainability, type of décor.</i>
8.3n	Evaluate the need for household and/or kitchen equipment and appliances for given scenarios.
BLO 8.2 - I can analyse environmental issues and suggest sustainable practices in the home and community.	
<i>Environmental responsibilities of the consumer</i>	
8.1j	Define 'green home'.
8.1y	Define the term natural environment.
8.2y	Explain the importance of conserving the natural environment.
8.1z	Identify the main environmental problems. <i>Global warming, pollution, depletion of natural resources.</i>
8.2z	Describe the main environmental problems.
8.3z	Suggest actions that can be taken to address environmental problems.
8.1aj	Identify environmentally-friendly symbols. <i>Green dot, Mobius Loop, European eco-label, Carbon footprint label, Forest Stewardship Council (FSC), Not tested on animals.</i>
8.2aj	Explain the following environmentally-friendly symbols: <i>Green dot, Mobius Loop, European eco-label, Carbon footprint label, Forest Stewardship Council (FSC), Not tested on animals.</i>
<i>The Impact of Consumer Choices on the Environment</i>	
8.1ab	List the different types of waste. <i>Organic, inorganic, liquid, solid, bulky and hazardous waste.</i>
8.2ab	Describe the different types of waste. <i>Organic, inorganic, liquid, solid, bulky and hazardous waste.</i>
8.2ac	Describe the separation and/or disposal of waste at source with examples.
8.3ac	Discuss the benefits of separation and/or disposal of waste at source with examples.
8.1ad	Identify waste management practices carried out locally. <i>Including: Bring-in Sites, Civic Amenity Sites, Engineered Landfills, Waste Treatment Plants, Incinerator.</i>
8.2ad	Describe waste management practices carried out locally. <i>Including: Bring-in Sites, Civic Amenity Sites, Engineered Landfills, Waste Treatment Plants, Incinerator.</i>

8.2ae	Describe ways of how to minimize the amount of waste created in the home by referring to the 5Rs. <i>Return, refill, reuse, reduce and recycle.</i>
8.3ae	Explain why recycling of waste is beneficial to the environment.
8.1af	Name bi-products of waste. <i>Compost and biodiesel.</i>
8.1ag	Identify the negative impacts of waste on health and on the natural and physical environments.
8.2ag	State the negative impacts of waste on health and/or on the natural and physical environments.
8.3ag	Describe the negative impacts of waste on health and/or on the natural and physical environments.
8.2ah	List harmful household chemicals and natural chemicals with which they can be substituted. <i>E.g. bleach, ammonia, cleaning sprays substituted by vinegar, bicarbonate of soda, lemon.</i>
8.3ah	Explain the harm that some household chemicals and others used in appliances have had on the ozone and seawater.
Sustainable use of water and energy in the home	
8.1aa	Identify examples of renewable and non-renewable sources of energy.
8.2aa	Describe, with examples, renewable and non-renewable sources of energy.
8.3aa	Justify the use of renewable sources of energy in a given scenario. <i>E.g. solar panels, solar water heating.</i>
8.1ai	Give examples of saving energy and water in the home.
8.2ai	Explain the importance of saving energy and water in the home.
LO 7 - I can demonstrate financial capability and critically assess the social, economic and environmental factors that influence consumer behaviours.	
	
BLO 7.1 - I can examine consumer issues and interpret marketing strategies used to promote sales.	
Consumer Awareness	
7.1h	Define the term consumer.
7.2h	Distinguish between goods and services as used by the consumer.
7.3h	Devise guidelines for wise purchase of basic consumer goods and services.
7.2i	Explain the importance of being an informed consumer.
7.3j	Suggest measures families on a low income can adopt to make sustainable consumer choices within their budget.
7.1o	Define the terms planned and impulse purchases.
7.2o	Describe the potential negative outcomes of impulse purchases.

7.3o	Recommend ways to avoid impulse purchases.
Consumer Rights and Responsibilities	
7.1k	Identify the basic rights and responsibilities of consumers.
7.2k	Describe the basic rights and responsibilities of consumers.
7.3k	Discuss the rights and responsibilities of consumers as applied to different case-scenarios.
7.1l	Identify the services available for consumer protection. <i>The Complaints and Conciliation Directorate within the MCCA, European Consumer Centre.</i>
7.2l	Outline the course of action when seeking redress.
BLO	
Shops and Shopping Practices	
7.1p	Identify the advantages of using a shopping list.
7.2p	Outline rules for wise shopping keeping in mind value for money, health, hygiene, efficiency and sustainability. <i>E.g. using a shopping list, buying in bulk, shopping local, checking reviews, comparison shopping, taking advantage of special offers and loyalty schemes, reading nutrition and sustainability labels, avoiding excessive packaging, planning shopping routes to save fuel and time.</i>
7.3p	Evaluate responsible consumer behaviour in a given situation.
7.1q	List the different types of shopping options and outlets. <i>Options: In-person, online, teleshopping;</i> <i>Outlets: supermarket, discount store, specialist shop, corner shop, open air market.</i>
7.2q	Outline the advantages and disadvantages of different types of shopping options and outlets. <i>Options: In-person, online, teleshopping;</i> <i>Outlets: supermarket, discount store, specialist shop, corner shop, open air market.</i>
7.3q	Justify appropriate shopping options and practices based on a given situation. <i>E.g. a single parent with young children, a person with mobility difficulties.</i>
7.3r	Compare products in terms of quality, quantity and price to make the best purchase.
Marketing Strategies used to Promote Sales	
7.1m	Identify different forms of advertising. <i>E.g. print advertising, broadcast advertising, digital advertising (including via mobile phones and social media).</i>
7.2m	List different forms of advertising.

	<i>E.g. print advertising, broadcast advertising, digital advertising (including via mobile phones and social media), product placements, in-store promotions, outdoor promotion.</i>
7.3m	Discuss advantages and disadvantages of different forms of advertising in a given situation.
7.2n	State the advantages and disadvantages of advertising for the producer and for the consumer.
7.3n	Discuss the marketing strategies used in advertising and in supermarkets to influence consumer choice.
BLO 7.2 - I can demonstrate financial capability, apply budgeting skills; explain banking services and different methods of payment.	
Budgeting	
7.1a	State the difference between basic needs and wants.
7.2a	Describe the factors which may influence an individual's consumption decisions based on needs and wants. <i>Personal, social, economic, environmental, psychological.</i>
7.1b	State the difference between personal and family budget.
7.2b	Explain the advantages of short-term and long-term budgeting for better spending and saving.
7.1c	Define the term gross and/or net income.
7.2c	Distinguish between gross and net income.
7.1d	List sources of income and expenditure.
7.2d	Fill-in a personal and/or a family budget template.
7.3d	Draw up a personal and/or family budget using appropriate tools. <i>E.g. online calculators/apps/spreadsheets.</i>
Methods of Saving	
7.1e	List methods of savings. <i>E.g. bank accounts, investments [shares, bonds, stocks, property]</i>
7.2e	Describe the different bank accounts and/or types of investment. <i>Current, saving, fixed term deposit.</i>
7.3e	Compare and contrast the different bank accounts and/or types of investments. <i>Current, saving, fixed term deposit, bonds, stocks, shares.</i>
7.3f	Justify appropriate method/s of savings and/or investments for a given situation.
Banking Services	
7.1g	Name different banking services. <i>ATM, online banking, mobile banking, standing orders, loans.</i>
7.2g	Describe the services available through an ATM and/or online and mobile banking.

7.3g	Discuss the advantages and disadvantages of using an ATM and/or online and mobile banking.
Different Methods of Payment	
7.1s	List different methods of payment. <i>Cash, cheque, prepaid cards, debit cards, credit cards, bank transfers, online payment, mobile payment.</i>
7.2s	Describe different features of different methods of payment. <i>E.g. debit cards - contactless</i>
7.3s	Discuss the advantages and disadvantages of different methods of payment.
7.1t	Select ways to ensure secure payments and avoid theft.
7.2t	Suggest negative consequences of insecure payments.
7.3t	Recommend precautions to take to ensure secure payments and avoid monetary and identity theft.
Revision of Preparation Sheet	
5.1ax	Sequence the key steps involved in the preparation, production and evaluation of a practical session. <i>Choosing dishes, stating reasons for choice, listing equipment and utensils needed, indicating the order of work, producing the dishes, evaluating the dishes produced and one's performance during the session.</i>
5.2ax	Outline the steps involved in the preparation, production, evaluation of a practical session. <i>Note: Choosing dishes according to assignment set; explaining reasons for choice made; listing of equipment and utensils required; planning the order of work; preparing oneself and all food, equipment and utensils to start working; producing the food; presenting the food; evaluating the food and one's performance during the session.</i>
5.2ay	Choose dishes that meet the requirements according to the assignment given whilst adhering to National Dietary Guidelines with some use of fresh, seasonal and local food.
5.1az	Identify ingredients and quantities required for a given recipe.
5.2az	Calculate the required quantity of ingredients for a given assignment.
5.2ba	Suggest reasons for choice with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of dish, variety of colour, texture and flavour, skills involved.</i>
5.3ba	Justify reasons for choices made with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of dish, variety of colour, texture and flavour, skills involved, serving temperature, modifications carried out, traditional value (if applicable) and equipment used.</i>
5.1bb	Select the utensils needed to prepare a particular recipe.

5.2bb	List the utensils needed to prepare a particular recipe.
5.1bc	Sequence the steps involved in the order of work for practical food assignments.
5.2bc	Outline a logical sequenced order of work for a given assignment.
5.3bc	Develop a Preparation Sheet for a given practical assignment detailing organisation of work and allocation of time for each step.
5.2bo	Evaluate the finished food product in terms of appropriate outcome. <i>Appearance, colour, texture, garnish and decoration, serving temperature, serving dishes and cutlery, and overall presentation.</i>
5.3bo	Analyse the creative element in the final product and/or presentation.
5.2bp	Recommend improvements to the overall performance reflecting on the process and outcome.
5.3bp	Recommend improvements to the overall performance reflecting on the process, outcome, efficiency, cost and sustainability.
Different Dietary Requirements Practical Assignments	
5.1ax	Sequence the key steps involved in the preparation, production and evaluation of a practical session. <i>Choosing dishes, stating reasons for choice, listing equipment and utensils needed, indicating the order of work, producing the dishes, evaluating the dishes produced and one's performance during the session.</i>
5.2ax	Outline the steps involved in the preparation, production, evaluation of a practical session. <i>Note: Choosing dishes according to assignment set; explaining reasons for choice made; listing of equipment and utensils required; planning the order of work; preparing oneself and all food, equipment and utensils to start working; producing the food; presenting the food; evaluating the food and one's performance during the session.</i>
5.2ay	Choose dishes that meet the requirements according to the assignment given whilst adhering to National Dietary Guidelines with some use of fresh, seasonal and local food.
5.1az	Identify ingredients and quantities required for a given recipe.
5.2az	Calculate the required quantity of ingredients for a given assignment.
5.2ba	Suggest reasons for choice with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of dish, variety of colour, texture and flavour, skills involved.</i>
5.3ba	Justify reasons for choices made with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of dish, variety of colour, texture and flavour, skills involved, serving temperature, modifications carried out, traditional value (if applicable) and equipment used.</i>

5.1bb	Select the utensils needed to prepare a particular recipe.
5.2bb	List the utensils needed to prepare a particular recipe.
5.1bc	Sequence the steps involved in the order of work for practical food assignments.
5.2bc	Outline a logical sequenced order of work for a given assignment.
5.3bc	Develop a Preparation Sheet for a given practical assignment detailing organisation of work and allocation of time for each step.
5.1bd	Choose the appropriate equipment to weigh and measure a given list of ingredients.
5.2bd	Weigh and measure solid and liquid ingredients accurately using a range of different utensils such as weighing scales, measuring cups, measuring spoons and jugs.
5.1be	Identify the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, lining of tins, liquidizing, blending of mixtures.</i>
5.2be	Carry out the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, mixing, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, binding of mixtures, lining of tins, liquidizing, blending of mixtures, using pastry to line dishes and sauce making.</i>
5.2bh	Carry out a practical task for a given scenario adhering to correct hygiene and safety principles and time-frames. <i>Note: This includes planning, preparing, demonstrating, presenting and storing of food (as applicable).</i>
5.3bh	Carry out a practical task accurately, efficiently and sustainably. <i>Adherence to personal and food lab hygiene principles; personal and food safety; appropriate selection and organisation of equipment, correct performance of skills and handling of equipment; efficient organisation of preparation area, work and time; use of resources with minimal impact on the natural environment; disposal of waste.</i>
5.2bi	Prepare meals for the following groups of people and dietary needs: <i>Pregnant and lactating women, toddlers and young children, invalids and convalescents, athletes, senior citizen, vegetarians, vegans, lactose intolerant individuals, coeliacs and people (E.g. students or workers) requiring packed lunches.</i> <i>Low fat, low cholesterol, low sugar, low salt, high fibre, high calcium, high iron, vegetarian, vegan, gluten-free, lactose-free.</i>
5.3bi	Justify decisions made in the choice and preparation of meals for different groups and dietary needs.

5.2bk	Demonstrate practices to minimise food waste.
5.3bk	Demonstrate the use of leftovers to create tasty and aesthetically appealing dishes and drinks for a given context in line with the National Dietary Guidelines.
5.2bl	Demonstrate the proper care of work surfaces, utensils and equipment in the food lab so their lifespan is maximised.
5.2bm	Carry out the washing up in a logical, efficient, effective, safe and environment-friendly way.
5.1bn	Demonstrate the basic correct placement of cutlery and a glass for a simple meal.
5.2bn	Serve dishes attractively garnished and/or decorated on a correctly laid table with an informal or formal setting.
5.2bo	Evaluate the finished food product in terms of appropriate outcome. <i>Appearance, colour, texture, garnish and decoration, serving temperature, serving dishes and cutlery, and overall presentation.</i>
5.3bo	Analyse the creative element in the final product and/or presentation.
5.2bp	Recommend improvements to the overall performance reflecting on the process and outcome.
5.3bp	Recommend improvements to the overall performance reflecting on the process, outcome, efficiency, cost and sustainability.
Using Left-over food in cookery	
5.2bk	Demonstrate practices to minimise food waste.
5.3bk	Demonstrate the use of leftovers to create tasty and aesthetically appealing dishes and drinks for a given context in line with the National Dietary Guidelines.
Yeast cookery Practical Assignment	
5.2au	Perform the steps involved in the process of making a yeast dough.
5.3au	Explain why a basic step/s involved in the process of making a yeast dough is/are performed.
5.1ax	Sequence the key steps involved in the preparation, production and evaluation of a practical session. <i>Choosing dishes, stating reasons for choice, listing equipment and utensils needed, indicating the order of work, producing the dishes, evaluating the dishes produced and one's performance during the session.</i>
5.2ax	Outline the steps involved in the preparation, production, evaluation of a practical session. <i>Note: Choosing dishes according to assignment set; explaining reasons for choice made; listing of equipment and utensils required; planning the order of work; preparing oneself and all food, equipment and utensils to start working;</i>

	<i>producing the food; presenting the food; evaluating the food and one's performance during the session.</i>
5.2ay	Choose dishes that meet the requirements according to the assignment given whilst adhering to National Dietary Guidelines with some use of fresh, seasonal and local food.
5.1az	Identify ingredients and quantities required for a given recipe.
5.2az	Calculate the required quantity of ingredients for a given assignment.
5.2ba	Suggest reasons for choice with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of dish, variety of colour, texture and flavour, skills involved.</i>
5.3ba	Justify reasons for choices made with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of dish, variety of colour, texture and flavour, skills involved, serving temperature, modifications carried out, traditional value (if applicable) and equipment used.</i>
5.1bb	Select the utensils needed to prepare a particular recipe.
5.2bb	List the utensils needed to prepare a particular recipe.
5.1bc	Sequence the steps involved in the order of work for practical food assignments.
5.2bc	Outline a logical sequenced order of work for a given assignment.
5.3bc	Develop a Preparation Sheet for a given practical assignment detailing organisation of work and allocation of time for each step.
5.1bd	Choose the appropriate equipment to weigh and measure a given list of ingredients.
5.2bd	Weigh and measure solid and liquid ingredients accurately using a range of different utensils such as weighing scales, measuring cups, measuring spoons and jugs.
5.1be	Identify the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, lining of tins, liquidizing, blending of mixtures.</i>
5.2be	Carry out the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, mixing, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, binding of mixtures, lining of tins, liquidizing, blending of mixtures, using pastry to line dishes and sauce making.</i>
5.2bh	Carry out a practical task for a given scenario adhering to correct hygiene and safety principles and time-frames. <i>Note: This includes planning, preparing, demonstrating, presenting and storing of food (as applicable).</i>

5.3bh	Carry out a practical task accurately, efficiently and sustainably. <i>Adherence to personal and food lab hygiene principles; personal and food safety; appropriate selection and organisation of equipment, correct performance of skills and handling of equipment; efficient organisation of preparation area, work and time; use of resources with minimal impact on the natural environment; disposal of waste.</i>
5.2bk	Demonstrate practices to minimise food waste.
5.3bk	Demonstrate the use of leftovers to create tasty and aesthetically appealing dishes and drinks for a given context in line with the National Dietary Guidelines.
5.2bl	Demonstrate the proper care of work surfaces, utensils and equipment in the food lab so their lifespan is maximised.
5.2bm	Carry out the washing up in a logical, efficient, effective, safe and environment-friendly way.
5.1bn	Demonstrate the basic correct placement of cutlery and a glass for a simple meal.
5.2bn	Serve dishes attractively garnished and/or decorated on a correctly laid table with an informal or formal setting.
5.2bo	Evaluate the finished food product in terms of appropriate outcome. <i>Appearance, colour, texture, garnish and decoration, serving temperature, serving dishes and cutlery, and overall presentation.</i>
5.3bo	Analyse the creative element in the final product and/or presentation.
5.2bp	Recommend improvements to the overall performance reflecting on the process and outcome.
5.3bp	Recommend improvements to the overall performance reflecting on the process, outcome, efficiency, cost and sustainability.

Alignment of Broad Learning Outcomes and Content with Suggested Assessment Criteria – Year 10

Assessment criteria provide information about the qualities, characteristics, and aspects of coursework that will be used to measure the attainment of different learning outcomes.

Aligning the assessment with the broad learning outcomes means that learners know how their achievements will be measured. Whilst there are no hard and fast rules as to how this is to be done the table below provides a practical guide as to the alignment of BLOs, topic areas, and distribution of assessment criteria. The framework is flexible, and teachers can shift assessment criteria to better address the needs of learners.

Subject Focus	Alignment of BLOs & Content	Suggested distribution of Assessment Criteria
Food, Nutrition, and Health (Theory and Practical Component)	BLO 1.1	
	Factors Affecting Food Choice	1t, u, v
	BLO 2.1	
	The Process of Digestion	2at, au, av, aw, ax
	BLO 3.1	
	Meat	3a, b, c, d, e, f, g, r, s, t
	Fruits and Vegetables	3a, b, c, d, e, g, i
	BLO 4.1	
	Organic farming and GMOs	4ag, ah, ai, aj, ak
	BLO 5.1	
	Meal planning for different dietary requirements: pregnancy and lactating women, infants, toddlers and young children, senior citizens	5a, b, c, d, e, f, l, bi
	BLO 5.2	
	Meal planning for different dietary requirements: teenagers, adults, invalids and convalescents, athletes, vegetarians and vegans.	5a, b, c, d, e, g, h, l, bi
	BLO 5.3	
	Meal planning for different dietary requirements: CHD and high blood cholesterol, overweight and obesity, hypertension, constipation and diverticular disease, diabetes (type 2), dental caries, anaemia, osteoporosis, food allergies and intolerances, coeliac disease	5a, b, c, d, e, j, k, l, bi
	BLO 5.4	
	Methods of cooking	5p, q, r, s, t, u, v, w
	BLO 5.5	
	Using leftover food in cookery	5bk
	BLO 5.6	
	Yeast as a raising agent	5ao, ap, aq, ar, as, at, au, av, aw
Family Wellbeing	BLO 6.1	
	Senior citizens in society	6y, z, aa, ab, ac, ad
	Safety inside and outside the home	6ae, af, ak
	BLO 6.2	
	Persons with disabilities and disabilities and disorders	6t, u
Financial Literacy and Consumer	BLO 7.1	
	Consumer awareness	7h, i, j, o
	Consumer rights and responsibilities	7k, l

Education	Shops and shopping practices	7p, q, r
	Marketing strategies	7m, n
	BLO 7.2	
	Budgeting	7a, b, c, d
	Methods of savings	7e, f
	Banking services	7g
	Different methods of payments	7s, t
Sustainable Living and Effective Management of Resources (Theory and Practical Component)	BLO 8.1	
	Household Technology: Electric kettle, sandwich and pop-up toaster, blender, hand-held mixer, food mixer, food processor, steamer, dishwasher, microwave oven	8m, n
	BLO 8.2	
	Environmental responsibilities of the consumer	8j, y, z, aj
	The impact of consumer choices on the environment	8ab, ac, ad, ae, af, ag, ah
	Sustainable use of water and energy in the home	8aa, 8ai

Scheme of Assessment

The Home Economics Year 10 assessment consists of:

School-Based Assessment:

School-based assessment collates the outcome of various formative assessment work carried out in Year 10. Teachers are encouraged to assess learners through different modes of formative assessment, including but not limited to practical work, site visits, project work, investigations, discussions, debates, research, experiments, self-evaluation, comparative exercises, and quizzes. It is recommended to avoid written tests since a controlled examination is administered at the end of the year.

Educators should create opportunities to enable learners to attain key knowledge, skills, and competencies through different modes of formative assessment that cater for individual needs. Hence, it is vital that school-based assessment is ongoing and regularly marked throughout the scholastic year. Feedback given by the teacher will help the learners to improve their work and reach the set outcomes. It is recommended that a significant proportion of the coursework will be done in class under direct teacher supervision.

School-based assessment should be derived from a combination of learning outcomes and assessment criteria addressed in Year 10 which should be clearly identified at the beginning of each assessment task. School based assessment is set by the teacher at the students' working level i.e. at levels 1, 2, and 3 and fully marked by the teacher. The number of school-based assessment tasks as well as the allotted marks are determined by the school HE department/teacher.

Schools should keep to the specified deadlines communicated by the Education Directorates. For students who started studying Home Economics during scholastic year 2022/2023, the school-based assessment will contribute to 15% in Year 10 and 15% in Year 11. As from scholastic year 2023-2024, the School-based Assessment will contribute 10% in Year 9, 10% in Year 10 and 10% in Year 11. This will be reported to MATSEC at the end of Year 11.

Controlled Assessment:

The controlled component of the assessment will consist of an examination paper of one-and-a-half-hours set by the Education Directorate. The paper will be set in English and will cover all the learning outcomes and assessment criteria of the Year 10 programme in the following ratios: Level 1 - 30%; Level 2 - 30% and Level 3 - 40%. The examination paper will be marked out of 100 and candidates will be required to answer all the questions. Answers are to be written on the examination paper provided.

Syllabus implementation Guidelines

- Due to the practical nature of the subject, it is important that **ALL** Home Economics Lessons are facilitated in a Food Lab.
- Suggested assessment criteria may feature in more than one area. This is purposefully done to link learning outcomes and topics across the curriculum whilst enabling learners to explore the interrelatedness of topic areas and facilitate comprehension and acquisition of skills and competencies.
- All chosen assignments and tasks are to be marked out of 100 according to pre-established guidelines and rubrics.
- The school-based assessment that is spread throughout the year, should be determined by the class teacher according to the needs of the learners.

Appendix

Assignment 1 – Practical Assignment

Name of student: _____

Class: _____

School: _____

Scholastic Year: 20_____/20_____

Course Year (Circle one): 9 10 11

Assignment Number	
Title of Task	
Learning Outcome/s Assessed	

Criteria	Maximum Mark	Mark
Choice of Food Item/s and List of Ingredients	5	
Reasons for Choice	10	
Choice of Equipment and Order of Work	10	
Preparation	10	
Performance and Production	40	
Outcome	10	
Self-Evaluation, Outcome, and Suggestions for Improvement	15	
Total marks awarded	100	

To be filled by the teacher assessing the assignment:

Teacher's name: _____

Teacher's signature: _____

Date: _____

Assignment 2 – Site Visit

Name of student: _____

Class: _____

School: _____

Scholastic Year: 20_____/20_____

Course Year (Circle one): 9 10 11

Assignment Number	
Title of Task	
Learning Outcome/s Assessed	

Criteria	Maximum Mark	Mark
Date, Title, Aim, and Objective/s	10	
Preparatory Activities	20	
Site Details	10	
Site Activities	20	
Communication of Outcomes	20	
Discussion, Evaluation, Reflection, and References	20	
Total	100	

To be filled by the teacher assessing the assignment:

Teacher's name: _____

Teacher's signature: _____

Date: _____

Assignment 3 – Project

Name of student: _____

Class: _____

School: _____

Scholastic Year: 20_____/20_____

Course Year (Circle one): 9 10 11

Assignment Number	
Title of Task	
Learning Outcome/s Assessed	

Criteria	Maximum Mark	Mark
Title, Aim, Brief Description, and Plan of Action	10	
Secondary or Background Research	10	
Project Implementation	40	
Discussion and Conclusion	10	
Evaluation	10	
Reference List, Bibliography, and Appendices	10	
Oral Presentation	10	
Total	100	

To be filled by the teacher assessing the assignment:

Teacher's name: _____

Teacher's signature: _____

Date: _____

Assignment 4 – Practical Investigation

Name of student: _____

Class: _____

School: _____

Scholastic Year: 20_____/20_____

Course Year (Circle one): 9 10 11

Assignment Number	
Title of Task	
Learning Outcome/s Assessed	

Criteria	Maximum Mark	Mark
Problem Statement and Factors/Variables of Interest	10	
Investigation Justification	10	
Investigation Plan of Action (Preparation Sheet and Design of Results Grid)	20	
Practical Realisation	30	
Investigation Outcomes and Conclusions	20	
Evaluation and Recommendations	10	
Total	100	

To be filled by the teacher assessing the assignment:

Teacher's name: _____

Teacher's signature: _____

Date: _____

Name: _____ Class: _____

Preparation Sheet

Practical Assignment: _____

CHOICE OF FOOD ITEM/S AND LIST OF INGREDIENTS (5 marks)

Choice of food item/s

List of ingredients (including quantities and units)

Unit	Ingredients	Unit	Ingredients

REASONS FOR CHOICE

(10 marks)

This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

CHOICE OF EQUIPMENT AND ORDER OF WORK

(10 marks)

Choice of Equipment

List of equipment				Labour saving devices

Order of work

[illegible]

SELF-EVALUATION, OUTCOME AND SUGGESTIONS FOR IMPROVEMENT

(15 marks)

Self-Evaluation (Strengths and weaknesses including outcome and suggestions for improvement)

[illegible]

Note – This Preparation Sheet should be used in conjunction with the marking criteria for the Practical Assignment.

Appendix 3 – The Cross Curricular Themes

The Cross Curricular Themes

Symbol	Cross Curricular Theme	Theme Learning Outcomes
	Literacy	• Listening and speaking • Expressive language • Reading and understanding • Writing • Accuracy • Planning and reflection
	Education for Diversity	• Self-Awareness • Social Change • Communicating for Diversity
	Digital Literacy	• Information Management • Communication • Collaboration • Use of Digital Media • Managing Learning • Managing Internet Use • Computational Thinking
	Education for Entrepreneurship, Creativity and Innovation	• Personal • Interpersonal • Cognitive • Practical
	Education for Sustainable Development	• Learning to Know • Learning to Do • Learning to Be • Learning to Live Together
	Learning to Learn and Cooperative Learning	• Social Learning • Personal Learning • Cognitive Learning • Creative Learning
