## Introduction

This Home Economic syllabus is based on the curriculum principles outlined in The National Curriculum Framework for All (NCF) and designed using the Learning Outcomes Framework (LOF) to identify what students should know and be able to achieve by the end of their compulsory education. As a learning outcomes-based syllabus, it addresses the holistic development of all learners and advocates for quality education in line with national strategies for inclusivity, lifelong learning, and future career opportunities.

## Home Economics - Rationale

Home Economics (HE) is a multi-disciplinary field of study that seeks to promote optimal and sustainable living for individuals, families, and communities. It is concerned with meeting the challenges of everyday living in modern society. Furthermore, it provides a balance between theoretical understandings and practical actions in everyday situations. HE encompasses the learning and mastery of knowledge, attitudes, skills, and competencies that enable students to develop:

- as individuals by:  
helping them to become health literate to be able to address health problems and issues, making responsible informed choices about their food and diet, thus enhancing their potential to improve their health and wellbeing;
- as contributors to society by:  
helping them realise their responsibility to ensure that the community is kept healthy, safe, and secure, becoming effective communicators, making them aware of values and lifestyles that are different from their own, and helping them make meaningful decisions in family relationships taking into consideration the ever-changing nature of families and parenting in today's society;
- as contributors to the economy by:  
guiding them to enhance their ability to become cautious, competent consumers and manage their resources in an efficient, effective, and sustainable manner; making informed choices in relation to the environment not only within their immediate context but also in the future; promoting financial literacy as a salient contributor towards the achievement and maintenance of the improved quality of life and nurturing a creative entrepreneurial mind-set.

## The Relevance of Home Economics

The health and wellbeing theme embraced in HE provides a consolidated approach to education and aims to enable learners to develop the knowledge, skills, and competencies to

make informed choices while considering the impact of those actions on themselves, the wellbeing of other people, and society at large.

Learners should reach their full potential as they engage in various hands-on activities that are age-appropriate and level-specific. Food preparation opportunities based on sound principles of diet and nutrition provide learners with a basic skill that will enable them to take action to improve their health. The aims of HE based on this vision are expected to guide all learners to strengthen their ability to become advocates for health. This is essentially important to help curb the health problems that are afflicting our nation and help improve the health and wellbeing of our population.

Home Economics advocates the strengthening of the family and addresses the different challenges that are faced by the family in a changing world. From a HE perspective, families have a great potential for the achievement of sustainable development as core units of society and the economy. The focus of HE education on food production and nutrition, family health and wellbeing, resource management, and financial literacy which are fundamental for sustainable development, leads to valuable results for development.

HE incorporates financial literacy directly under the umbrella of consumer education and money management. This area of study provides students with the right knowledge and skills to become responsible and informed consumers as well as nurture a culture of financial planning and preparation amongst our students.

Being financially literate is a salient contributor to helping to achieve and maintain such an improved quality of life, which seeks to address poverty and social exclusion. To this end, HE directs the learners' decisions and actions and prepares them for life as individuals, family members, active citizens, and skilled employees, while facilitating the development of attributes for lifelong learning.

Home Economics as a subject can help reinforce the learning outcomes and outputs as proposed in the National Curriculum Framework due to its complementarity with other learning areas, namely:

- Health and Physical Education
- Education for Democracy
- Education for Entrepreneurship, Creativity, and Innovation
- Education for Sustainable Development

Home Economics is one of the subjects in the Health and Physical Education (HPE) Learning Area. Since the inception of the NCF, HE education has been aligned with this learning area, even though due to its multi-disciplinary and trans-disciplinary nature, it complements other cross-curricular themes and learning areas.

The HE Secondary School curriculum will provide students with opportunities to understand basic human necessities and to study the wellbeing of individuals, families, and societies, building up their awareness of the various dimensions affecting wellbeing. While the HE core Middle School curriculum can provide a broad-based study that includes all the major areas in HE, the HE option curriculum at the senior level will provide students with an in-depth study of specific areas that provides the basis for further studies. The curriculum at this level will therefore aim to strike a balance between breadth and depth and to respond to current social, economic, and technological developments, both on a local and global level.

Home Economics encompasses four main dimensions or areas of practice, namely:

### **Area 1: Food, Nutrition, and Health**

Allows students to understand and apply relevant scientific principles of nutrition in relation to food choices and their significance to health; take increasing responsibility for the management of their own health and that of individual family members; develop a variety of practical skills to prepare and present nutritionally balanced foods; investigate how issues relating to social, cultural, technological, economic, environmental, physiological and psychological points of view impact food choice and health.

### **Area 2: Family Wellbeing**

Allows students to become aware of how influences of contemporary society directly impact the wellbeing of individuals, families, and communities; identify the family as a social institution as well as the contribution of family life to the personal and social development of its members; assess how the quality of relationships is affected by the way family members communicate, share, take responsibility and help one another; consider the different and changing needs of family members and how these needs could be met throughout the lifecycle.

### **Area 3: Financial Literacy and Consumer Education**

Allows students to become informed consumers in an everchanging society; identifying the basic needs in life over wants, keeping in mind priorities and making a budget whilst saving; be aware of their rights and responsibilities when shopping and availing themselves of different services; showing awareness of different methods of payment and methods of saving; becoming critical consumer, being able to critically analyse different forms of advertising.

### **Area 4: Sustainable Living and Effective Management of Resources**

Allows students to become discerning consumers and effective managers of safe and sustainable resources in relation to the home, family, and environment within local and global contexts; develop an awareness of relevant statutory and voluntary provisions available to nurture positive attitudes and appreciate their effect on the family and households within the

community; foster aesthetic appreciation of products and investigate the implications and applications of technology and marketing techniques on consumers.

## Key Skills in Home Economics

The Home Economics course of study is designed to equip students with a broad range of knowledge, skills, and competencies in line with Home Economics' multi-disciplinary foundations. It melds scientific principles with a practical, critical-thinking, and problem-solving approach calling upon health, physical, communication, and social sciences, together with organisational and entrepreneurial skills. The main aims of the Home Economics course are to help students:

- Develop an appreciation of the value of choosing sustainable lifestyles based on efficient, safe, and fair management of personal, household, community, and global resources; and nurture skills to make informed and responsible choices and implement appropriate actions in different everyday scenarios.
- Increase understanding, nurture attitudes and develop skills to adopt and promote health and wellbeing; improve knowledge about risks for health, including unsafe practices, lack of hygiene, malnutrition, and lack of physical activity; and acquire skills to lessen such health risks.
- Assimilate the relevant scientific principles involved in food production and processing, food composition and labelling, nutrition throughout the lifecycle and dietary standards; and adopt a balanced, critical approach to food choice and eating habits; as well as develop skills relating to the choice, preparation, presentation, and storage of food to promote health, to cater for diet-related diseases and conditions, to preserve food culture and to enhance sustainability.
- Increase understanding of the changing physical, social, emotional, intellectual, and aesthetic needs of individuals and family members throughout their life cycle; and develop skills on how to meet the various needs within the home and through community services; as well as foster an ability to communicate, share and make informed decisions to enhance positive family values and relationships.
- Develop the knowledge and competencies required for the effective and safe organisation and management of the home and its contents as well as develop the necessary skills to respond effectively to rapid technological changes and to scientific development which can impact individual, family, and community living.
- Cultivate financial competency to budget and manage personal finances wisely; strengthen awareness of consumer rights and responsibilities and marketing and advertising pressures; as well as nurture a critical approach to assessing consumer goods and services showing a responsible attitude and informed decision-making.
- Develop the qualities of systematic inquiry, creativity, innovativeness, and aesthetic appreciation to create and maintain pleasing, safe, sustainable, and health-enhancing tangible products and physical and social environments; and adopt an analytical approach to decision-making and problem-solving showing sensitivity and academic rigour.

## Cross-Curricular Themes

Several cross-curricular themes have been identified as central to helping learners achieve their potential. Many of the elements that make up these cross-curricular themes are a feature of teaching and learning across subjects. With the embedding of cross-curricular themes within the learning outcomes, learners will be presented with a range of learning experiences that will improve their present and future access to learning, their social interaction, their information and communication abilities, and their ability to work collaboratively. This involves building on current practice, but it also involves increasing attention to key skills. The Cross Curricular Themes can be found in Appendix 3.

As learners engage with each of the key skills, they grow in their knowledge about learning and their skills of learning, both in general terms and in the context of their own learning. Therefore, as learners absorb the key skills they also learn how to learn. As learners progress through different levels, the learning outcomes and respective assessment criteria indicate the required evidence of achieving the key skill.

The assessment criteria will provide the basis for assessment as part of ongoing teaching and learning. Different modes of assessment will enable the learners to:

- demonstrate a knowledge and understanding of appropriate terminology, procedures, principles (main concepts), and practices in relation to the syllabus content;
- demonstrate an understanding of the influences of cultural, economic, industrial, social, and technological factors in relation to the syllabus content;

- analyse situations in the field of Home Economics by identifying the various human needs and material factors involved, and recognise the inter-relationships of these needs and factors.
- recall, seek out, select, record, and show skill in applying theoretical knowledge relevant to the needs and factors identified.
- use investigative procedures to:
  - test and compare methods, materials, and equipment.
  - observe, measure and record observations accurately and systematically.
  - interpret evidence in its various forms as a basis for making judgments and choices.
  - justify judgments and choices in the light of the evidence.
  - decide upon and plan a course of action that considers the priorities identified.
  - carry out the planned course of action by applying the required skills.
  - assess and evaluate the strengths and weaknesses, i.e. the effectiveness of the course of action.
  - display the relevant manipulative, organizational, managerial, and communication skills.

## Assessment

Assessment is an essential part of the learning and teaching process, with the main purpose being to give feedback to both the educator and the learner. Both formative and summative forms of assessment are equally significant, and both serve an educational purpose in the learning and teaching process in Home Economics.

Assessment is frequently described as having three purposes: for learning, where the evidence gathered shapes the planning for teaching and learning; as learning, where the learners learn about their learning and how to improve it; and of learning, where the evidence gathered informs the learner's progress.

In order to present a fair evaluation of learners' abilities, it is essentially important that, in Home Economics, a broad range of evidence is provided.

- What evidence of learning will be collected?
- What activities will facilitate assessment and provide evidence of learning?
- How will evidence of learning be recorded?
- Who will partake in collecting evidence of learning?

Assessment for Learning (AfL) yields important data that may enable educators to adjust and develop their teaching strategies. The following core strategies may impact the learners' performance and merit consideration in the mode of assessment employed:

- Clarifying learning intentions and outcomes.
- Producing effective questions and tasks that elicit evidence of learning.
- Providing feedback that shows learners what the next step is.

- Stimulating learners to become responsible for their own learning.
- Stimulating learners to become resources for one another.

AfL focuses on the learner by assessing the learners individually through various means. Formative assessment helps educators and learners to monitor progress and identify areas for improvement. Besides, it also gives educators valuable information about the learners' attainment.

In Home Economics, such a style of assessment is based on various observations, hands-on learning experiences, surveys, and learner participation in the ensuing discussion process. The learners' own initiative can also be taken into consideration. Educators have an opportunity to understand a learner's learning and thinking, and learners have an opportunity to reflect upon, record, and evaluate all steps of the learning process before proceeding to the next step. Ongoing evaluation, both in tasks, or projects, as well as hands-on interventions, helps learners to identify their strengths and work on their weaknesses, thus consolidating what has been learned. Evidence of learning may, in fact, come from:

- research/project work which gives the learner the opportunity to craft knowledge, skills, and attitudes into a complete package, or product, with individual style
- performance tasks that address specific assignment briefs
- an evaluation exercise that is completed after learners participate in a food preparation session/experiment/investigation
- written work
- site visits and other similar practical learning activities

Assessment of the learners' achievement for summative purposes should not be dependent on the one-off performances of tests and examinations. Alternatively, it ought to have a formative element by encouraging learners to reflect on their performance. This can include written assessments, task-based assignments, and controlled practical assessments which are embedded within the learning process. Summative assessments may be designed so that they more closely resemble problems encountered in real life. Hence, this form of assessment might include interpreting/modifying a recipe or writing short sentences to outline a point of view. It is essentially important that any form of assessment carried out at school, especially in the upper levels, would be in synergy with the MATSEC examination.

## Learning Outcomes (LOs)

Learning Outcomes state what learners are expected to achieve in the subject at the end of the course of study. These LOs focus on particular topics/themes/areas. The selected content should enable learners to achieve the specific learning outcomes.

| At the end of the programme, I can: |                                                                                                                                                                                                                  |
|-------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| LO1                                 | Demonstrate an understanding of health, wellbeing, and the principles of sustainability.                                                                                                                         |
| LO2                                 | Demonstrate a comprehensive understanding of the role of macro and micronutrients in the diet, their digestion, and their effects on health.                                                                     |
| LO3                                 | Demonstrate an understanding of different types of food commodities.                                                                                                                                             |
| LO4                                 | Demonstrate a broad understanding of food production, processing, preservation, and labelling.                                                                                                                   |
| LO5                                 | Demonstrate the ability to accurately plan, produce and evaluate a variety of sensorially appealing healthy food items and meals.                                                                                |
| LO6                                 | Demonstrate the ability to critically, sensitively, and creatively understand and address issues related to the family, community, and the environment.                                                          |
| LO7                                 | Demonstrate financial capability and critically assess the social, economic, and environmental factors that influence consumer behaviours.                                                                       |
| LO8                                 | Demonstrate an understanding of sustainable living and the principles and procedures involved in acquiring, designing, and using accommodation and resources according to the needs of individuals and families. |

## Level Descriptors

This syllabus sets out the content and assessment arrangements for the award of a Secondary Education Certificate in **HOME ECONOMICS** at Level 1, 2, or 3. Level 3 is the highest level that can be obtained for this qualification.

Table 1 overleaf refers to specific **HOME ECONOMICS** descriptors. These are general statements that describe the depth and complexity of each level of study and outline the knowledge, skills, and competencies required at each level.

Knowledge involves the acquisition of basic, factual, and theoretical information. Skills involve the application of the acquired knowledge and understanding to different contexts. Competencies indicate the sufficiency of knowledge and skills that enable someone to act in a wide variety of situations, such as whether one is competent to exercise skills with or without supervision, autonomy, or responsibility.

| Level 1                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Level 2                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Level 3                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

## Broad Learning Outcomes (BLOs) with Subject Foci – Year 11

A number of multiple core learning outcomes or Broad Learning Outcomes (BLOs) have been identified as per Learning Programme for the Year 11 course. These are aligned with the subject learning outcomes and sets of assessment criteria.

### Learning Outcomes (LOs) and Broad Learning Outcomes with Subject Foci – Year 11

| Subject Foci                                                |
|-------------------------------------------------------------|
| 1 - Food, Nutrition and Health                              |
| 2 - Family Wellbeing                                        |
| 3 - Financial Literacy & Consumer Education                 |
| 4 – Sustainable Living & Effective Management of Resources. |

| Subject Foci | Learning Outcomes (LOs) and Broad Learning Outcomes (BLOs) |
|--------------|------------------------------------------------------------|
|--------------|------------------------------------------------------------|

|                            |                                                                                                                     |
|----------------------------|---------------------------------------------------------------------------------------------------------------------|
| Food, Nutrition and Health | LO 4: I can demonstrate a broad understanding of food production, processing, preservation and labelling.           |
|                            |                                                                                                                     |
|                            | BLO 4.1: I can explain the effective use of convenience foods, processed foods and food additives in meal planning. |
|                            | <i>The use of Convenience food, Processed food, Food additives</i>                                                  |
|                            |                                                                                                                     |
|                            | BLO 4.2: I can discuss the importance of food packaging and food labelling.                                         |
|                            | <i>Food packaging, Food labelling</i>                                                                               |
|                            |                                                                                                                     |
|                            | BLO 4.3: I can apply procedures to prevent food spoilage, contamination and poisoning.                              |
|                            | <i>Food Spoilage and Contamination, Food Poisoning</i>                                                              |
|                            |                                                                                                                     |
|                            | BLO 4.4: I can explain home freezing and other ways of food preservation.                                           |
|                            | <i>Home freezing, Preservation of food</i>                                                                          |
|                            |                                                                                                                     |

|                                                        |                                                                                                                                                                                                                                         |
|--------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Food, Nutrition and Health                             | LO 5: I can demonstrate the ability to accurately plan, produce and evaluate a variety of sensorially appealing healthy food items and meals.                                                                                           |
|                                                        |                                                                                                                                                                                                                                         |
|                                                        | BLO 5.1: I can effectively plan and prepare healthy meals.                                                                                                                                                                              |
|                                                        |                                                                                                                                                                                                                                         |
|                                                        | BLO 5.2: I can demonstrate my time and task management skills to efficiently prepare appropriate food.                                                                                                                                  |
|                                                        |                                                                                                                                                                                                                                         |
| Family Wellbeing                                       | LO 6: I can demonstrate the ability to critically, sensitively and creatively understand and address issues related to the family, community and the environment.                                                                       |
|                                                        |                                                                                                                                                                                                                                         |
|                                                        | BLO 6.1: I can explain the welfare state and benefits/services provided for individuals and families.                                                                                                                                   |
|                                                        | <i>The welfare state</i>                                                                                                                                                                                                                |
|                                                        |                                                                                                                                                                                                                                         |
|                                                        | BLO 6.2 I can analyse sources of stress within the family and suggest practical ways of how this can be managed.                                                                                                                        |
|                                                        | <i>Stress on the family units</i>                                                                                                                                                                                                       |
|                                                        |                                                                                                                                                                                                                                         |
| Sustainable Living & Effective Management of Resources | LO 8: I can demonstrate an understanding of sustainable living and the principles and procedures involved in acquiring, designing and using accommodation and resources according to the needs of individuals and families.             |
|                                                        |                                                                                                                                                                                                                                         |
|                                                        | BLO 8.1: I can interpret the procedures involved in acquiring, designing and using accommodation keeping sustainability principles in mind.                                                                                             |
|                                                        | <i>Choice of home, Acquiring a home</i>                                                                                                                                                                                                 |
|                                                        |                                                                                                                                                                                                                                         |
|                                                        | BLO 8.2: I can plan or justify the design principles underlying a functional, safe and energy-efficient kitchen including choice of lighting, ventilation, wall and floor coverings and work surfaces providing justification for each. |
|                                                        | <i>Kitchen Planning, A practical kitchen.</i>                                                                                                                                                                                           |

|  |                                                                                                                                             |
|--|---------------------------------------------------------------------------------------------------------------------------------------------|
|  |                                                                                                                                             |
|  | BLO 8.3: I can interpret fabric care and analyse the choice and use of washing and drying appliances considering sustainability principles. |
|  | <i>Household technology: Washing Machine, Tumble Dryer, Fabric properties and care</i>                                                      |
|  |                                                                                                                                             |
|  | BLO 8.4: I can recommend appropriate colour scheme and soft furnishing for interiors for specific family or room situations.                |
|  | <i>Colour schemes and soft furnishings</i>                                                                                                  |

## Distribution of Learning Outcomes, Broad Learning Outcomes and Assessment Criteria at Level 1, Level 2 and Level 3 – Year 11

Following the launch of the Home Economics SEC LOF syllabus 2025 there has been a need to update the State syllabi. This syllabus for Year 11 students reflects the changes taking place in the SEC syllabus. The choice of topic areas for the Year 11 syllabus draws upon discussion with educators participating in CoPE training sessions.

1<sup>st</sup> number indicates the learning outcome.

2<sup>nd</sup> number indicates the level [Level 1, Level 2, or Level 3]

The letter indicates the assessment criteria.

**LO 4 – I can demonstrate a broad understanding of food production, processing, preservation and labelling.**

**BLO 4.1 - I can explain the effective use of convenience foods, processed foods and food additives in meal planning.**

### *The Use of Convenience Food*

|      |                                                                                                                                                            |
|------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4.1g | Distinguish between fresh and convenience foods.                                                                                                           |
| 4.2g | Explain the term convenience foods.                                                                                                                        |
| 4.1h | Give examples of convenience foods.                                                                                                                        |
| 4.2h | State the types of convenience foods with examples for each type.<br><i>Canned, dried, frozen and ready prepared foods or meals.</i>                       |
| 4.3h | Justify the increase in availability and choice of convenience foods with reference to current lifestyles.                                                 |
| 4.1i | Classify convenience foods as healthy or less healthy based on the dietary guidelines.                                                                     |
| 4.2i | Assess the nutrients/ingredients of convenience foods in terms of sugar, fat and/or salt content according to cut off points issued by health authorities. |
| 4.3i | Evaluate the nutritional and/or health value of a given convenience food/s.<br><i>E.g. ingredients, nutrients, nutritional claims, health claims.</i>      |
| 4.2j | Outline the benefits of fresh foods when compared with convenience foods.                                                                                  |
| 4.3j | Compare the nutritional value of different convenience foods with the fresh equivalent.                                                                    |
| 4.1k | Identify the advantages and disadvantages of using convenience foods.                                                                                      |
| 4.2k | Outline the advantages and disadvantages of convenience foods.                                                                                             |
| 4.2l | Suggest sensible ways of including convenience foods in the diet.                                                                                          |
| 4.3l | Justify the sensible inclusion of convenience foods in the diet.                                                                                           |

|                       |                                                                                                                                                                                                                                                                                                                                                          |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4.3m                  | Explain the value of using cook-chill foods and ready prepared meals including health implications.                                                                                                                                                                                                                                                      |
| 4.1n                  | Identify convenience foods in recipes.                                                                                                                                                                                                                                                                                                                   |
| 4.2n                  | Integrate convenience foods in recipes in a sensible manner.                                                                                                                                                                                                                                                                                             |
| 4.3n                  | Plan dishes using different kinds of convenience foods sensibly.                                                                                                                                                                                                                                                                                         |
| 4.3o                  | Evaluate recipes using convenience foods with reference to nutritional value, colour, texture, flavour and value for money.                                                                                                                                                                                                                              |
| <b>Processed Food</b> |                                                                                                                                                                                                                                                                                                                                                          |
| 4.1a                  | List different processed foods.<br><i>E.g. breakfast cereals, cheese, canned foods, savoury snacks, processed meat products, microwave meals and ready meals.</i>                                                                                                                                                                                        |
| 4.2a                  | Define processed foods.                                                                                                                                                                                                                                                                                                                                  |
| 4.3a                  | Discuss the availability and use of processed foods.                                                                                                                                                                                                                                                                                                     |
| 4.2b                  | Explain why food is processed.                                                                                                                                                                                                                                                                                                                           |
| 4.3b                  | Explain the production and/or use of processed food with reference to nutritional and/or ecological factors involved.                                                                                                                                                                                                                                    |
| 4.2c                  | Explain what is food fortification.                                                                                                                                                                                                                                                                                                                      |
| 4.3c                  | Justify the importance of food fortification.                                                                                                                                                                                                                                                                                                            |
| 4.2d                  | Explain what food enrichment is.                                                                                                                                                                                                                                                                                                                         |
| 4.3d                  | Explain the difference between food enrichment and food fortification.                                                                                                                                                                                                                                                                                   |
| <b>Food Additives</b> |                                                                                                                                                                                                                                                                                                                                                          |
| 4.1z                  | Identify food additives as substances that are added to food.                                                                                                                                                                                                                                                                                            |
| 4.2z                  | Define a food additive.                                                                                                                                                                                                                                                                                                                                  |
| 4.2aa                 | Give examples of natural and/or artificial/synthetic food additives.                                                                                                                                                                                                                                                                                     |
| 4.2ab                 | Outline the importance of food additives.                                                                                                                                                                                                                                                                                                                |
| 4.2ac                 | Describe the basic functions of different types of food additives.<br><i>Preservatives, colourings, flavourings and flavour enhancers, emulsifiers, stabilizers and thickeners, antioxidants and addition of nutrients.</i>                                                                                                                              |
| 4.3ac                 | Evaluate the food additives in different food products with a focus on type, amount and any health controversies.<br><i>Preservatives, colourings, flavour enhancers, emulsifiers, stabilizers and thickeners, antioxidants.</i><br><i>Controversies: colourings and hyperactivity, sweeteners and headaches, cocktail of chemicals over a lifespan.</i> |
| 4.1ad                 | Identify additives with E numbers and/or natural additives on the ingredients list.                                                                                                                                                                                                                                                                      |
| 4.2ad                 | Explain the importance of the E symbol found in front of additives listed in the ingredients list.                                                                                                                                                                                                                                                       |
| 4.2ae                 | Explain the possible health implications of excessive use of additives in processed foods.                                                                                                                                                                                                                                                               |

|                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                   |

**BLO 4.3 - I can apply procedures to prevent food spoilage, contamination and poisoning.****Food Spoilage and Contamination**

|                       |                                                                                                                                                                                                                                                                                       |
|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4.1am                 | Define the term food spoilage.                                                                                                                                                                                                                                                        |
| 4.2am                 | List causes of food spoilage.<br><i>Natural decay: moisture loss, action of enzymes oxidation, browning and ripening);</i><br><i>Microscopic forms of life: yeast, bacteria and moulds;</i><br><i>Chemicals: e.g. agro-chemicals, cleaning agents, vehicle exhaust fumes.</i>         |
| 4.3am                 | Explain the process of food spoilage.<br><i>Natural decay: moisture loss, action of enzymes oxidation, browning and ripening);</i><br><i>Microscopic forms of life: yeast, bacteria and moulds;</i><br><i>Chemicals: e.g. agro-chemicals, cleaning agents, vehicle exhaust fumes.</i> |
| 4.1an                 | Identify microorganisms which cause food spoilage.<br><i>Bacteria, moulds, yeasts.</i>                                                                                                                                                                                                |
| 4.2an                 | List the factors which facilitate the development of micro-organism growth on.                                                                                                                                                                                                        |
| 4.3an                 | Explain how to prevent the development of microorganisms on food.                                                                                                                                                                                                                     |
| 4.1ao                 | List how food should be handled and stored to prevent and delay the development of microorganisms.<br><i>Clean, cook, cross-contamination, chill.</i>                                                                                                                                 |
| 4.2ao                 | Explain the importance of handling and storing food properly in order to prevent the development of microorganisms and/or cross-contamination.                                                                                                                                        |
| 4.2ap                 | Describe ways how to prevent food contamination during food storage, preparation, cooking and serving.                                                                                                                                                                                |
| 4.2aq                 | Define perishable and high-risk foods.                                                                                                                                                                                                                                                |
| 4.3aq                 | Explain why certain foods are considered as perishable and high-risk foods.                                                                                                                                                                                                           |
| <b>Food Poisoning</b> |                                                                                                                                                                                                                                                                                       |
| 4.1ar                 | Give examples of foods commonly affected by different microorganisms.                                                                                                                                                                                                                 |
| 4.2ar                 | Identify pathogenic microorganisms which can lead to food poisoning.<br><i>Salmonella, Campylobacter, Listeria, E-Coli, Clostridium botulinum, Bacillus Cereus, Staphylococcus aureus, yeast and moulds.</i>                                                                          |
| 4.1as                 | Identify signs and symptoms of food poisoning.                                                                                                                                                                                                                                        |
| 4.1as                 | Describe what to do if food poisoning symptoms occur.                                                                                                                                                                                                                                 |
| 4.2at                 | Define traceability in the food supply chain to assist in the assurance of food safety and quality.                                                                                                                                                                                   |
| 4.3at                 | Explain the need for traceability for consumer safety.                                                                                                                                                                                                                                |
| 4.1au                 | Define HACCP.                                                                                                                                                                                                                                                                         |
| 4.2au                 | Explain the importance of critical control points.                                                                                                                                                                                                                                    |

|                                                                                                                                                                           |                                                                                                                                                                                                                    |

## Alignment of Broad Learning Outcomes and Content with Suggested Assessment Criteria – Year 11

Assessment criteria provide information about the qualities, characteristics, and aspects of coursework that will be used to measure the attainment of different learning outcomes.

Aligning the assessment with the broad learning outcomes means that learners know how their achievements will be measured. Whilst there are no hard and fast rules as to how this is to be done the table below provides a practical guide as to the alignment of BLOs, topic areas, and distribution of assessment criteria. The framework is flexible, and teachers can shift assessment criteria to better address the needs of learners.

| Subject Focus                                                       | Alignment of BLOs & Content                         | Suggested distribution of Assessment Criteria |
|---------------------------------------------------------------------|-----------------------------------------------------|-----------------------------------------------|
| Food, Nutrition, and Health<br><br>(Theory and Practical Component) | BLO 4.1                                             |                                               |

\* The assessment criteria related to Learning Outcome 5 (LO5) must be thoroughly addressed and covered.

## Scheme of Assessment

The Home Economics Year 11 assessment consists of:

### School-Based Assessment:

School-based assessment collates the outcome of various assessment forms. In Year 11, teachers are encouraged to assess learners through different modes of assessment, including but not limited to practical work, site visits, project work, investigations, discussions, debates, research, experiments, self-evaluation, comparative exercises, and quizzes. It is recommended to avoid written tests; since the skill is generally assessed by a controlled examination.

Every opportunity should be taken by educators to enable learners to attain key knowledge, skills, and competencies through different modes of assessment that cater for individual needs. Hence, it is vital that school-based assessment is ongoing and regularly marked throughout the scholastic year. Feedback given by the teacher will help the learners to improve their work and reach the set outcomes. Therefore, it is essentially important to address the learning outcomes – LO 1-8 throughout the three-year programme. School-based assessment is to be based on a combination of learning outcomes and assessment criteria addressed in Year 11. The learning outcomes that will be targeted through the coursework must also be identified. Assignments will be set and fully marked by the teacher. This coursework assignment needs to cater for students working in levels 1, 2, and 3.

It is recommended that a significant proportion of the coursework will be done in class under direct teacher supervision.

The school-based assessment mark must be based on the work students produce during the scholastic year. The weighting of each task is to be determined by the school HE department/teacher. Schools should keep to the specified deadlines communicated by the Education Directorates.

For students studying Home Economics from 2023 onwards, the school-based assessment for each year will contribute 10% of the overall mark and it will be reported to MATSEC at the end of Year 11.

## Controlled Assessment:

The controlled component of the assessment will consist of an examination paper of one hour forty-five minutes set by the Education Directorates. The paper will be set in English and will cover all the learning outcomes and assessment criteria of the Year 11 programme in the following ratios: Level 1- 30%; Level 2- 30% and Level 3- 40%. The examination paper will be marked out of 100 and candidates will be required to answer all the questions. All answers are to be written on the examination paper provided.

## Syllabus Implementation Guidelines

- Due to the practical nature of the subject, it is important that **ALL** Home Economics Lessons are facilitated in a Food Lab.
- Suggested assessment criteria may feature in more than one area. This is purposefully done to link learning outcomes and topics across the curriculum whilst enabling learners to explore the interrelatedness of topic areas and facilitate comprehension and acquisition of skills and competencies.
- All chosen assignments and tasks are to be marked out of 100 according to pre-established guidelines and rubrics.
- The school-based assessment that is spread throughout the year, should be determined by the class teacher according to the needs of the learners.

# Appendix

## Assignment 1 – Practical Assignment

Name of student: \_\_\_\_\_

Class: \_\_\_\_\_

School: \_\_\_\_\_

Scholastic Year: 20\_\_\_\_\_/20\_\_\_\_\_

Course Year (Circle one):      9                      10                      11

|                             |  |
|-----------------------------|--|
| Assignment Number           |  |
| Title of Task               |  |
| Learning Outcome/s Assessed |  |

| Criteria                                                  | Maximum Mark | Mark |
|-----------------------------------------------------------|--------------|------|
| Choice of Food Item/s and List of Ingredients             | 5            |      |
