

Department of Curriculum, Lifelong Learning and Employability

Home Economics

Year 9

The illustration features a central cluster of approximately 12 circular icons in various colors (blue, green, yellow, red, pink). The icons include: a chef's hat, a bowl of vegetables, a house, a Euro symbol, a piggy bank, a shopping cart, a heart, a person with a briefcase, a globe, a footprint, a family silhouette, and a person sitting at a desk. Below this cluster is a blue open book held by two white hands. Small colored dots trail from the book up towards the icon cluster.

Introduction

This Home Economic syllabus is based on the curriculum principles outlined in The National Curriculum Framework for All (NCF) and designed using the Learning Outcomes Framework (LOF) to identify what students should know and be able to achieve by the end of their compulsory education. As a learning outcomes-based syllabus, it addresses the holistic development of all learners and advocates for quality education in line with national strategies for inclusivity, lifelong learning, and future career opportunities.

Home Economics - Rationale

Home Economics (HE) is a multi-disciplinary field of study that seeks to promote optimal and sustainable living for individuals, families, and communities. It is concerned with meeting the challenges of everyday living in modern society. Furthermore, it provides a balance between theoretical understandings and practical actions in everyday situations. HE encompasses the learning and mastery of knowledge, attitudes, skills, and competencies that enable students to develop:

- as individuals by:
helping them to become health literate to be able to address health problems and issues, making responsible informed choices about their food and diet, thus enhancing their potential to improve their health and well-being;
- as contributors to society by:
helping them realise their responsibility to ensure that the community is kept healthy, safe, and secure, becoming effective communicators, making them aware of values and lifestyles that are different from their own, and helping them make meaningful decisions in family relationships taking into consideration the ever-changing nature of families and parenting in today's society;
- as contributors to the economy by:
guiding them to enhance their ability to become cautious, competent consumers and manage their resources in an efficient, effective, and sustainable manner; making informed choices in relation to the environment not only within their immediate context but also in the future; promoting financial literacy as a salient contributor towards the achievement and maintenance of the improved quality of life and nurturing a creative entrepreneurial mind-set.

The Relevance of Home Economics

The health and well-being theme embraced in HE provides a consolidated approach to education and aims to enable learners to develop the knowledge, skills, and competencies to

make informed choices while considering the impact of those actions on themselves, the well-being of other people, and society at large.

Learners should reach their full potential as they engage in various hands-on activities that are age-appropriate and level-specific. Food preparation opportunities based on sound principles of diet and nutrition provide learners with a basic skill that will enable them to take action to improve their health. The aims of HE based on this vision are expected to guide all learners to strengthen their ability to become advocates for health. This is essentially important to help curb the health problems that are afflicting our nation and help improve the health and well-being of our population.

Home Economics advocates the strengthening of the family and addresses the different challenges that are faced by the family in a changing world. From a HE perspective, families have a great potential for the achievement of sustainable development as core units of society and the economy. The focus of HE education on food production and nutrition, family health and well-being, resource management, and financial literacy which are fundamental for sustainable development, leads to valuable results for development.

HE incorporates financial literacy directly under the umbrella of consumer education and money management. This area of study provides students with the right knowledge and skills to become responsible and informed consumers as well as nurture a culture of financial planning and preparation amongst our students.

Being financially literate is a salient contributor to helping to achieve and maintain such an improved quality of life, which seeks to address poverty and social exclusion. To this end, HE directs the learners' decisions and actions and prepares them for life as individuals, family members, active citizens, and skilled employees, while facilitating the development of attributes for lifelong learning.

Home Economics as a subject can help reinforce the learning outcomes and outputs as proposed in the National Curriculum Framework due to its complementarity with other learning areas, namely:

- Health and Physical Education
- Education for Democracy
- Education for Entrepreneurship, Creativity, and Innovation
- Education for Sustainable Development

Home Economics is one of the subjects in the Health and Physical Education (HPE) Learning Area. Since the inception of the NCF, HE education has been aligned with this learning area, even though due to its multi-disciplinary and trans-disciplinary nature, it complements other cross-curricular themes and learning areas.

The HE Secondary School curriculum will provide students with opportunities to understand basic human necessities and to study the well-being of individuals, families, and societies, building up their awareness of the various dimensions affecting well-being. While the HE core Middle School curriculum can provide a broad-based study that includes all the major areas in HE, the HE option curriculum at the senior level will provide students with an in-depth study of specific areas that provides the basis for further studies. The curriculum at this level will therefore aim to strike a balance between breadth and depth and to respond to current social, economic, and technological developments, both on a local and global level.

Home Economics encompasses four main dimensions or areas of practice, namely:

Area 1: Food, Nutrition, and Health

Allows students to understand and apply relevant scientific principles of nutrition in relation to food choices and their significance to health; take increasing responsibility for the management of their own health and that of individual family members; develop a variety of practical skills to prepare and present nutritionally balanced foods; investigate how issues relating to social, cultural, technological, economic, environmental, physiological and psychological points of view impact food choice and health.

Area 2: Family Wellbeing

Allows students to become aware of how influences of contemporary society directly impact the wellbeing of individuals, families, and communities; identify the family as a social institution as well as the contribution of family life to the personal and social development of its members; assess how the quality of relationships is affected by the way family members communicate, share, take responsibility and help one another; consider the different and changing needs of family members and how these needs could be met throughout the lifecycle.

Area 3: Financial Literacy and Consumer Education

Allows students to become informed consumers in an everchanging society; identifying the basic needs in life over wants, keeping in mind priorities and making a budget whilst saving; be aware of their rights and responsibilities when shopping and availing themselves of different services; showing awareness of different methods of payment and methods of saving; becoming critical consumer, being able to critically analyse different forms of advertising.

Area 4: Sustainable Living and Effective Management of Resources

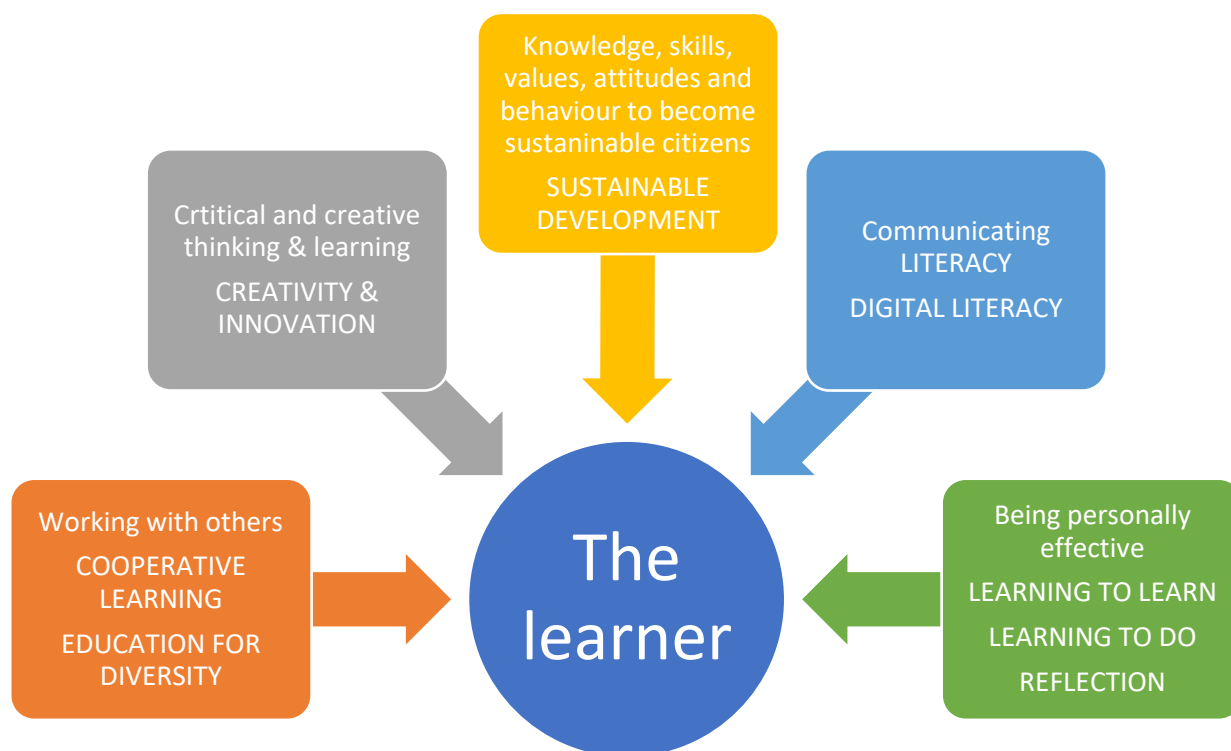

Allows students to become discerning consumers and effective managers of safe and sustainable resources in relation to the home, family, and environment within local and global contexts; develop an awareness of relevant statutory and voluntary provisions available to nurture positive attitudes and appreciate their effect on the family and households within the

community; foster aesthetic appreciation of products and investigate the implications and applications of technology and marketing techniques on consumers.

Key Skills in Home Economics

The Home Economics course of study is designed to equip students with a broad range of knowledge, skills, and competencies in line with Home Economics' multi-disciplinary foundations. It melds scientific principles with a practical, critical-thinking, and problem-solving approach calling upon health, physical, communication, and social sciences, together with organisational and entrepreneurial skills. The main aims of the Home Economics course are to help students:

- Develop an appreciation of the value of choosing sustainable lifestyles based on efficient, safe, and fair management of personal, household, community, and global resources; and nurture skills to make informed and responsible choices and implement appropriate actions in different everyday scenarios.
- Increase understanding, nurture attitudes and develop skills to adopt and promote health and wellbeing; improve knowledge about risks for health, including unsafe practices, lack of hygiene, malnutrition, and lack of physical activity; and acquire skills to lessen such health risks.
- Assimilate the relevant scientific principles involved in food production and processing, food composition and labelling, nutrition throughout the lifecycle and dietary standards; and adopt a balanced, critical approach to food choice and eating habits; as well as develop skills relating to the choice, preparation, presentation, and storage of food to promote health, to cater for diet-related diseases and conditions, to preserve food culture and to enhance sustainability.
- Increase understanding of the changing physical, social, emotional, intellectual, and aesthetic needs of individuals and family members throughout their life cycle; and develop skills on how to meet the various needs within the home and through community services; as well as foster an ability to communicate, share and make informed decisions to enhance positive family values and relationships.
- Develop the knowledge and competencies required for the effective and safe organisation and management of the home and its contents as well as develop the necessary skills to respond effectively to rapid technological changes and to scientific development which can impact individual, family, and community living.
- Cultivate financial competency to budget and manage personal finances wisely; strengthen awareness of consumer rights and responsibilities and marketing and advertising pressures; as well as nurture a critical approach to assessing consumer goods and services showing a responsible attitude and informed decision-making.
- Develop the qualities of systematic inquiry, creativity, innovativeness, and aesthetic appreciation to create and maintain pleasing, safe, sustainable, and health-enhancing tangible products and physical and social environments; and adopt an analytical approach to decision-making and problem-solving showing sensitivity and academic rigour.

Cross-Curricular Themes

Several cross-curricular themes have been identified as central to helping learners achieve their potential. Many of the elements that make up these cross-curricular themes are a feature of teaching and learning across subjects. With the embedding of cross-curricular themes within the learning outcomes, learners will be presented with a range of learning experiences that will improve their present and future access to learning, their social interaction, their information and communication abilities, and their ability to work collaboratively. This involves building on current practice, but it also involves increasing attention to key skills. The Cross Curricular Themes can be found in Appendix 3.

As learners engage with each of the key skills, they grow in their knowledge about learning and their skills of learning, both in general terms and in the context of their own learning. Therefore, as learners absorb the key skills they also learn how to learn. As learners progress through different levels, the learning outcomes and respective assessment criteria indicate the required evidence of achieving the key skill.

The assessment criteria will provide the basis for assessment as part of ongoing teaching and learning. Different modes of assessment will enable the learners to:

- demonstrate a knowledge and understanding of appropriate terminology, procedures, principles (main concepts), and practices in relation to the syllabus content;
- demonstrate an understanding of the influences of cultural, economic, industrial, social, and technological factors in relation to the syllabus content;

- analyse situations in the field of Home Economics by identifying the various human needs and material factors involved, and recognise the inter-relationships of these needs and factors.
- recall, seek out, select, record, and show skill in applying theoretical knowledge relevant to the needs and factors identified.
- use investigative procedures to:
 - test and compare methods, materials, and equipment.
 - observe, measure and record observations accurately and systematically.
 - interpret evidence in its various forms as a basis for making judgments and choices.
 - justify judgments and choices in the light of the evidence.
 - decide upon and plan a course of action that considers the priorities identified.
 - carry out the planned course of action by applying the required skills.
 - assess and evaluate the strengths and weaknesses, i.e. the effectiveness of the course of action.
 - display the relevant manipulative, organizational, managerial, and communication skills.

Assessment

Assessment is an essential part of the learning and teaching process, with the main purpose being to give feedback to both the educator and the learner. Both formative and summative forms of assessment are equally significant, and both serve an educational purpose in the learning and teaching process in Home Economics.

Assessment is frequently described as having three purposes: for learning, where the evidence gathered shapes the planning for teaching and learning; as learning, where the learners learn about their learning and how to improve it; and of learning, where the evidence gathered informs the learner's progress.

In order to present a fair evaluation of learners' abilities, it is essentially important that, in Home Economics, a broad range of evidence is provided.

- What evidence of learning will be collected?
- What activities will facilitate assessment and provide evidence of learning?
- How will evidence of learning be recorded?
- Who will partake in collecting evidence of learning?

Assessment for Learning (AfL) yields important data that may enable educators to adjust and develop their teaching strategies. The following core strategies may impact the learners' performance and merit consideration in the mode of assessment employed:

- Clarifying learning intentions and outcomes.
- Producing effective questions and tasks that elicit evidence of learning.
- Providing feedback that shows learners what the next step is.
- Stimulating learners to become responsible for their own learning.
- Stimulating learners to become resources for one another.

AfL focuses on the learner by assessing the learners individually through various means. Formative assessment helps educators and learners to monitor progress and identify areas for improvement. Besides, it also gives educators valuable information about the learners' attainment.

In Home Economics, such a style of assessment is based on various observations, hands-on learning experiences, surveys, and learner participation in the ensuing discussion process. The learners' own initiative can also be taken into consideration. Educators have an opportunity to understand a learner's learning and thinking, and learners have an opportunity to reflect upon, record, and evaluate all steps of the learning process before proceeding to the next step. Ongoing evaluation, both in tasks, or projects, as well as hands-on interventions, helps learners to identify their strengths and work on their weaknesses, thus consolidating what has been learned. Evidence of learning may, in fact, come from:

- research/project work which gives the learner the opportunity to craft knowledge, skills, and attitudes into a complete package, or product, with individual style
- performance tasks that address specific assignment briefs
- an evaluation exercise that is completed after learners participate in a food preparation session/experiment/investigation
- written work
- site visits and other similar practical learning activities

Assessment of the learners' achievement for summative purposes should not be dependent on the one-off performances of tests and examinations. Alternatively, it ought to have a formative element by encouraging learners to reflect on their performance. This can include written assessments, task-based assignments, and controlled practical assessments which are embedded within the learning process. Summative assessments may be designed so that they more closely resemble problems encountered in real life. Hence, this form of assessment might include interpreting/modifying a recipe or writing short sentences to outline a point of view. It is essentially important that any form of assessment carried out at school, especially in the upper levels, would be in synergy with the MATSEC examination.

Learning Outcomes (LOs)

Learning Outcomes state what learners are expected to achieve in the subject at the end of the course of study. These LOs focus on particular topics/themes/areas. The selected content should enable learners to achieve the specific learning outcomes.

At the end of the programme, I can:	
LO1	Demonstrate an understanding of health, well-being, and the principles of sustainability.
LO2	Demonstrate a comprehensive understanding of the role of macro and micronutrients in the diet, their digestion, and their effects on health.
LO3	Demonstrate an understanding of different types of food commodities.
LO4	Demonstrate a broad understanding of food production, processing, preservation, and labelling.
LO5	Demonstrate the ability to accurately plan, produce and evaluate a variety of sensorially appealing healthy food items and meals.
LO6	Demonstrate the ability to critically, sensitively, and creatively understand and address issues related to the family, community, and the environment.
LO7	Demonstrate financial capability and critically assess the social, economic, and environmental factors that influence consumer behaviours.
LO8	Demonstrate an understanding of sustainable living and the principles and procedures involved in acquiring, designing, and using accommodation and resources according to the needs of individuals and families.

Level Descriptors

This syllabus sets out the content and assessment arrangements for the award of a Secondary Education Certificate in **HOME ECONOMICS** at Level 1, 2, or 3. Level 3 is the highest level that can be obtained for this qualification.

Table 1 overleaf refers to specific **HOME ECONOMICS** descriptors. These are general statements that describe the depth and complexity of each level of study and outline the knowledge, skills, and competencies required at each level.

Knowledge involves the acquisition of basic, factual, and theoretical information. Skills involve the application of the acquired knowledge and understanding to different contexts. Competencies indicate the sufficiency of knowledge and skills that enable someone to act in a wide variety of situations, such as whether one is competent to exercise skills with or without supervision, autonomy, or responsibility.

Level 1	Level 2	Level 3
Basic general HE related knowledge 1. Acquires basic general knowledge related to the immediate HE environment and expressed through a variety of simple tools and context as an entry point to lifelong learning. 2. Knows and understands the steps needed to complete simple tasks and activities in an HE environment; 3. Is aware and understands basic HE tasks and instructions; 4. Understands basic HE textbooks and instruction guides.	Basic factual knowledge of the HE fields of work or study. 1. Possess good knowledge of the HE field of work or study; 2. Is aware of and interprets HE related information and ideas; 3. Understands facts and procedures in the application of basic HE related tasks and instructions; 4. Selects and uses relevant HE knowledge to accomplish specific actions for self and others.	Knowledge of facts, principles, processes, and general concepts in the HE field of work or study. 1. Understands the relevancy of theoretical knowledge and information related to the HE field of work or study; 2. Assesses, evaluates, and interprets facts, establishing basic principles and concepts in the HE field of work or study; 3. Understands facts and procedures in the application of more complex HE tasks and instructions; 4. Selects and uses relevant HE knowledge acquired on one's own initiative to accomplish specific actions for self and others.
Basic skills required to carry out simple HE-related tasks. 1. Has the ability to apply basic HE knowledge and carry out a limited range of simple tasks; 2. Has basic repetitive communication skills to complete well-defined HE routine tasks and identifies whether actions have been accomplished;	Basic cognitive and practical skills required to use relevant HE information in order to carry out tasks and to solve HE related routine problems using simple rules and tools. 1. Has the ability to demonstrate a range of skills by carrying out a range of complex HE related tasks within the HE field of work or study;	A range of cognitive and practical skills required to accomplish HE related tasks and solve HE related problems by selecting and applying basic methods, tools, materials and information. 1. Demonstrates a range of developed HE skills to carry out more than one complex HE related task effectively and in

3. Follows instructions and be aware of consequences of basic actions for self and others.	2. Communicates basic HE related information; 3. Ensures HE related tasks are carried out effectively.	unfamiliar and unpredictable HE contexts; 2. Communicates more complex HE information; 3. Solves basic HE related problems by applying basic methods, tools, materials and information given in a restricted learning environment.
Work out or study under Direct Supervision in a structured HE context. 1. Applies basic HE knowledge and skills to do simple, repetitive and familiar tasks; 2. Participates in and takes basic responsibility for the action of simple HE tasks; 3. Activities are carried out under guidance and within simple defined timeframes; 4. Acquires and applies basic HE key competencies at this level.	Work or study under supervision with some autonomy. 1. Applies factual HE knowledge and practical skills to do some structured tasks; 2. Ensures one acts pro-actively; 3. Carries out HE related activities under limited supervision and with limited responsibility in a quality controlled HE context; 4. Acquires and applies basic HE key competencies at this level.	Take responsibility for completion of HE related tasks in work or study and adapt own behaviour to circumstances in solving HE problems. 1. Applies HE knowledge and skills to do some HE tasks systematically; 2. Adapts own behaviour to circumstances in solving HE related problems by participating pro-actively in structured HE learning environments; 3. Uses own initiative with established responsibility and autonomy, but is supervised in quality-controlled learning environments, normally in an HE environment; 4. Acquires HE key competencies at this level as a basis for lifelong learning.

Adapted from: <https://mfhea.mt/wp-content/uploads/2021/03/Referencing-Report-2016.pdf>

Broad Learning Outcomes (BLOs) with Subject Foci – Year 9

A number of multiple core learning outcomes or Broad Learning Outcomes (BLOs) have been identified as per Learning Programme for the Year 9 course. These are aligned with the subject learning outcomes and sets of assessment criteria.

Learning Outcomes (LOs) and Broad Learning Outcomes with Subject Foci - Year 9

Subject Foci
1 - Food, Nutrition and Health
2 - Family Wellbeing
3 - Financial Literacy and Consumer Education
4 - Sustainable Living & Effective Management of Resources

Subject Foci	Learning Outcomes (LOs) and Broad Learning Outcomes (BLOs)
--------------	--

Food, Nutrition and Health	LO 1: I can demonstrate an understanding of health, wellbeing, and the principles of sustainability.
	BLO 1.1: I can explain the concept of health, wellbeing and sustainable living.
	Topic Area: The Concept of Health; Sustainable living
Food, Nutrition and Health	BLO 1.2: I can interpret the National Food Guide Graphic and apply the dietary guidelines to meet the nutrient needs, promote health and prevent diseases.
	Topic Area: The Dietary Guidelines; The National Food Guide Graphic; Functions of food

Food, Nutrition and Health	LO 2: I can demonstrate a comprehensive understanding of the role of macro and micronutrients in the diet.
	BLO 2.1: I can explain the role of macro and micronutrients in the diet.
	Topic Area: Introduction to Nutrients; Proteins; Carbohydrates including Non-Starch Polysaccharides; Fats; Vitamins; Minerals; Water

Food, Nutrition and Health	LO 3: I can demonstrate an understanding of different types of food commodities.
	BLO 3.1: I can relate food commodities to their characteristics, sources, nutritional value, versatility, use, and storage.
	Topic Area: Food Commodities: Eggs; Fish; Herbs & Spices; Cereals; Pulses; Nuts & Seeds; Milk and Dairy products

Food, Nutrition and Health	LO 4: I can demonstrate a broad understanding of food production, processing, preservation, and labelling.
	BLO 4.1: I can demonstrate hygiene and safety practices in the Food Lab.
	Topic Area: Hygiene and safety in the food lab

Food, Nutrition and Health	LO 5: I can demonstrate the ability to accurately plan, produce and evaluate a variety of sensorially appealing healthy food items and meals.
	BLO 5.1: I can practise recipe engineering in the planning and production of meals.
	Topic Area: Recipe Engineering; Traditional Maltese dishes
	BLO 5.2: I can plan, prepare, serve and evaluate appropriate food items and meals*.
	Topic Area: The preparation sheet
	<i>* Practical assignment on one or a combination of the following food commodities: Eggs, Fish, Herbs and Spices, Cereals, Pulses, Nuts and Seeds, Milk and Dairy Products</i>
	BLO 5.3: I can present food in a variety of appealing ways.
	Topic Area: Food presentation
	BLO 5.4: I can demonstrate the skills of making shortcrust pastry.
	Topic Area: Shortcrust Pastry (Theory and Demonstration); Shortcrust Pastry (Practical Session)
	BLO 5.5: I can plan and carry out the whisking method of cake making.
	Topic Area: Cake making methods; Whisking Method (Theory and Demonstration); Whisking Method (Practical Session)

Family Wellbeing	LO 6: I can demonstrate the ability to critically, sensitively and creatively understand and address issues related to the family, community and the environment.
	BLO 6.1: I can discuss issues related to the family unit, childcare and development.
	Topic Area: The family unit; Childcare and development
	BLO 6.2: I can explain first aid procedures and describe the use of fire safety equipment.
	Topic Area: First aid and fire safety

Financial Literacy and Consumer Education	LO 7: I can demonstrate financial capability and critically assess the social, economic and environmental factors that influence consumer behaviours.
	BLO 7.1: I can demonstrate financial capability by giving due consideration to the cost of food items and household equipment.
	<i>In year 9 students should be given every opportunity to address this learning outcome by giving due consideration to cost during practical sessions and in the topic of Critical choice of household equipment and appliances.</i>

Sustainable Living and Effective Management of Resources	LO 8: I can demonstrate an understanding of sustainable living and the principles and procedures involved in acquiring, designing, and using accommodation and resources according to the needs of individuals and families.
	BLO 8.1: I can use and care for food lab equipment and appliances competently, efficiently, safely, and sustainably.
	Topic Area: The selection, safe use of care of food lab equipment*; Weighing and measuring*; The critical choice of household equipment and appliances: The refrigerator and freezer; The cooker.
	<i>* These areas also include assessment criteria from LO 5: demonstrate the ability to accurately plan, produce and evaluate a variety of sensorially appealing healthy food items and meals.</i>

Distribution of Learning Outcomes, Broad Learning Outcomes and Assessment Criteria at Level 1, Level 2 and Level 3 – Year 9

Following the launch of the Home Economics SEC LOF syllabus 2025 there has been a need to update the State syllabi. This syllabus for Year 9 students reflects the changes taking place in the SEC syllabus. The choice of topic areas for the Year 9 syllabus draws upon discussion with educators participating in CoPE training sessions.

1 st number indicates the learning outcome
2 nd number indicates the level [Level 1, Level 2, or Level 3]
The letter indicates the assessment criteria

LO 1 – I can demonstrate an understanding of health, wellbeing and the principles of sustainability (coursework and controlled)

BLO 1.1 - I can explain the concept of health, wellbeing and sustainable living

The Concept of Health

1.2a	Define health and wellbeing.
1.1b	State the basic health needs. <i>Food, water, clothing, shelter, hygiene, education, and healthcare.</i>
1.2b	Recommend ways how basic health needs can be addressed.
1.3b	Justify how different health needs can be addressed in a given scenario.
1.1c	Identify the different dimensions of health. <i>Limited to: Physical, mental, social, emotional and environmental.</i>
1.2c	Describe the dimensions of health.
1.3c	Discuss different lifestyle choices and their effects on the various dimensions of health.
1.1d	Identify measures that can be taken to promote health. <i>Development and implementation of a health-related policy e.g. school food policy; educational campaigns e.g. no drinking and driving; health screening e.g. mammogram; financial incentives e.g. rebates on bicycles; workplace health promotion e.g. onsite sport facilities; law enforcement e.g. no littering enforcement</i>
1.2d	Suggest measures that can be taken at the local level to promote health.
1.3d	Explain the importance of these measures being implemented locally.
1.1i	List factors (dietary and non-dietary) that contribute to a healthy lifestyle.
1.2i	Describe the factors that contribute to a healthy lifestyle.
1.3i	Suggest actions that can be taken to address the factors that contribute to a healthy lifestyle in a given scenario.

Sustainable Living

1.1e	Identify factors which affect sustainable living. <i>E.g. transportation, energy consumption, diet, waste management.</i>
1.2e	Define sustainable living.
1.3e	Discuss factors which affect the sustainable living.
1.1f	Identify Sustainable Development Goals. <i>Limited to:</i> * SDG 1 – No poverty; * SDG 2 – Zero hunger; * SDG 3 – Good health and well-being; * SDG 6 – Clean water and sanitation; * SDG 7 – Affordable and clean energy.

1.2f	Define Sustainable Development Goals.
1.2g	Outline Sustainable Development Goals. <i>Limited to: SDGs 1, 2, 3, 6 & 7.</i>
1.3g	Explain the importance that individuals, businesses and governments adhere to the Sustainable Development Goals.
1.1h	Identify everyday sustainable living practices in the home to include energy efficiency, buying local, buying fair trade, waste management and water conservation.
1.2h	Suggest everyday sustainable living practices to be taken by individuals, families and households that can contribute to sustainable living.
1.3h	Suggest actions undertaken by the government to promote sustainable development and/or living at the national level and/or within households.
BLO 1.2 – I can interpret the National Food Guide Graphic and apply the dietary guidelines to meet the nutrient needs, promote health and prevent disease.	
<i>The Dietary Guidelines</i>	
1.1k	Identify the national dietary guidelines for adults.
1.2k	Outline the national dietary guidelines for adults.
1.3k	Suggest examples of the application of national dietary guidelines for adults.
1.3l	Justify changes in the food intake within a given scenario with reference to the national dietary guidelines.
<i>The National Food Guide Graphic</i>	
1.1o	Categorise foods into food groups based on the national food guide graphic.
1.2o	Suggest suitable foods for each food group represented in the national food guide graphic.
1.1p	Label the National Food Guide Graphic (The Healthy Plate).
1.2p	Describe the different features of the National Food Guide Graphic with reference to the Mediterranean Diet.
1.2q	Define a balanced diet.
1.2r	Recommend the number of daily servings from each food group for adults.
1.3r	Justify the different proportions of the different food groups according to individual needs.
1.2s	Identify different food serving sizes for children (3-12 years) and/or adults for each food group. <i>E.g. the hand guide (child's fist, palm of hand, thumb, whole hand)</i>
1.3s	Discuss the risks of not consuming the correct portion sizes of food and drinks.
<i>Functions of Food</i>	
1.1j	State the main functions of food. <i>Note: to provide energy; to provide material for growth and repair; to protect against disease.</i>
1.2j	Outline the main functions of food.

1.3j	Explain how dietary needs change according to age, gender, level of activity, and state of health.
1.2m	Describe malnutrition. <i>Under-nutrition, over nutrition/obesity, poor quality diet lacking in some nutrients.</i>
1.3m	Discuss obesity in terms of causes, consequences, and prevention.
1.1n	Identify eating disorders. <i>Anorexia Nervosa, Bulimia Nervosa.</i>
1.2n	Describe eating disorders.
1.3n	Describe the impact of eating disorders on a person's health.
LO 2 – I can demonstrate a comprehensive understanding of the role of macro and micronutrients in the diet (coursework and controlled)	
	
BLO 2.1 – I can explain the role of macro and micronutrients in the diet.	
Introduction to Nutrients	
2.1a	List the 5 nutrients. <i>Protein, Carbohydrates, Fats, Vitamins, and Minerals.</i>
2.2a	Classify nutrients into macronutrients and micronutrients.
2.3a	Distinguish between macronutrients and micronutrients.
2.1b	Identify the main function/s of nutrients. <i>Protein, Carbohydrates, Fats, Vitamins, and Minerals.</i>
2.2b	State the main function/s of nutrients in the diet. <i>Protein, Carbohydrates, Fats, Vitamins, and Minerals.</i>
2.1c	Identify examples of sources of nutrients.
2.2c	Give examples of sources of nutrients. <i>Protein, Carbohydrates, Fats, Vitamins, and Minerals.</i>
2.1d	Identify the energy values of the macronutrients.
Proteins	
2.1e	Classify protein into animal and plant food sources.
2.2e	Describe complete and incomplete protein, using examples.
2.3e	Explain the difference between high biological value protein (HBV) and low biological value protein (LBV).
2.1f	State the two main types of amino acids – essential and non-essential.
2.2f	Outline the importance of essential amino acids.
2.3f	Explain the difference between essential (indispensable) and non-essential (dispensable) amino acids.
2.2g	Define complementary proteins.
2.3g	Outline the importance of complementary protein.
2.1h	Identify examples of complementary proteins.
2.3h	Plan a meal/snack making use of complementary proteins.

2.1i	List alternative sources of protein. <i>Limited to: soya products (Textured Vegetable Protein (TVP), tempeh, tofu, miso) seitan, quorn, insects.</i>
2.2i	Describe alternative sources of protein. <i>Limited to: TVP, tempeh, tofu, quorn.</i>
2.3i	Suggest uses for alternative sources of protein in meals.
2.2j	List groups of people with higher needs for protein. <i>Children, teenagers, pregnant and lactating women, elderly, and vegetarians.</i>
2.3j	Give reasons why certain groups of people have higher needs for protein.
2.1k	Identify a deficiency disease of protein and/or protein-energy. <i>Limited to: Kwashiorkor (protein), Marasmus (protein-energy).</i>
2.2k	Describe a deficiency disease of protein and/or protein-energy. <i>Limited to: Kwashiorkor (protein), Marasmus (protein-energy).</i>
Carbohydrates	
2.1l	List the different types of carbohydrates. <i>Sugars, Starch, Dietary fibre (NSP – non-starch polysaccharide).</i>
2.2l	Categorise the different types of carbohydrates. <i>Simple – Single sugars and double sugars, Complex – Starch and Dietary fibre (NSP – soluble and insoluble).</i>
2.3l	Distinguish between monosaccharides, disaccharides, and polysaccharides giving examples. <i>Monosaccharides (glucose, fructose, and galactose), disaccharides (sucrose, lactose, and maltose), and polysaccharides (starch and NSP).</i>
2.2m	Give different food sources for each type of carbohydrate. <i>Sugar, Starch, and Dietary fibre (NSP).</i>
2.3m	Give examples of different food sources of the different saccharide groups. <i>Monosaccharides (glucose, fructose, and galactose), disaccharides (sucrose, lactose, and maltose), and polysaccharides (starch and NSP).</i>
2.1n	Identify sources of intrinsic and extrinsic/free sugars.
2.2n	Give examples of intrinsic and extrinsic/free sugars.
2.3n	Explain the terms intrinsic and extrinsic/free sugars.
2.3o	Explain why carbohydrate intake acts as a ‘protein sparer’.
2.1p	Identify health problems when consuming too much sugar in the diet. <i>Dental caries, overweight, obesity.</i>
2.2p	Mention health problems when consuming too much sugar in the diet. <i>Dental caries, overweight, obesity.</i>
2.3p	Explain the relationship between a sugar intake and health conditions. <i>Health conditions limited to: Dental caries, overweight and obesity</i>
2.1q	Identify the different types of diabetes. <i>Type 1, Type 2, Gestational.</i>

2.2q	Describe the different types of diabetes. Type 1, Type 2, Gestational.
2.3r	Explain the effects of dry and wet heat on sugars and starch.
Non-Starch Polysaccharides	
2.1s	State what NSP (non-starch polysaccharides) stands for.
2.2s	Define the term NSP.
2.1t	Identify the main roles of dietary fibre (NSP) in the diet to promote health.
2.2t	Outline the functions of dietary fibre (NSP) in the diet.
2.3t	Explain the functions of insoluble and/or soluble dietary fibre in the diet.
2.1u	Name sources of dietary fibre in the diet.
2.2u	Give examples of sources of soluble and/or insoluble dietary fibre.
2.1v	Identify common conditions and diseases associated with low dietary fibre intake. <i>Limited to: Diverticulitis, haemorrhoids, constipation, and colon cancer.</i>
2.2v	List common conditions and diseases associated with low dietary fibre intake. <i>Limited to: Diverticulitis, haemorrhoids, constipation, and colon cancer.</i>
2.3v	Explain conditions and diseases associated with low dietary fibre intake. <i>Limited to: Diverticulitis, haemorrhoids, constipation.</i>
2.2w	State the importance of drinking liquids when consuming dietary fibre rich foods.
2.2x	Recommend ways how to include dietary fibre in the diet.
Fats	
2.1y	List the different types of fat based on their source. <i>Animal and Plant</i>
2.2y	Classify fats into animal and plant food sources.
2.3y	Distinguish between saturated, monounsaturated, polyunsaturated, and trans fats.
2.1z	List sources of food rich in invisible and visible fat.
2.3z	Give examples of food sources which are rich in each saturated, monounsaturated, polyunsaturated, and trans fats.
2.2aa	Define the term essential fatty acids.
2.3aa	Classify sources of essential fatty acids into the two main groups. <i>Omega 3 fatty acids and Omega 6 fatty acids.</i>
2.1ab	Identify diet-related health problems when consuming too much fat in the diet. <i>High blood cholesterol, coronary heart disease (CHD), obesity.</i>
2.2ab	Describe the main health-related conditions when consuming too much fat in the diet.

2.3ab	Explain the relationship between saturated and trans-fat intake and high blood cholesterol levels, heart disease and obesity.
Vitamins	
2.1ac	Identify water-soluble and fat-soluble vitamins.
2.2ac	Classify vitamins into water-soluble and fat-soluble.
2.3ac	Explain the difference between water-soluble and fat-soluble vitamins.
2.1ad	Identify rich food sources in each of the following: <i>Vitamin A, Vitamin D, Vitamin C.</i>
2.2ad	Outline the main function/s of each vitamin. <i>Vitamin A, Vitamin D, Vitamin E, Vitamin K, Vitamin C and Vitamin B group.</i>
2.3ad	Name the food sources rich in each of the following: <i>Vitamin A (Retinol and Beta-Carotene), Vitamin D, Vitamin E, Vitamin K, Vitamin B (Folic Acid and Vitamin B12), Vitamin C (Ascorbic Acid).</i>
2.1ae	Associate signs and symptoms with vitamins-related deficiency diseases or conditions. <i>Night blindness, rickets, scurvy.</i>
2.2ae	Describe signs and symptoms associated with vitamins-related deficiency diseases or conditions. <i>Night blindness, rickets, scurvy</i>
2.3ae	Explain the main functions of the B-Complex Vitamins. <i>Folic Acid and Vitamin B12.</i>
2.3af	Distinguish between beta-carotene and retinol.
2.1ag	Identify antioxidant vitamins. <i>Vitamin A, Vitamin C, Vitamin E.</i>
2.2ag	List antioxidant vitamins. <i>Vitamin A, Vitamin C, Vitamin E.</i>
2.3ag	Justify the role of antioxidant vitamins to preserve health. <i>E.g. reduce risk of heart disease and cancers, reduce the severity of colds, reduce age-related vision impairment.</i>
2.1ah	Identify the vitamins that can be harmful to our health when consumed in excess. <i>Vitamin A, Vitamin D.</i>
2.3ah	Explain the effects of excess intake and/or deficiency for each of the vitamins (where applicable). <i>Vitamin A, Vitamin D, Vitamin E, Vitamin K, Vitamin B (Folic Acid and Vitamin B12), Vitamin C.</i>
2.1ai	Name the vitamins which aid the absorption of minerals. <i>Vitamin C and Iron, Vitamin D and Calcium.</i>
2.2ai	List the main vitamin which needs to be consumed before and during pregnancy.

2.3ai	State the link between vitamin D intake and the absorption of calcium; vitamin C intake and the absorption of iron; vitamin B-complex intake and the release of energy from carbohydrates; folic acid intake and neural tube defects e.g. spina bifida
2.2aj	Recommend ways how to preserve water-soluble vitamins during the preparation, cooking and serving of food.
2.3aj	Explain the effects of preparation, cooking/heating, storage, and time on Vitamin C and Vitamin B-complex. <i>E.g. losses during cooking, cutting of vegetables and fruit, washing of fruits and vegetables (Vitamin C loss) and rice (Vitamin B loss) with water or exposing food sources to air after cutting for long periods of time.</i>
Minerals	
2.1ah	Identify the minerals that can be harmful to our health when consumed in excess. <i>Calcium and Iron.</i>
2.2ak	Outline the main function/s of the following minerals: <i>Calcium, sodium, iron, phosphorus, iodine, and fluoride.</i>
2.2al	Give examples of the main sources of the following minerals: <i>Calcium, sodium, iron, phosphorus, iodine, and fluoride.</i>
2.1am	Associate signs and symptoms with minerals-related deficiency diseases or conditions.
2.2am	Describe signs and symptoms associated with minerals-related deficiency diseases or conditions. <i>Osteoporosis, rickets, hypotension, anaemia.</i>
2.2an	Outline the effects of excess of the following minerals: Calcium, sodium, iron, and fluoride
2.1ao	Identify groups of people with specific requirements for minerals. <i>Children, teenagers, pregnant women, breastfeeding mothers, and the elderly.</i>
2.2ao	Describe why groups of people have specific requirements for minerals.
2.3ao	Justify why certain groups of people have specific requirements for minerals in given scenarios.
2.2ap	Recommend ways of increasing calcium and iron, and reducing sodium intake in the diet.
Water	
2.1aq	Identify the main functions of water in the body.
2.3aq	Describe the functions of water in the body.
2.1ar	List the best sources of water in the diet.
2.2ar	Describe ways how water is lost from the body.
2.3ar	Explain the effect of dehydration.
2.1as	State the daily requirements of water.

	<i>Note: Refer to EFSA recommendations.</i>
2.2as	List groups of people who require higher intakes of water. <i>Active persons, people living in a hot climate, people working in a hot environment, people inside for a long time in a dry environment (E.g. with ACs), pregnant and lactating women.</i>
2.3as	Explain why certain groups of people require higher intakes of water.
LO 3 - I can demonstrate an understanding of different types of food commodities (coursework and controlled)	
	
BLO 3.1 - I can relate food commodities to their characteristics, sources, nutritional value, versatility, use, and storage.	
<i>Food Commodity: Eggs</i>	
3.1a	Name food commodities or groups. <i>Eggs.</i>
3.2a	Give examples of different types of foods for each food commodity or group available on the market. <i>Eggs.</i>
3.3a	Outline the nutritional value of the main food commodities or groups and the main foods within each of these. <i>Eggs.</i>
3.2b	Describe different uses and storage for the different food commodities.
3.3b	Discuss the versatility of different food commodities.
3.1d	Identify recipes that use a given food commodity as a main ingredient.
3.2d	Recommend recipes which are in line with the national dietary guidelines that use the given food commodity as a main ingredient.
3.3d	Justify the use of different food commodities in the planning of meals.
3.2e	Recommend suitable methods of cooking for each of the food commodities.
3.3f	Explain the effect of dry and/or moist heat and changes during cooking for the different food commodities. <i>Coagulation.</i>
3.2g	Suggest points to keep in mind when choosing, buying, storing, preserving, and cooking different food commodities.
3.1u	Identify the different parts of an egg. <i>Shell, white, yolk and air-space.</i>
3.2u	Label the different parts of an egg on a given diagram. <i>Shell, white, yolk and air-space, membrane.</i>
3.3u	Explain the function of the different parts of an egg. <i>Shell, white, yolk and air-space, membrane.</i>

3.3v	Explain the difference between battery, barn, free-range and organic hens, and eggs, with reference to the environmental impact and quality of eggs.
3.1w	Name different sources of eggs. <i>E.g. hen, duck, quail.</i>
3.2w	Explain why eggs should not be washed before storage.
3.3w	Explain the grading of eggs with reference to quality and weight.
3.1x	Identify whether an egg is fresh or stale.
3.2x	Describe ways of testing an egg for freshness. <i>Note: A demonstration is to be carried out.</i>
3.3x	Explain the characteristics of a fresh and/or a stale egg with reference to the changes affecting the different parts. <i>White, yolk and air space.</i>
Food Commodity: Fish	
3.1a	Name food commodities or groups. <i>Fish</i>
3.2a	Give examples of different types of foods for each food commodity or group available on the market. <i>Fish. Note – include local produce within each food commodity. Emphasise seasonality.</i>
3.3a	Outline the nutritional value of the main food commodities or groups and the main foods within each of these. <i>Fish.</i>
3.2b	Describe different uses and storage for the different food commodities.
3.3b	Discuss the versatility of different food commodities.
3.1d	Identify recipes that use a given food commodity as the main ingredient.
3.2d	Recommend recipes that are in line with the national dietary guidelines that use the given food commodity as a main ingredient.
3.3d	Justify the use of different food commodities in the planning of meals.
3.2e	Recommend suitable methods of cooking for each of the food commodities.
3.3f	Explain the effect of dry and/or moist heat and changes during cooking for the different food commodities. <i>Coagulation, denaturation.</i>
3.2g	Suggest points to keep in mind when choosing, buying, storing, preserving and cooking different food commodities.
3.1p	Name different types of fish. <i>Whitefish, oily fish, and shellfish.</i>
3.2p	Classify fish according to the type and/or source and/or nutritional value, giving an example of each. <i>White, oily and shellfish.</i> <i>Farmed, saltwater (demersal and pelagic), freshwater.</i>

3.3p	Explain how wild and farmed fish differ with respect to nutritional value and/or sustainability.
3.2q	List the characteristics of fresh fish.
3.3q	Explain the proper way of storing and freezing fresh fish.
Food Commodity: Herbs and Spices	
3.1a	Name food commodities or groups. <i>Herbs and spices.</i>
3.2a	Give examples of different types of foods for each food commodity or group available on the market. <i>Herbs and spices.</i>
3.3a	Outline the nutritional value of the main food commodities or groups and the main foods within each of these. <i>Herbs and spices.</i>
3.2b	Describe different uses and storage for the different food commodities.
3.3b	Discuss the versatility of different food commodities.
3.1d	Identify recipes that use a given food commodity as the main ingredient.
3.2d	Recommend recipes which are in line with the national dietary guidelines that use the given food commodity as a main ingredient.
3.3d	Justify the use of different food commodities in the planning of meals.
3.2e	Recommend suitable methods of cooking for each of the food commodities.
3.2g	Suggest points to keep in mind when choosing, buying, storing, preserving and cooking different food commodities.
3.1ae	Identify different types of herbs and spices. <i>Bay leaf, parsley, mint, dill, sage, rosemary, fennel, oregano, basil, thyme, curry powder, cinnamon, paprika, clove, black pepper, cumin, ginger, saffron, nutmeg, mustard seeds.</i>
3.2ae	Demonstrate the use of herbs and spices in practical sessions. <i>Note: It is recommended that students are exposed to the different herbs and spices in different practical sessions throughout the course of study.</i>
Food Commodity: Cereals, Pulses, Nuts and Seeds	
3.1a	Name food commodities or groups. <i>Cereals, pulses, nuts, seeds.</i>
3.2a	Give examples of different types of foods for each food commodity or group available on the market. <i>Cereals, pulses, nuts, seeds.</i>
3.3a	Outline the nutritional value of the main food commodities or groups and the main foods within each of these. <i>Cereals, pulses, nuts, seeds.</i>
3.2b	Describe different uses and storage for the different food commodities.
3.3b	Discuss the versatility of different food commodities.

3.1d	Identify recipes that use a given food commodity as a main ingredient.
3.2d	Recommend recipes that are in line with the national dietary guidelines that use the given food commodity as a main ingredient.
3.3d	Justify the use of different food commodities in the planning of meals.
3.2e	Recommend suitable methods of cooking for each of the food commodities.
3.3f	Explain the effect of dry and/or moist heat and changes during cooking for the different food commodities. <i>Dextrinization.</i>
3.2g	Suggest points to keep in mind when choosing, buying, storing, preserving, and cooking different food commodities.
3.1h	Name different types of cereals. <i>Oats, barley, wheat, rye, rice, maize, quinoa.</i>
3.1i	Identify the different parts of the wheat grain on a given diagram.
3.2i	Label the diagram of the structure of the wheat grain.
3.3i	Draw a labelled diagram of the structure of the wheat grain.
3.1j	Classify refined and unrefined cereals and cereal products.
3.2j	Outline the importance of choosing unrefined cereals and cereal products.
3.3j	Explain the difference between wholemeal, wheat meal, wholegrain, and multigrain.
3.1z	List different pulses. <i>Lentils, peas, split peas, chickpeas, beans.</i>
3.2z	Define pulses, giving examples.
3.3z	Outline the importance of including pulses and/or nuts when preparing meals for vegans and vegetarians and in line with sustainability principles.
3.2aa	Explain why some pulses should be soaked in water for several hours.
3.3aa	Explain why it is important to cook red kidney beans thoroughly.
3.1ab	Identify different types of nuts. <i>Peanuts (legume), walnuts, Brazil nuts, cashews, pecans, pistachio, hazelnuts, almonds, chestnuts.</i>
3.1ac	Give examples of different nuts.
3.3ac	Classify lower fat and higher fat nuts and nuts high in omega-3 fatty acids. <i>Low fat: chestnuts,</i> <i>High fat: Brazil nuts, pecans,</i> <i>Rich in omega-3 fatty acids: walnuts.</i>
3.1ad	Give examples of different seeds. <i>Sunflower, pumpkin, sesame, chia seeds.</i>
3.2ad	Demonstrate the use of seeds in practical sessions.
Food Commodity: Milk and Milk Products	
3.1a	Name food commodities or groups. <i>Milk, dairy products.</i>

3.2a	Give examples of different types of foods for each food commodity or group available on the market. <i>Milk, dairy products. Note – include local produce within each food commodity E.g. gbejniet and irkotta.</i>
3.3a	Outline the nutritional value of the main food commodities or groups and the main foods within each of these. <i>Milk, dairy products.</i>
3.2b	Describe different uses and storage for the different food commodities.
3.3b	Discuss the versatility of different food commodities.
3.1d	Identify recipes that use a given food commodity as a main ingredient.
3.2d	Recommend recipes that are in line with the national dietary guidelines that use the given food commodity as a main ingredient.
3.3d	Justify the use of different food commodities in the planning of meals.
3.2e	Recommend suitable methods of cooking for each of the food commodities.
3.3f	Explain the effect of dry and/or moist heat and changes during cooking for the different food commodities. <i>Coagulation.</i>
3.2g	Suggest points to keep in mind when choosing, buying, storing, preserving, and cooking different food commodities.
3.1k	Select different types of milk based on their fat content. <i>Whole, semi-skimmed (low-fat), skimmed.</i>
3.2k	List different types of milk. <i>Fresh, UHT, evaporated, condensed, dried.</i> <i>Lactose free.</i>
3.3k	Compare and contrast different types of milk. <i>Whole, semi-skimmed, skimmed</i> <i>Fresh, UHT, evaporated, condensed, dried,</i> <i>Lactose free.</i> <i>Note: Nutritional value, texture, colour, shelf-life, heat treatment.</i>
3.1l	Identify different types of non-dairy milk. <i>Soya, rice, oats, almond and coconut.</i>
3.2l	List different types of non-dairy milk.
3.3l	Explain the benefits of non-dairy milk for different groups of people. <i>E.g. vegan, lactose intolerant, cow protein allergy.</i>
3.1m	Identify alternatives to cow's milk for people who are lactose intolerant.
3.2m	Suggest the type/s of milk suitable for different groups of people and situations. <i>Toddlers, elderly, persons suffering from high blood cholesterol, vegan, lactose-intolerant.</i>
3.3m	Justify the suitability of different types of milk in different scenarios.

3.2n	Explain why milk is heat-treated at different temperatures.
3.3n	Explain how the heat (pasteurisation, sterilisation (UHT)) and physical treatment (homogenisation) of milk, affect its nutritional value, texture, flavour, and shelf life.
3.1o	Name products made from milk. <i>Yoghurt, cheese, irkotta and ricotta, mozzarella, ġbejniet.</i>
3.2o	Define bio-yoghurts and/or yoghurt drinks.
3.3o	Explain the health benefits of bio-yoghurts and/or yoghurt drinks.
LO 4 - I can demonstrate a broad understanding of food production, processing, preservation, and labelling (coursework and controlled)	
	
BLO 4.1 - I can demonstrate hygiene and safety practices in the Food Lab.	
<i>Hygiene and Safety in the Food Lab</i>	
4.1al	List rules for maintaining personal cleanliness and hygiene practices in the food lab.
4.2al	Explain the importance of personal cleanliness and hygiene practices in the food lab.
5.1bf	Identify practices for personal cleanliness and/or hygiene in the food lab.
5.2bf	List rules for maintaining personal cleanliness and/or hygiene in the food lab.
5.3bf	Explain the importance of personal cleanliness and/or hygiene in the food lab.
5.1bg	Identify safety practices in the food lab.
5.2bg	List safety practices in the food lab.
5.3bg	Explain the importance of safety practices in the food lab.
LO 5 - I can demonstrate the ability to accurately plan, produce and evaluate a variety of sensorially appealing healthy food items and meals (coursework and controlled)	
	
BLO 5.1 - I can practice recipe engineering in the planning and production of meals.	
<i>Recipe Engineering; Traditional Maltese Dishes</i>	
5.1m	State the importance of recipe modification.
5.2m	Outline factors to keep in mind when modifying recipes.
5.1n	Suggest ways how to reduce fat, salt, and sugar in the diet.
5.2n	Adapt recipes to make them suitable for particular diet/s. <i>High-fibre diets, high-iron diets, high-calcium diets, low-fat diets, low-sugar diets, low-salt diets, and low-calorie diets.</i>
5.3n	Evaluate original and/or modified recipes in terms of various characteristics (e.g. colour, texture, flavour, keeping qualities, volume, appearance of the dish). <i>Limited to: recipes of short crust pastry, rubbed in cakes, pasta and rice dishes.</i>

5.1o	List a variety of savoury and sweet Maltese traditional dishes.
5.2o	Suggest key ingredients and/or healthier alternatives used in traditional Maltese dishes.
5.3o	Apply the concept of recipe engineering to provide healthier alternatives to traditional Maltese recipes.
BLO 5.2 - I can plan, prepare, serve, and evaluate appropriate food items and meals.	
<i>The Preparation Sheet</i>	
5.1ax	Sequence the key steps involved in the preparation, production, and evaluation of a practical session. <i>Choosing dishes, stating reasons for choice, listing equipment, and utensils needed, indicating the order of work, producing the dishes, evaluating the dishes produced and one's performance during the session.</i>
5.2ax	Outline the steps involved in the preparation, production, and evaluation of a practical session. <i>Note: Choosing dishes according to assignment set; explaining reasons for the choice made; listing of equipment and utensils required; planning the order of work; preparing oneself and all food, equipment, and utensils to start working; producing the food; presenting the food; evaluating the food and one's performance during the session.</i>
5.2ay	Choose dishes that meet the requirements according to the assignment given whilst adhering to National Dietary Guidelines with some use of fresh, seasonal, and local food.
5.1az	Identify ingredients and quantities required for a given recipe.
5.2az	Calculate the required quantity of ingredients for a given assignment.
5.2ba	Suggest reasons for choice with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of the dish, variety of colour, texture and flavour, skills involved.</i>
5.3ba	Justify reasons for choices made with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of the dish, variety of colour, texture, and flavour, skills involved, serving temperature, modifications carried out, traditional value (if applicable), and equipment used.</i>
5.1bb	Select the utensils needed to prepare a particular recipe.
5.2bb	List the utensils needed to prepare a particular recipe.
5.1bc	Sequence the steps involved in the order of work for practical food assignments.
5.2bc	Outline a logical sequenced order of work for a given assignment.
5.3bc	Develop a Preparation Sheet for a given practical assignment detailing the organisation of work and allocation of time for each step.
5.2bo	Evaluate the finished food product in terms of appropriate outcomes.

	<i>Appearance, colour, texture, garnish, decoration, serving temperature, serving dishes and cutlery, and overall presentation.</i>
5.3bo	Analyse the creative element in the final product and/or presentation.
5.2bp	Recommend improvements to the overall performance reflecting on the process and outcome.
5.3bp	Recommend improvements to the overall performance reflecting on the process, outcome, efficiency, cost, and sustainability.
Demonstration and Preparation for Practical (Food Commodity)	
3.2c	Demonstrate the use of different food commodities in cooking. <i>Note: Include a minimum of ONE practical session using one or more food commodities.</i>
3.1d	Identify recipes that use a given food commodity as the main ingredient.
3.2d	Recommend recipes that are in line with the national dietary guidelines that use the given food commodity as the main ingredient.
3.3d	Justify the use of different food commodities in the planning of meals.
5.1be	Identify the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, lining of tins, liquidising, blending of mixtures.</i> Each practical should focus on specific skills from the list provided.
5.2be	Carry out the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, mixing, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, binding of mixtures, lining of tins, liquidising, blending of mixtures, using pastry to line dishes, and sauce making.</i> <i>Note: The skills are to be addressed in different practical assignments throughout the course of study.</i> Each practical should focus on specific skills from the list provided.
Practical Assignment on one or a combination of the following Food Commodities: Eggs; Fish; Cereals, Pulses, Nuts, and Seeds; Herbs and Spices; Milk and Dairy Products	
3.2c	Demonstrate the use of different food commodities in cooking. <i>Note: Include a minimum of ONE practical session using one or more food commodities.</i>
5.1ax	Sequence the key steps involved in the preparation, production and evaluation of a practical session. <i>Choosing dishes, stating reasons for choice, listing equipment and utensils needed, indicating the order of work, producing the dishes, evaluating the dishes produced and one's performance during the session.</i>
5.2ax	Outline the steps involved in the preparation, production, evaluation of a practical session.

	<i>Note: Choosing dishes according to assignment set; explaining reasons for choice made; listing of equipment and utensils required; planning the order of work; preparing oneself and all food, equipment and utensils to start working; producing the food; presenting the food; evaluating the food and one's performance during the session.</i>
5.1ay	Choose dishes that meet the requirements according to the assignment given whilst adhering to National Dietary Guidelines with some use of fresh, seasonal and local food.
5.1az	Identify ingredients and quantities required for a given recipe.
5.2az	Calculate the required quantity of ingredients for a given assignment.
5.2ba	Suggest reasons for choice with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of dish, variety of colour, texture and flavour, skills involved.</i>
5.3ba	Justify reasons for choices made with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of dish, variety of colour, texture and flavour, skills involved, serving temperature, modifications carried out, traditional value (if applicable) and equipment used.</i>
5.1bb	Select the utensils needed to prepare a particular recipe.
5.2bb	List the utensils needed to prepare a particular recipe.
5.1bc	Sequence the steps involved in the order of work for practical food assignments.
5.2bc	Outline a logical sequenced order of work for a given assignment.
5.3bc	Develop a Preparation Sheet for a given practical assignment detailing organisation of work and allocation of time for each step.
5.1bd	Choose the appropriate equipment to weigh and measure a given list of ingredients.
5.2bd	Weigh and measure solid and liquid ingredients accurately using a range of different utensils such as weighing scales, measuring cups, measuring spoons and jugs.
5.1be	Identify the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, lining of tins, liquidizing, blending of mixtures.</i> Each practical should focus on specific skills from the list provided.
5.2be	Demonstrate the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, mixing, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, binding of mixtures, lining of tins, liquidizing, blending of mixtures, using pastry to line dishes, and sauce making.</i>

	<i>Note: The skills are to be addressed in different practical assignments throughout the course of study.</i> Each practical should focus on specific skills from the list provided.
5.2bh	Carry out a practical task for a given scenario adhering to correct hygiene and safety principles and time-frames. <i>Note: This includes planning, preparing, demonstrating, presenting, and storing of food (as applicable).</i>
5.3bh	Carry out a practical task accurately, efficiently, and sustainably. <i>Adherence to personal and food lab hygiene principles; personal and food safety; appropriate selection and organisation of equipment, correct performance of skills and handling of equipment; efficient organisation of preparation area, work and time; use of resources with minimal impact on the natural environment; disposal of waste.</i>
5.2bj	Prepare meals using the following commodities: <i>Meat, fish, poultry, milk, dairy products, fruit, vegetables, cereals, herbs, spices, pulses, nuts, and eggs.</i>
5.3bj	Justify decisions made in the choice and preparation of different food commodities.
5.2bk	Demonstrate practices to minimise food waste.
5.3bk	Demonstrate the use of leftovers to create tasty and aesthetically appealing dishes and drinks for a given context in line with the National Dietary Guidelines.
5.2bl	Demonstrate the proper care of work surfaces, utensils, and equipment in the food lab so their lifespan is maximised.
5.2bm	Carry out the washing up in a logical, efficient, effective, safe, and environment-friendly way.
5.1bn	Demonstrate the basic correct placement of cutlery and a glass for a simple meal.
5.2bn	Serve dishes attractively garnished and/or decorated on a correctly laid table with an informal or formal setting.
5.2bo	Evaluate the finished food product in terms of appropriate outcome. <i>Appearance, colour, texture, garnish and decoration, serving temperature, serving dishes and cutlery, and overall presentation.</i>
5.3bo	Analyse the creative element in the final product and/or presentation.
5.2bp	Recommend improvements to the overall performance reflecting on the process and outcome.
5.3bp	Recommend improvements to the overall performance reflecting on the process, outcome, efficiency, cost, and sustainability.
BLO 5.3 - I can present food in a variety of appealing ways.	
<i>Food Presentation</i>	

5.1bn	Demonstrate the basic correct placement of cutlery and a glass for a simple meal.
5.2bn	Serve dishes attractively garnished and/or decorated on a correctly laid table with an informal or formal setting.
BLO 5.4 - I can demonstrate the skills for making shortcrust pastry.	
<i>Shortcrust Pastry (Theory and Demonstration)</i>	
5.1ah	Identify the ingredients required to make shortcrust pastry.
5.2ah	List the ingredients including proportions required to make shortcrust pastry.
5.3ah	Explain the function of the different ingredients in the making of shortcrust pastry.
5.1ai	Identify the basic steps in the process of making shortcrust pastry.
5.2ai	Describe the basic steps in the process of making shortcrust pastry.
5.2 aj	Perform the basic steps in the process of making shortcrust pastry.
5.3 aj	Explain the basics steps in the process of making shortcrust pastry.
5.2ak	Outline the main rules to follow when making shortcrust pastry.
5.3ak	Suggest possible faults that may occur in the process of making shortcrust pastry indicating causes and/or how these can be prevented.
5.1al	Decorate pastry dishes in a simple way.
5.2al	Suggest healthy, sweet, and savoury recipes that could be prepared using shortcrust pastry.
5.3al	Modify recipes for dishes using shortcrust pastry in line with the National Dietary Guidelines.
5.1am	Identify terms used in the making of pastry. <i>Sifting, rubbing-in, kneading, rolling out.</i>
5.2am	Define the terms kneading and rolling out.
5.3am	Explain why shortcrust pastry is the healthiest choice when using pastry to make pastry dishes.
5.2an	Demonstrate accurately the rubbing-in skill to make a basic pastry mixture.
5.3an	Produce a pie/tartlets/pastries using shortcrust pastry showing correct binding, kneading, rolling out, cutting, shaping, and lining.
<i>Shortcrust Pastry Practical Assignment</i>	
5.1ax	Sequence the key steps involved in the preparation, production and evaluation of a practical session. <i>Choosing dishes, stating reasons for choice, listing equipment and utensils needed, indicating the order of work, producing the dishes, evaluating the dishes produced and one's performance during the session.</i>
5.2ax	Outline the steps involved in the preparation, production, evaluation of a practical session. <i>Note: Choosing dishes according to assignment set; explaining reasons for choice made; listing of equipment and utensils required; planning the order of</i>

	<i>work; preparing oneself and all food, equipment and utensils to start working; producing the food; presenting the food; evaluating the food and one's performance during the session.</i>
5.2ay	Choose dishes that meet the requirements according to the assignment given whilst adhering to National Dietary Guidelines with some use of fresh, seasonal and local food.
5.1az	Identify ingredients and quantities required for a given recipe.
5.2az	Calculate the required quantity of ingredients for a given assignment.
5.2ba	Suggest reasons for choice with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of dish, variety of colour, texture and flavour, skills involved.</i>
5.3ba	Justify reasons for choices made with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of dish, variety of colour, texture and flavour, skills involved, serving temperature, modifications carried out, traditional value (if applicable) and equipment used.</i>
5.1bb	Select the utensils needed to prepare a particular recipe.
5.2bb	List the utensils needed to prepare a particular recipe.
5.1bc	Sequence the steps involved in the order of work for practical food assignments.
5.2bc	Outline a logical sequenced order of work for a given assignment.
5.3bc	Develop a Preparation Sheet for a given practical assignment detailing organisation of work and allocation of time for each step.
5.1bd	Choose the appropriate equipment to weigh and measure a given list of ingredients.
5.2bd	Weigh and measure solid and liquid ingredients accurately using a range of different utensils such as weighing scales, measuring cups, measuring spoons and jugs.
5.1be	Identify the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing, and measuring, beating, whisking, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, lining of tins, liquidizing, blending of mixtures.</i> Each practical should focus on specific skills from the list provided.
5.2be	Demonstrate the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, mixing, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, binding of mixtures, lining of tins, liquidizing, blending of mixtures, using pastry to line dishes, and sauce making.</i> <i>Note: The skills are to be addressed in different practical assignments throughout the course of study.</i>

	Each practical should focus on specific skills from the list provided.
5.2bh	Carry out a practical task for a given scenario adhering to correct hygiene and safety principles and time-frames. <i>Note: This includes planning, preparing, demonstrating, presenting, and storing of food (as applicable).</i>
5.3bh	Carry out a practical task accurately, efficiently, and sustainably. <i>Adherence to personal and food lab hygiene principles; personal and food safety; appropriate selection and 35iquidizing35 of equipment, correct performance of skills and handling of equipment; efficient 35iquidizing35 of preparation area, work, and time; use of resources with minimal impact on the natural environment; disposal of waste.</i>
5.2bk	Demonstrate practices to 35iquidiz food waste.
5.3bk	Demonstrate the use of leftovers to create tasty and aesthetically appealing dishes and drinks for a given context in line with the National Dietary Guidelines.
5.2bl	Demonstrate the proper care of work surfaces, utensils, and equipment in the food lab so their lifespan is 35iquidizi.
5.2bm	Carry out the washing up in a logical, efficient, effective, safe, and environment-friendly way.
5.1bn	Demonstrate the basic correct placement of cutlery and a glass for a simple meal.
5.2bn	Serve dishes attractively garnished and/or decorated on a correctly laid table with an informal or formal setting.
5.2bo	Evaluate the finished food product in terms of appropriate outcome. <i>Appearance, colour, texture, garnish and decoration, serving temperature, serving dishes and cutlery and overall presentation.</i>
5.3bo	Analyse the creative element in the final product and/or presentation.
5.2bp	Recommend improvements to the overall performance reflecting on the process and outcome.
5.3bp	Recommend improvements to the overall performance reflecting on the process, outcome, efficiency, cost, and sustainability.
BLO 5.5 – I can plan and carry out the whisking method of cake making.	
<i>Cake-Making Methods</i>	
5.1x	List the following methods of cake-making: <i>Rubbing-in, whisking method.</i>
5.1y	Identify the steps involved in a cake-making method.: <i>Limited to: Rubbing-in method, whisking method.</i>
5.2y	Give the basic recipe of a cake-making method.: <i>Limited to: Rubbing-in method, whisking method.</i> <i>Recipe to include: list of ingredients, quantities, and steps of method.</i>

5.3y	Describe the properties and/or role of the ingredients used for a cake-making method. <i>Limited to: Rubbing-in method, whisking method.</i>
5.2z	Perform the steps of a cake-making method. <i>Limited to: Rubbing-in method, whisking method.</i>
5.3z	Explain the function of the following processes in a cake-making method. <i>Limited to: sieving, beating, whisking, folding, and rubbing-in.</i>
5.1aa	Identify the terms sieving, rubbing-in, binding, dry ingredients, and liquid ingredients.
5.3aa	Outline the main rules to follow when preparing a cake-making method: <i>Limited to: Rubbing-in method, whisking method.</i>
5.3ab	Suggest possible faults that may occur in the process of the different methods of cake-making, indicating causes how these can be prevented.
5.2ac	Suggest ways of increasing dietary fibre, reducing sugar and fat in cake-making.
5.3ac	Explain the effects on the shelf-life when preparing cakes using the different methods.
5.1ao	Identify mechanical, biological, and chemical raising agents. <i>E.g. whisking to introduce air, sieving to introduce air (mechanical); yeast (biological), baking powder, bicarbonate of soda (chemical).</i>
5.2ao	Explain how air is typically introduced into the cake mixture and/or dough to act as a raising agent.
5.3ao	Distinguish between mechanical, biological, and chemical raising agents, giving examples of each.
5.1ap	Identify different raising agents. <i>Baking powder, baking soda, yeast, and air/steam.</i>
5.2ap	Describe the function of raising agents in cake making and yeast cookery.
5.3ap	Explain how each raising agent works. <i>Baking powder, baking soda, yeast, and air/steam.</i>
Whisking Method (Theory and Demonstration)	
5.1ad	Identify the terms whisking, ribbon-texture and folding-in.
5.2ad	Define the terms whisking, ribbon texture and folding-in.
5.2ae	Prepare a sponge mixture to make a flan or a Swiss roll using the whisking method.
5.3ae	Justify the use of the whisking method of cake making for individuals following a particular diet.
5.1af	Identify different healthy fillings used for cakes prepared by the whisking method.
5.2af	Suggest different fillings used for cakes prepared by the whisking method keeping the dietary guidelines in mind.

5.3af	Evaluate the nutritional value of cakes (including their fillings) prepared using different methods.
5.2ag	Decorate cakes using healthy ingredients such as fresh irkotta or ricotta, nuts, fresh and dried fruit and yoghurt.
Whisking Method Practical Assignment	
5.2z	Perform the steps of a cake-making method. <i>Limited to: Rubbing-in method, whisking method.</i>
5.3z	Explain the function of the following processes in a cake-making method. <i>Limited to: sieving, beating, whisking, folding, and rubbing in.</i>
5.2ae	Prepare a sponge mixture to make a flan or a Swiss roll using the whisking method.
5.3ae	Justify the use of the whisking method of cake making for individuals following a particular diet.
5.2ag	Decorate cakes using healthy ingredients such as fresh irkotta or ricotta, nuts, fresh and dried fruit and yoghurt.
5.1ax	Sequence the key steps involved in the preparation, production and evaluation of a practical session. <i>Choosing dishes, stating reasons for choice, listing equipment and utensils needed, indicating the order of work, producing the dishes, evaluating the dishes produced and one's performance during the session.</i>
5.2ax	Outline the steps involved in the preparation, production, evaluation of a practical session. <i>Note: Choosing dishes according to assignment set; explaining reasons for choice made; listing of equipment and utensils required; planning the order of work; preparing oneself and all food, equipment and utensils to start working; producing the food; presenting the food; evaluating the food and one's performance during the session.</i>
5.2ay	Choose dishes that meet the requirements according to the assignment given whilst adhering to National Dietary Guidelines with some use of fresh, seasonal and local food.
5.1az	Identify ingredients and quantities required for a given recipe.
5.2az	Calculate the required quantity of ingredients for a given assignment.
5.2ba	Suggest reasons for choice with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of dish, variety of colour, texture and flavour, skills involved.</i>
5.3ba	Justify reasons for choices made with reference to the assignment given. <i>Suitability, time available, nutritional value, seasonality, use of local and fresh food, cost of dish, variety of colour, texture and flavour, skills involved, serving temperature, modifications carried out, traditional value (if applicable) and equipment used.</i>

5.1bb	Select the utensils needed to prepare a particular recipe.
5.2bb	List the utensils needed to prepare a particular recipe.
5.1bc	Sequence the steps involved in the order of work for practical food assignments.
5.2bc	Outline a logical sequenced order of work for a given assignment.
5.3bc	Develop a Preparation Sheet for a given practical assignment detailing liquidising of work and allocation of time for each step.
5.1bd	Choose the appropriate equipment to weigh and measure a given list of ingredients.
5.2bd	Weigh and measure solid and liquid ingredients accurately using a range of different utensils such as weighing scales, measuring cups, measuring spoons and jugs.
5.1be	Identify the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, lining of tins, liquidising, blending of mixtures.</i> Each practical should focus on specific skills from the list provided.
5.2be	Carry out the following skills: <i>Peeling, chopping, slicing, dicing, grating, weighing and measuring, beating, whisking, mixing, sieving, greasing, mashing, rubbing-in, kneading, folding-in, rolling out, binding of mixtures, lining of tins, liquidizing, blending of mixtures, using pastry to line dishes, and sauce making.</i> <i>Note: The skills are to be addressed in different practical assignments throughout the course of study.</i> Each practical should focus on specific skills from the list provided.
5.2bh	Carry out a practical task for a given scenario adhering to correct hygiene and safety principles and time-frames. <i>Note: This includes planning, preparing, demonstrating, presenting and storing food (as applicable).</i>
5.3bh	Carry out a practical task accurately, efficiently and sustainably. <i>Adherence to personal and food lab hygiene principles; personal and food safety; appropriate selection and organisation of equipment, correct performance of skills and handling of equipment; efficient organisation of preparation area, work, and time; use of resources with minimal impact on the natural environment; disposal of waste.</i>
5.2bk	Demonstrate practices to minimise food waste.
5.3bk	Demonstrate the use of leftovers to create tasty and aesthetically appealing dishes and drinks for a given context in line with the National Dietary Guidelines.

5.2bl	Demonstrate the proper care of work surfaces, utensils, and equipment in the food lab so their lifespan is maximised.
5.2bm	Carry out the washing up in a logical, efficient, effective, safe, and environment-friendly way.
5.1bn	Demonstrate the basic correct placement of cutlery and a glass for a simple meal.
5.2bn	Serve dishes attractively garnished and/or decorated on a correctly laid table with an informal or formal setting.
5.2bo	Evaluate the finished food product in terms of appropriate outcome. <i>Appearance, colour, texture, garnish, and decoration, serving temperature, serving dishes and cutlery and overall presentation.</i>
5.3bo	Analyse the creative element in the final product and/or presentation.
5.2bp	Recommend improvements to the overall performance reflecting on the process and outcome.
5.3bp	Recommend improvements to the overall performance reflecting on the process, outcome, efficiency, cost, and sustainability.

LO 6 - I can demonstrate the ability to critically, sensitively, and creatively understand and address issues related to the family, community and the environment (coursework and controlled)

BLO 6.1 – I can discuss issues related to the family unit, childcare, and development.

The Family Unit

6.1a	List the different forms of families. <i>Nuclear, extended, single parent, cohabitation, adoptive, blended, foster, couple without children.</i>
6.2a	Describe different forms of families.
6.3a	Compare and contrast the different forms of families. <i>E.g. adoptive and foster, nuclear and extended.</i>
6.2b	State the roles and responsibilities of individuals within a family.
6.3b	Discuss stereotypes associated with gender and roles within the family. <i>Personality traits, physical appearance, home management and childcare roles, jobs, and careers.</i>
6.1c	List the factors affecting family life and family relationships. <i>E.g. income, employment, number of family members, health of family members, housing.</i>
6.2c	Outline the basic intellectual, social, emotional, environmental, and occupational needs of families.
6.3c	Discuss possible challenges faced by families and ways of managing them.

	<i>E.g. new child in the family, illness, death, separation/divorce, blended family, migration, unemployment.</i>
6.1d	Identify ways how the individual and the family can interact within the community.
6.2d	Outline ways how the individual and the family can interact within the community. <i>E.g. youth/parish/sports/band clubs, voluntary work, local council activities.</i>
6.3d	Evaluate the benefits of active participation of individuals and the family within the community.
6.1e	Identify traits of positive family relationships.
6.2r	Outline ways in which adolescents can exhibit their responsibilities towards their family, their school, and the community.
6.3s	Describe how lifestyle choices during adolescence can have an impact on health. <i>Short-term and long-term impact.</i>
Childcare and Development	
6.1h	List factors that can harm the unborn child. <i>Alcohol, smoking, medication, illicit drugs, x-rays, illnesses such as Rubella and Chicken Pox, and food poisoning.</i>
6.3h	Explain briefly how each factor can be harmful to the unborn child. <i>Alcohol, smoking, medication, illicit drugs, x-rays, illnesses such as Rubella and Chicken Pox, and food poisoning.</i>
6.1i	Identify the advantages and disadvantages of breastfeeding and bottle feeding.
6.2i	Define the following terms: <i>Breastfeeding and/or bottle-feeding and/or weaning.</i>
6.3i	Outline the advantages and disadvantages of breastfeeding and bottle feeding.
6.2j	Explain the importance of weaning.
6.3j	Discuss the advantages and disadvantages of ready-made baby foods vs homemade-food.
6.1k	Classify basic physical, social, emotional, and intellectual needs of children.
6.2k	Outline basic physical, social, emotional, and intellectual needs of children at different stages of development (newborn, infancy, early childhood, late childhood, adolescence).
6.3k	Suggest ways of how parents can promote the physical, social, emotional, and intellectual development of children (newborn, infancy, early childhood, late childhood, adolescence).

6.1l	Select examples of play-related activities inside and outside the home which promote the physical, social, emotional, and intellectual development of the child.
6.2l	Suggest different age-appropriate play-related activities to promote the physical, social, emotional and/or intellectual development of the child.
6.2m	List examples of toys which can be created by reusing household items.
6.3m	Describe the importance of play to promote the physical, social, emotional, and intellectual development of the child.
6.1n	Identify toy safety symbols, marks, and logos: <i>Limited to: The Lion Mark, CE Mark, Age warning, British Standards Kitemark.</i>
6.2n	Explain symbols, marks and logos related to toy safety.
6.3n	Evaluate a given toy in terms of age-appropriateness, safety, suitability, and sustainability to promote child development of a particular child.
6.3o	Explain how an environment which promotes healthy living can be created within the family. <i>Nutritious food, physical activity, appropriate leisure, no substance abuse.</i>
6.1p	State different childcare options. <i>Relatives, grandparents, childcare centres, childminder, and live-in nanny.</i>
6.2p	Outline the advantages and disadvantages of different childcare options.
6.3p	Justify the choice of suitable childcare options for a given scenario.
6.2q	Select examples of main diseases children are immunised against during the first and second years of life and/or during the adolescent years. <i>Children: Diphtheria, Tetanus, Polio, Pertussis (whooping cough), Measles, Mumps, Rubella (MMR), Meningitis, Haemophilus influenza type B (Hib) and Chicken Pox.</i> <i>Adolescent: HPV</i>
6.3q	Discuss why vaccines are safe and important for children and adolescents.
BLO 6.2 - I can explain First Aid procedures and describe the use of fire safety equipment.	
First Aid	
6.1ag	Identify items found in a first aid box.
6.2ag	List items found in a first aid box.
6.3ag	Describe the purpose of different items in a first aid box.
6.1ai	State the emergency number (112).
6.2ai	Describe the correct procedure to seek help in an emergency indoors and outdoors. <i>Note: Include the information one should give when making an emergency call.</i>
6.1aj	Put in order the steps for treating injuries. <i>Limited to: cuts and grazes, burns and scalds, nose bleeds, fainting, bruising, swelling and sprains, jellyfish sting, insect stings, poisoning.</i>

	<i>Note: Poisoning refers to injury due to swallowing, inhaling, touching or injecting various substances e.g. chemicals.</i>
6.3aj	Explain basic first aid procedures for injuries. <i>Limited to: cuts and grazes, burns and scalds, nose bleeds, fainting, bruising, swelling and sprains, jellyfish stings, insect stings, poisoning.</i> <i>Note: Poisoning refers to injury due to swallowing, inhaling, touching or injecting various substances e.g. chemicals.</i>
Fire Safety	
6.1ah	Identify the safety equipment available for fire safety. <i>Fire extinguisher, fire blanket, smoke detector.</i>
6.2ah	Describe the purpose and correct use of the fire extinguisher, fire blanket and smoke detector.

LO 8 - I can demonstrate an understanding of sustainable living and the principles and procedures involved in acquiring, designing, and using accommodation and resources according to the needs of individuals and families (coursework and controlled)

BLO 8.1 - I can use and care for Food Lab equipment and appliances competently, efficiently, safely, and sustainably.

The Selection, Safe Use and Care of Food Lab Equipment

5.2bl	Demonstrate the proper care of work surfaces, utensils, and equipment in the food lab so their lifespan is maximised.
5.2bm	Carry out the washing up in a logical, efficient, effective, safe, and environment-friendly way.
8.1o	Suggest the various pieces of equipment needed for a given recipe.
8.2o	Describe the correct, safe use and care of the various pieces of small equipment needed for different tasks in the food lab.
8.2p	Demonstrate the correct, safe use and care of the various pieces of small equipment needed for different tasks in the food lab.

Weighing and Measuring

5.1bd	Choose the appropriate equipment to weigh and measure a given list of ingredients.
5.2bd	Weigh and measure solid and liquid ingredients accurately using a range of different utensils such as weighing scales, measuring cups, measuring spoons and jugs.

The Critical Choice of Household Equipment and Appliances: The Refrigerator and Freezer

8.1m	List various household and/or kitchen equipment and appliances/labour saving devices. <i>Refrigerator, freezer.</i>
------	--

8.2m	Describe the key function/s and main parts and/or features of household and/or kitchen equipment and appliances/labour saving devices. <i>Refrigerator (larder), fridge freezer (side by side, top/bottom mount, French door), freezer (chest and upright).</i>
8.3m	Compare and contrast a selection of different household and/or kitchen equipment and appliances/labour saving devices based on versatility, efficiency, sustainability, and safe use. <i>Refrigerators – larder; Fridge freezers – side by side, top/bottom, French door; Freezers – chest, upright.</i>
8.1n	Identify the factors which need to be considered when purchasing household and/or kitchen equipment and appliances. <i>E.g. space available, family needs, family lifestyle, family budget, sustainability, type of décor.</i>
8.2n	State the factors which need to be considered when purchasing household and/or kitchen equipment and appliances. <i>E.g. space available, family needs, family lifestyle, family budget, sustainability, type of décor.</i>
8.3n	Evaluate the need for household and/or kitchen equipment and appliances for given scenarios.
5.2bl	Demonstrate the proper care of work surfaces, utensils, and equipment in the food lab so their lifespan is maximised.
<i>The Critical Choice of Household Equipment and Appliances: The Cooker</i>	
8.1m	List various household and/or kitchen equipment and appliances/labour saving devices. <i>Cooker.</i>
8.2m	Describe the key function/s and main parts and/or features of household and/or kitchen equipment and appliances/labour saving devices. <i>Cooker.</i>
8.3m	Compare and contrast a selection of different household and/or kitchen equipment and appliances/labour saving devices based on versatility, efficiency, sustainability, and safe use. <i>Cookers – different combinations; Oven – gas, electric; Hobs – gas, electric, ceramic, induction.</i>
8.1n	Identify the factors which need to be considered when purchasing household and/or kitchen equipment and appliances. <i>E.g. space available, family needs, family lifestyle, family budget, sustainability, type of décor.</i>
8.2n	State the factors which need to be considered when purchasing household and/or kitchen equipment and appliances.

	<i>E.g. space available, family needs, family lifestyle, family budget, sustainability, type of décor.</i>
8.3n	Evaluate the need for household and/or kitchen equipment and appliances for given scenarios.
5.2bl	Demonstrate the proper care of work surfaces, utensils, and equipment in the food lab so their lifespan is maximised.

Alignment of Broad Learning Outcomes and Content with Suggested Assessment Criteria – Year 9

Assessment criteria provide information about the qualities, characteristics, and aspects of coursework that will be used to measure the attainment of different learning outcomes.

Aligning the assessment with the broad learning outcomes means that learners know how their achievements will be measured. Whilst there are no hard and fast rules as to how this is to be done the table below provides a practical guide as to the alignment of BLOs, topic areas, and distribution of assessment criteria. The framework is flexible, and teachers can shift assessment criteria to better address the needs of learners.

Subject Focus	Alignment of BLOs & Content	Suggested distribution of Assessment Criteria
Food, Nutrition, and Health (Theory and Practical Component)	BLO 1.1	
	The Concept of Health	1a, b, c, d, i
	Sustainable Living	1e, f, g, h
	BLO 1.2	
	The Dietary Guidelines	1k, l
	The National Food Guide Graphic	1o, p, q, r, s
	Functions of Food	1j, m, n
	BLO 2.2	
	Introduction to Nutrients	2a, b, c, d
	Proteins	2e, f, g, h, i, j, k
	Carbohydrates	2l, m, n, o, p, q, r
	Non-Starch Polysaccharides	2s, t, u, v, w, x
	Fats	2y, z, aa, ab
	Vitamins	2ac, ad, ae, af, ag, ah, ai, aj
	Minerals	2ah, ak, al, am, an, ao, ap
	Water	2aq, ar, as
	BLO 3.1	
	Food Commodity: Eggs	3a, b, d, e, f, g, u, v, w, x
	Food Commodity: Fish	3a, b, d, e, f, g, p, q
	Food Commodity: Herbs and Spices	3a, b, d, e, g, ae

	Food Commodity: Cereals, Pulses, Nuts and Seeds	3a, b, d, e, f, g, h, i, j, z, aa, ab, ac, ad
	Food Commodity: Milk and Dairy Products	3a, b, d, e, f, g, k, l, m, n, o
	BLO 4.1	
	Hygiene and Safety in the Food Lab	4al, 5bf, bg
	BLO 5.1	
	Recipe Engineering	5m, n, o
	Traditional Maltese Dishes	5m, n, o
	BLO 5.2	
	The Preparation Sheet	5ax, ay, az, ba, bb, bc, bo, bp
	Demonstration + Preparation for Practical (Using Food Commodity)	3c, d, 5be
	Practical Assignment on one or a combination of the following Food Commodities: Eggs; Fish; Cereals, Pulses, Nuts and Seeds; Herbs and Spices and Milk and Dairy Products	3c, 5ax, ay, az, ba, bb, bc, bd, be, bh, bj, `bk, bl, bm, bn, bo, bp
	BLO 5.3	
	Food Presentation	5bn
	BLO 5.4	
	Shortcrust Pastry (Theory and Demonstration)	5ah, ai, aj, ak, al, am, an
	Shortcrust Pastry (Practical Session)	5ax, ay, az, ba, bb, bc, bd, be, bh, bk, bl, bm, bn, bo, bp
	BLO 5.5	
	Cake-Making Methods	5x, y, z, aa, ab, ac, ao, ap
	Whisking Method (Theory and Demonstration)	5ad, ae, af, ag
	Whisking Method Practical Session	5z, ae, ag, ax, ay, az, ba, bb, bc, bd, be, bh, bk, bl, bm, bn, bo, bp
Family Wellbeing	BLO 6.1	
	The Family Unit	6a, b, c, d, e, r, s
	Child Care and Development	6h, i, j, k, l, m, n, o, p, q
	BLO 6.2	
	First Aid	6ag, ai, aj
Financial Literacy and Consumer Education	Fire Safety	6ah
	BLO 7.1	
Sustainable Living and Effective	This BLO within this focus is overarching, and every opportunity should be taken to address key concepts that seek to improve financial capability.	All Assessment criteria – as applicable
	BLO 8.1	
	The Selection, Safe Use of, and Care of Food Lab Equipment	5bl, 5bm, 8o, 8p

Management of Resources (Theory and Practical Component)	Weighing and Measuring	5bd
	The Critical Choice of Household Equipment and Appliances: The Refrigerator and Freezer	8m, n, 5bl
	The Critical Choice of Household Equipment and Appliances: The Cooker	8m, n, 5bl

Scheme of Assessment

The Home Economics Year 9 assessment consists of:

School-Based Assessment:

School-based assessment collates the outcome of various formative assessment work carried out in Year 9. Teachers are encouraged to assess learners through different modes of formative assessment, including but not limited to practical work, site visits, project work, investigations, discussions, debates, research, experiments, self-evaluation, comparative exercises, and quizzes. It is recommended to avoid written tests since a controlled examination is administered at the end of the year.

Educators should create opportunities to enable learners to attain key knowledge, skills, and competencies through different modes of formative assessment that cater for individual needs. Hence, it is vital that school-based assessment is ongoing and regularly marked throughout the scholastic year. Feedback given by the teacher will help the learners to improve their work and reach the set outcomes. It is recommended that a significant proportion of the coursework will be done in class under direct teacher supervision.

School-based assessment should be derived from a combination of learning outcomes and assessment criteria addressed in Year 9 which should be clearly identified at the beginning of each assessment task. School based assessment is set by the teacher at the students' working level i.e. at levels 1, 2, and 3 and fully marked by the teacher. The number of school-based assessment tasks as well as the allotted marks are determined by the school HE department/teacher.

Schools should keep to the specified deadlines communicated by the Education Directorates. For students who started studying Home Economics during scholastic year 2022/2023, the school-based assessment will contribute to 15% in Year 10 and 15% in Year 11. As from scholastic year 2023-2024, the School-based Assessment will contribute 10% in Year 9, 10% in Year 10 and 10% in Year 11. This will be reported to MATSEC at the end of Year 11.

Controlled Assessment:

The controlled component of the assessment will consist of an examination paper of one-and-a-half-hours set by the Education Directorate. The paper will be set in English and will cover all the learning outcomes and assessment criteria of the Year 9 programme in the following ratios: Level 1 - 30%; Level 2 - 30% and Level 3 - 40%. The examination paper will be marked out of 100 and candidates will be required to answer all the questions. Answers are to be written on the examination paper provided.

Syllabus Implementation Guidelines

- Due to the practical nature of the subject, it is important that **ALL** Home Economics Lessons are facilitated in a food lab.
- Suggested assessment criteria may feature in more than one area. This is purposefully done to link learning outcomes and topics across the curriculum whilst enabling learners to explore the interrelatedness of topic areas and facilitate comprehension and acquisition of skills and competencies.
- The school-based assessment that is spread throughout the year, should be determined by the class teacher in agreement with the School HE department according to the needs of the learners.

Appendix

Assignment 1 – Practical Assignment

Name of student: _____

Class: _____

School: _____

Scholastic Year: 20_____/20_____

Course Year (Circle one): 9 10 11

Assignment Number	
Title of Task	
Learning Outcome/s Assessed	

Criteria	Maximum Mark	Mark
Choice of Food Item/s and List of Ingredients	5	
Reasons for Choice	10	
Choice of Equipment and Order of Work	10	
Preparation	10	
Performance and Production	40	
Outcome	10	
Self-Evaluation, Outcome, and Suggestions for Improvement	15	
Total marks awarded	100	

To be filled by the teacher assessing the assignment:

Teacher's name: _____

Teacher's signature: _____

Date: _____

Assignment 2 – Site Visit

Name of student: _____

Class: _____

School: _____

Scholastic Year: 20_____/20_____

Course Year (Circle one): 9 10 11

Assignment Number	
Title of Task	
Learning Outcome/s Assessed	

Criteria	Maximum Mark	Mark
Date, Title, Aim, and Objective/s	10	
Preparatory Activities	20	
Site Details	10	
Site Activities	20	
Communication of Outcomes	20	
Discussion, Evaluation, Reflection, and References	20	
Total	100	

To be filled by the teacher assessing the assignment:

Teacher's name: _____

Teacher's signature: _____

Date: _____

Assignment 3 – Project

Name of student: _____

Class: _____

School: _____

Scholastic Year: 20_____/20_____

Course Year (Circle one): 9 10 11

Assignment Number	
Title of Task	
Learning Outcome/s Assessed	

Criteria	Maximum Mark	Mark
Title, Aim, Brief Description, and Plan of Action	10	
Secondary or Background Research	10	
Project Implementation	40	
Discussion and Conclusion	10	
Evaluation	10	
Reference List, Bibliography, and Appendices	10	
Oral Presentation	10	
Total	100	

To be filled by the teacher assessing the assignment:

Teacher's name: _____

Teacher's signature: _____

Date: _____

Assignment 4 – Practical Investigation

Name of student: _____

Class: _____

School: _____

Scholastic Year: 20_____/20_____

Course Year (Circle one): 9 10 11

Assignment Number	
Title of Task	
Learning Outcome/s Assessed	

Criteria	Maximum Mark	Mark
Problem Statement and Factors/Variables of Interest	10	
Investigation Justification	10	
Investigation Plan of Action (Preparation Sheet and Design of Results Grid)	20	
Practical Realisation	30	
Investigation Outcomes and Conclusions	20	
Evaluation and Recommendations	10	
Total	100	

To be filled by the teacher assessing the assignment:

Teacher's name: _____

Teacher's signature: _____

Date: _____

Name: _____

Class: _____

Preparation Sheet

Practical Assignment: _____

CHOICE OF FOOD ITEM/S AND LIST OF INGREDIENTS (5 marks)

Choice of food item/s

List of ingredients (including quantities and units)

Unit	Ingredients	Unit	Ingredients

REASONS FOR CHOICE

(10 marks)

[illegible]

CHOICE OF EQUIPMENT AND ORDER OF WORK

(10 marks)

Choice of Equipment

List of equipment				Labour saving devices

Order of work

[illegible]

SELF-EVALUATION, OUTCOME AND SUGGESTIONS FOR IMPROVEMENT

(15 marks)

Self-Evaluation (Strengths and weaknesses including outcome and suggestions for improvement)

[illegible]

Note – This Preparation Sheet should be used in conjunction with the marking criteria for the Practical Assignment.

Appendix 3 – The Cross Curricular Themes

The Cross Curricular Themes

Symbol	Cross Curricular Theme	Theme Learning Outcomes
	Literacy	• Listening and speaking • Expressive language • Reading and understanding • Writing • Accuracy • Planning and reflection
	Education for Diversity	• Self-Awareness • Social Change • Communicating for Diversity
	Digital Literacy	• Information Management • Communication • Collaboration • Use of Digital Media • Managing Learning • Managing Internet Use • Computational Thinking
	Education for Entrepreneurship, Creativity and Innovation	• Personal • Interpersonal • Cognitive • Practical
	Education for Sustainable Development	• Learning to Know • Learning to Do • Learning to Be • Learning to Live Together
	Learning to Learn and Cooperative Learning	• Social Learning • Personal Learning • Cognitive Learning • Creative Learning
