System Overview

Austria has a **partially centralised** education system: the federal level defines the *Lehrplan* (national curriculum), while schools and teachers have implementation autonomy. Health education (*Gesundheitsbildung*) is delivered as a **cross-curricular theme** (*Unterrichtsprinzip Gesundheitserziehung*) and through specific subjects, primarily **Biologie und Umweltkunde (BuS)** and **Sexualpädagogik**. The **Lehrplan 2023** is a significant reform introducing competence-based learning across all subjects including health content. The national health education agency is **GIVE (Gesundheit, Information, Vernetzung, Entwicklung)** in cooperation with the Ministry of Education (BMBWF).
