System Overview

Bulgaria has a **centralised education system** managed by the **Министерство на образованието и науката (МОН)**. **Биология и здравно образование** (Biology and Health Education) is a **mandatory integrated subject** throughout Bulgarian secondary education — one of the distinctive features of the Bulgarian system is that health education is explicitly combined with biology, making it a named mandatory subject rather than a purely cross-curricular theme. Health content covers: human biology, reproduction, sexual health, mental health, substance prevention, environmental health. The **НЦОЗА** (National Center for Public Health and Analysis) is the key health data body. Bulgaria participates actively in HBSC.
