This registry lists all source documents identified for Spain in the OneHealth EU project.

System Overview

Spain has a **decentralised education system**: the national ministry (MEFP) defines *enseñanzas mínimas* (55–65% of curriculum), while the 17 *Comunidades Autónomas* develop the remainder. Health education is integrated **transversally** across Biology and Geology, Physical Education (EPS), and Civic and Ethical Values. Spain also champions the **Escuelas Promotoras de Salud** model, linking human health to environmental health through a One Health lens.
