System Overview

France operates a **highly centralised** education system. Health education (*Éducation à la santé*) is not a standalone subject but is delivered as a **cross-curricular theme** across SVT (Life and Earth Sciences), EPS (Physical Education), and EMC (Moral and Civic Education). The structural framework is the **Parcours éducatif de santé (PES)**, mandatory since 2016. Each school has a **CESCE** committee coordinating health and citizenship education. The major 2025 reform introduces the **EVARS** programme — a structured national programme for affective, relational and sexuality education (minimum 3 sessions per year per level), mandatory from the 2025–2026 school year.

A. Législation primaire / Primary Legislation

1. Code de l'éducation — Article L312-16 (*Éducation à la sexualité*)
