This registry lists all source documents identified for Slovakia in the OneHealth EU project.

System Overview

Slovakia uses a **two-level curriculum system** similar to the Czech Republic: the **ŠVP** (*Štátny vzdelávací program* — State Educational Programme) defines national objectives, and schools develop their own **ŠkVP** (*Školský vzdelávací program*). Health education is not a standalone subject at most levels — it is integrated into **Biology, Physical Education, and Ethics/Religious Education** (*Etická výchova / Náboženská výchova*). A distinctive feature is the strong role of the Catholic Church in Slovak education, which influences the content and methodology of sexuality education. The **ŠPÚ** (State Pedagogical Institute) is the key curriculum authority.
